Mr. Lemay;

I would like to protest the salt-water disposal well that is being prepared on a location near my house. This is being done by Farris Oil Company of Midland. It is on the Lea PL State lease in Lea County. The proposed well is directly in front of my house, approximately 200 yards from my front door. The odor this will cause in my home make this totally unacceptable. Farris Oil Co has another location on this same property that could be used as an alternative site. It would be just as effective an use and not experience the same bad effects. Please assist me in getting this change expedited. If you need more information, please call me. My phone number is 505 295 2165.
