## STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

## IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION DIVISION FOR THE PURPOSE OF CONSIDERING:

## IN THE MATTER OF MESQUITE SWD, INC.'S APPLICATION NO. PKVR0817936301 TO AMEND PERMIT SWD-180

Case No. 14178 Order No. R-13043 Pm 12

### **MESQUITE SWD, INC'S MOTION FOR CLARIFICATION OF ORDER NO. R-13043**

Pursuant to the New Mexico Oil Conservation Division's authority under NMSA 1978 Section 70-2-5 and 70-2-6, Mesquite SWD, Inc. ("Mesquite") moves the New Mexico Oil Conservation Division ("NMOCD") to clarify Order No. R-13043.

### I. INTRODUCTION

On October 15, 2008, Division Examiners David Brooks, Richard Ezeanyim, and Terry Warnell held a hearing on Mesquite's Application to Amend Order No. SWD-180 to Inject Salt Water. On November 7, 2008, the NMOCD issued Order No. R-13043 approving Mesquite's Application subject to the conditions set forth in the Order.

The Order contains two discrepancies that Mesquite seeks to resolve through this Motion. First, Mesquite requests that the Director clarify that part of the Order requiring the Exxon State No. 8 well to dispose of water on a vacuum to exclude any pressure necessary to deliver water to the Exxon State No. 8 disposal well and the weight of the full water pressure in the well. **Order No. R-13043**, ¶ **3.** Per Mesquite's Application, Paragraph VII(3), such pressure shall not exceed 120 pounds per square inch ("psi").

Second, the Order requires Mesquite to plug four wells before Mesquite commences injection operations into the Exxon State No. 8. *Id.*, ¶ 4. The NMOCD has previously approved the plugging of two of these wells, the Magnolia State No. 3 and the Pure State No. 6. Exhibit 1, Scout Report, Magnolia State No. 3, dated September 29, 1953; Exhibit 2, Miscellaneous Reports on Wells, Magnolia State No. 3, dated September 30, 1953; Exhibit 3, Form C-102, Pure State No. 6, Dated July 3, 1957; Exhibit 4, Miscellaneous Report, Pure State No. 6, dated July 11, 1957. The other two wells, the Exxon State Nos. 2 and 7, are active producing wells operated by Mesquite SWD, Inc. Exhibit 5, Production Data for the Exxon State No. 2; Exhibit 6, Production Data for the Exxon State No. 7; Hearing Tr., p. 23, l. 17-18. Therefore, Mesquite requests that the NMOCD remove Paragraph 4 from Order No. R-13043.

## **II. ARGUMENT**

Mesquite requests that the Director revise and clarify Order No. R-13043 pursuant to the NMOCD's authority under NMSA 1978 Section 70-2-6 as follows:

## A. The Language in Paragraph 3 Regarding Disposal Under Vacuum Should Be Clarified to Exclude Any Pressure Resulting from the Transfer of Water to the Exxon State No. 8.

The Exxon State No. 8 well disposes of water on a vacuum. However, Mesquite must transfer water from the location at the battery to the disposal well. Mesquite therefore requests that the Director clarify Order No. R-13043 so that any water pressure resulting from the transfer of water to the Exxon State No. 8, or the weight of the full water in the well, which shall not exceed 120 pounds psi, will not constitute a violation of the Order R-13043 requiring the Exxon State No. 8 to dispose of water on a vacuum.

## B. Paragraph 4 Should Be Removed from Order No. R-13043 Because None of the Wells Identified by the NMOCD in Paragraph 4 Require Plugging.

The NMOCD has previously approved the plugging of both the Magnolia State No. 3 and the Pure State No. 6. The Magnolia State No. 3 was plugged and abandoned on September 29, 1953. **Ex. 1.** On September 30, 1953, L.A. Hanson from the NMOCD approved the plugging of the Magnolia State No. 3. **Ex. 2.** Neither the Applicant nor the NMOCD presented any evidence at the hearing that the Magnolia State No. 3 well was not properly plugged.

The NMOCD also approved the plugging of the Pure State No. 6 well. Order No. R-13043 incorrectly cites the API No. for the Pure State No. 6 well as API 30-015-01099.<sup>1</sup> The correct API No. for the Pure State No. 6 well is API No. 30-015-0190. The NMOCD records for the API No. 30-015-0190 demonstrate that the operator of the Pure State No. 6 well filed a Form C-102 to plug and abandon this well on July 3, 1957. **Ex. 3.** M.L. Armstrong from the NMOCD approved the Form C-102 on July 3, 1957, the same day the operator of the Pure State No. 6 plugged the well. *Id.* On July 11, 1957, a Miscellaneous Report, again approved by the NMOCD, detailed the plugging of the Pure State No. 6 well. **Ex. 4.** Like the Magnolia State No. 3, neither the Applicant nor the NMOCD suggested or presented any evidence at the hearing that the Pure State No. 6 well is not properly plugged.

The other two wells Order No. R-13043 directed Mesquite to plug, the Exxon State No. 2, API No. 30-015-01092, and the Exxon State No. 7, API No. 30-015-01100, are producing wells operated by Mesquite SWD, Inc. Ex. 5; Ex. 6; Hearing Tr., p. 23, l. 17-18. Mesquite has attached the production data for both wells showing that these two wells are active producing

<sup>&</sup>lt;sup>1</sup> The mistake in the API No. may have resulted from a typographical error in Dr. Havenor's Report, Assessment of the Geological Structure and Stratigraphy and Hydrogeological Setting of the Mesquite Exxon State No. 8 Saltwater Disposal Well and Other Wells ("Assessment Report"), **Mesquite Hearing Ex. 25**.

wells. Ex. 5; Ex. 6. Additionally, Mr. Perini testified during the hearing that the Exxon State Nos. 2 and 7 are active producing wells operated by Mesquite SWD, Inc. Hearing Tr., p. 23, l. 17-18. Consequently, a requirement that Mesquite plug the Exxon State No. 2 or the Exxon State No. 7 would result in waste contrary to the NMOCD regulations. *See*, 19.15.1.13 NMAC ("The production or handling of crude petroleum oil or natural gas of any type or in any form, or the handling of products thereof, in such a manner or under such conditions or in such amount as to constitute or result in waste is hereby prohibited.").

Mesquite provided a copy of this Motion to Mr. Sonny Swazo, counsel for the NMOCD, and Mr. Swazo indicated that he needed time to research the issues presented in this Motion and therefore could not concur in the Motion.

### CONCLUSION

For the reasons set forth above, Mesquite requests that the NMOCD:

1. Revise Paragraph 3 as follows:

The disposal of produced water into the Exxon State No. 8 Well shall be under vacuum, excluding the pressure necessary to transfer water to the well and the weight of the full water pressure in the well, such pressure not to exceed 120 psi, and shall be accomplished through a 2-7/8 inch plastic coated tubing set in a packer at 550 feet.

2. Remove Paragraph 4 from the Order.

Respectfully submitted,

HINKLE, HENSLEY, SHANOR & MARTIN, LLP

Thomas M. Hnasko Kelcey C. Nichols Post Office Box 2068 Santa Fe, NM 87504-2068 505.982.4554

## NEW MEXICO OIL CONSERVATION COMMISSION

#### Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in TRIPLICATE to the District Office, Oil Conservation Commission, within 10 days after the work specified is completed. It should be signed and filed as a report on Beginning Drilling Operations, Results of test of casing shut-off, result of plugging of well, result of well repair, and other important operations, even though the work was witnessed by an agent of the Commission. See additional instructions in the Rules and Regulations of the Commission.
