

This is a detailed geological map of the Yates and Pecos regions in Texas. The map is divided into numerous sections, each labeled with a number and containing detailed information about the area. Key features include:

- SEVEN RIVERS**: A large area in the upper central part of the map.
- BUBBLING SPRINGS, W**: A large area in the lower central part of the map.
- YATES PETROLEUM UNIT**: A large area in the upper right part of the map.
- Pecos River**: A river flowing through the eastern part of the map.
- Yates River**: A river flowing through the northern part of the map.
- Oil Fields and Wells**: Numerous oil fields and wells are shown, each labeled with a name and a number. Examples include Yates, Pecos, and Seven Rivers.
- Geological Features**: Various geological features are shown, including faults, folds, and stratigraphic columns.

The map is a complex representation of the geological structure and oil production in the Yates and Pecos regions. It includes a grid system for location finding and a legend for interpreting the symbols and labels used throughout the map.
