Attn: Ms. Florene Davidson

This letter is to serve as a request for a Hearing with the Oil Conservation Division for exception to Rule 309-A and permit the surface commingling of production from the following leases be allocated to each well by individual 24 hour tests taken monthly.

SAUNDERS PERMO UPPER PENN FIELD - LEA COUNTY, NEW MEXICO

Lion State	01-J-09-14S-33E
Lion State "A"	02-P-09-14S-33E
Saunders State	01-N-09-14S-33E
Saunders State	02-E-16-14S-33E
Saunders State	03-O-09-14S-33E

Tamarack Petroleum Company, Inc. received administrative approval to commingle their Saunders Permo Upper Penn Pool production the 24th day of July, 1995, **COMMINGLING ORDER CTB-411**, by separately metering the production from each lease prior to commingling. TPC, as operator, cannot justify installing and operating separate metering equipment on these wells. Surface commingling these leases into one central battery without well metering will enable the wells to produce more economically and reduce operating costs, such that it will extend the life of these leases and increase ultimate recovery from these properties.

All parties owning an interest in the above leases have been notified in writing of our intent to allocate production by a 24 hour monthly test and have noted documentation of their approval..

If anything else is needed to place our name on the docket for a hearing on the first available opening, please let me know.

Sincerely,

T. Wayne Green
Production Agent
