Mark Fesmire
Division Director
Oil Conservation Division

Dear Mr. Welborn,

The New Mexico Oil Conservation Division District 2 Office (OCD) is in receipt of an Initial Report Form C-141 reporting produced fluid releases at each of the well sites listed below:

Levers Federal 007	30-015-25091	J-33-16s-29e	OCD Reference: 2RP-304
Levers 003Y	30-015-02787	N-33-16s-29e	OCD Reference: 2RP-305
Red 12 Federal 001	30-015-25058	O-33-16s-29e	OCD Reference: 2RP-306
Cave State 004	30-015-24742	F-04-17s-29e	OCD Reference: 2RP-307
Red 12 State 002	30-015-24966	H-04-17s-29e	OCD Reference: 2RP-308
Red 12 State 003	30-015-24969	J-05-17s-29e	OCD Reference: 2RP-309
Red 12 State 004	30-015-24991	O-05-17s-29e	OCD Reference: 2RP-310

The Form C-141s were submitted by Marks and Garner Production LTD Co (Marks and Garner) as a response to Letters of Violation (LOV) that were issued by OCD District 2 Office.

OCD is requesting that a corrective action work plan proposal (work plan) be submitted to the OCD District 2 Office for each of the sites, not later than June 15, 2009.

The work plans are to outline steps proposed to clean up, remediate, and/or haul off contaminated materials that may be present at these sites. The work plans are to be formulated based on vertical and horizontal delineation of contaminants, site ranking, and OCD Rules and Guidelines. Work plan approvals may be subject to like approval by Bureau of Land Management (BLM) in some instances.

A publication is available on the OCD website to aid in the remediation process, and site ranking. It may be located as follows:

www.emnd.state.nm.us/ocd

Click on each of the items as they appear:

Mr. Weiborn,

As per our phone conversation this morning, your request for an extension to submit remediation work plans for clean up at the sites listed below is approved to June 19, 2009. It is my understanding that you have employed an environmental contractor and they are in the process of evaluating the sites for formulation of the required work plan proposals.

Mike,

Please find the attached work plan as we discussed on the phone. I will also send you a hard copy. I plan to be at the site(s) on Monday morning by 9:00 AM. Please call me if I can meet you at one of them or if you need any additional information.

Thanks,

RE: Seven Produced Fluid Releases at sites operated by Marks and Garner Production
Ltd, Company in Eddy County, NM as follows:

Site Name (Type)	Location (T-R-Sec.-Unit)	OCD Reference No.
Levers Fed. No. 7 (well)	T-16-S, R-29-E, Sec 33 (I)	2RP-304
Levers No. 3Y (well)	T-16-S, R-29-E, Sec 33 (N)	2RP-305
Red 12 Fed. No. 1 (battery)	T-16-S, R-29-E, Sec 33 (O)	2RP-306
Cave State No. 4 (well)	T-17-S, R-29-E, Sec 4 (F)	2RP-307
Red 12 State No. 2 (battery)	T-17-S, R-29-E, Sec 4 (H)	2RP-308
Red 12 State No. 3 (battery)	T-17-S, R-29-E, Sec 5 (I)	2RP-309
Red 12 State No. 4 (battery)	T-17-S, R-29-E, Sec 5 (O)	2RP-310

Dear Mr. Bratcher:

R.T. Hicks Consultants is pleased to submit this investigation plan on the behalf of Marks and Garner Production Ltd. This investigation plan includes the initial description and characterization of the each facility relative to the release areas. The purpose of these investigations is to determine which sites may require corrective action under Part 29 of the NM OCD Rules (formally Rule 116).

Field measurements will be made for the preparation of detailed site maps which depict the spill areas and soil samples locations. Samples will be recovered using a hand auger, shovel, or push-probe sampler in order to delineation the vertical and horizontal extent of chlorinated and/or hydrocarbon-impacted soil. Field screening of the soil samples will be performed using a photoionization detector (PID) for hydrocarbons and silver nitrate titration for chlorides. Selected samples will be submitted to a laboratory for verification of regulated petroleum hydrocarbons, and chloride.

These activities are scheduled to begin Monday, June 22, 2009 at 9:00 AM (MT) and are expected to require two to three days. Following the completion of the site field investigation and laboratory analysis, recommendations will be presented to the OCD for additional corrective action or file closure.

August 19, 2009

Mailed 8/21/2009

Dear Mr. Wellborn,

The New Mexico Oil Conservation Division District 2 Office (OCD) is in receipt of a remediation work plan proposal (plan) for the sites operated by your company as listed below:

Levers Federal 007	30-015-25091	J-33-16s-29e	OCD Reference: 2RP-304
Levers 003Y	30-015-02787	N-33-16s-29e	OCD Reference: 2RP-305
Red 12 Federal 001	30-015-25058	O-33-16s-29e	OCD Reference: 2RP-306
Cave State 004	30-015-24742	F-04-17s-29e	OCD Reference: 2RP-307
Red 12 State 002	30-015-24966	H-04-17s-29e	OCD Reference: 2RP-308
Red 12 State 003	30-015-24989	J-05-17s-29e	OCD Reference: 2RP-309
Red 12 State 004	30-015-24951	O-05-17s-29e	OCD Reference: 2RP-310

The plan was formulated and submitted by your agent, R.T. Hicks Consultants, LTD. The plan was received by OCD via email August 12, 2009 and a hard copy received via USPS on August 17, 2009.

The overall scope of the proposed remediation for these sites is not approved. More specific reasons for denial of this plan are as follows:

OCD's criteria for remediation and/or removal of contamination due to the release of oil and gas related produced fluids, are based on current OCD Rules and Guidelines. The Guidelines are from the 1993 OCD publication, Guidelines for Remediation of Leaks, Spills and Releases. This document sets the criteria for determining a site ranking. The Recommended Remediation Action Levels (RRAL) for hydrocarbon based contaminants is specific dependent upon the site ranking. The RRAL may be modified by OCD in some instances based on site specific conditions. However, the site ranking, as described in the publication, is to be provided in any remediation proposal. It has not been provided in this plan.

The plan for some of the sites states that even though contaminant levels exceed the OCD Guidelines, they do not exceed the 2006 NMED Guideline levels. NMED Guidelines typically would have no relevance in determining the methods of remediation and/or RRAL for contaminants for cleanup of these sites.

In most instances, the sites have not been fully delineated for contaminants. For example, the analytical data provided for the Levers No. 3 well shows TPH levels from the surface samples to be 48,990 mg/kg. The next data provided was from a sample obtained at 6' bgs. The TPH levels

August 20, 2009
Page 2

in this sample are 8,911 mg/kg. No other data was provided. Under OCD Guidelines, the maximum TPH level allowed at a site (with a site ranking of 0 points) is 5,000 mg/kg. The data provided not only does not show how deep the contaminants have migrated, it does not even show where the contaminants reach the RRAL. Also, no testing was performed for chloride contaminants.

In general, the plan proposes to only excavate a minimal amount of contaminated soils, blend this material with clean soils and use for building berms at tank batteries. Any extra material would be stockpiled for future use. This is not an acceptable method of remediation.

The plan also includes proposed methods to be used when the sites are abandoned. Since the abandonment of these sites may be decades away, this portion of the proposal has no relevance in what will be required for the remediation of contamination that currently exists at these sites.

In most of the site remediation proposals, no analysis has been done for chloride contamination. Testing for this constituent is required in performing site delineation.

In my letter dated May 14, 2009, I requested that a corrective action work plan proposal be submitted to the OCD District 2 Office. The work plans were to be formulated based on vertical and horizontal delineation of contaminants, site ranking, and OCD Rules and Guidelines.

Please send a revised work plan that more adequately meets these criteria not later than September 10, 2009.

If you have any questions or concerns please contact me.

Sincerely,

A handwritten signature in black ink.
