Re: Neff Prospect NM-503
Eddy County, New Mexico
Application for Hearing
Pilot Pressure Maintenance Project

Gentlemen:

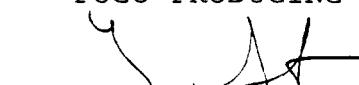

Reference is made to our letter dated September 29, 1995 wherein it was advised that Pogo had applied to the Oil Conservation Division for a pilot waterflood project for its Neff Federal Lease.

Please be advised that Pogo Producing Company has amended its application and has now applied to the Oil Conservation Division for a pilot pressure maintenance project for its Neff Federal Lease, which covers Section 25, Township 22 South, Range 31 East, in Eddy County, New Mexico. Injection will be through the Neff Federal Well No. 3, located in Unit D of Section 25, and the injection interval will be the Delaware formation. A copy of the amended Application is enclosed.

This matter has been set for hearing on Thursday, November 2, 1995 at 8:15 A.M., in the City Council Chambers at Roswell City Hall, Roswell, New Mexico. Failure to appear at that time will preclude you from contesting this matter at a later date.

Very truly yours,

POGO PRODUCING COMPANY

Terry Gant
Senior Landman

BEFORE THE NEW MEXICO OIL CONSERVATION DIVISION

**APPLICATION OF POGO PRODUCING
COMPANY FOR A PILOT PRESSURE
MAINTENANCE PROJECT, EDDY COUNTY,
NEW MEXICO**

NO. 11403

AMENDED APPLICATION

Pogo Producing Company, for its application, states:

1. Applicant is the operator of the Neff Federal lease, which covers all of Section 25, Township 22 South, Range 31 East, N.M.P.M., Eddy County, New Mexico.

2. Applicant proposes to institute a pilot pressure maintenance project for the Neff Federal lease by injecting water into the Delaware formation (Livingston Ridge-Delaware Pool) through perforations from 7050 feet to 7068 feet in its existing Neff Federal Well No. 3, located 430 feet from the North line and 760 feet from the West line (Unit D) of Section 25.

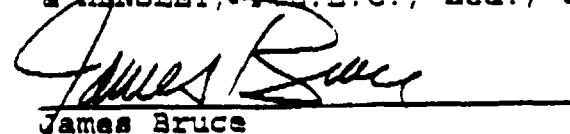

3. The Form C-108 for the project is attached hereto as Exhibit A.

4. The granting of this application is in the interests of conservation and the prevention of waste.

WHEREFORE, Applicant requests that, after notice and hearing, the relief requested herein be granted.

Respectfully submitted,

HINKLE, COX, EATON, COFFIELD
& HENSLEY, P.L.L.C., Ltd., Co.

Attorneys for Applicant

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
 Application qualifies for administrative approval? Yes No
- II. Operator: PDC PRODUCING COMPANY
 Address: P. O. Box 10340, Midland, Texas 79702
 Contact party: Richard L. Wright Phone: 915/692-6822
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? Yes No
 If yes, give the Division order number authorizing the project _____.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- VIII. Attach appropriate geological data on the injection zone including appropriate lithology detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notices" section on the reverse side of this form.
- XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Bill F. Halipeska Title: Agent, P. E.

Signature: Bill F. Halipeska Date: 08/16/95

If the information required under Sections VI, VIII, X, and XI above has been submitted, it need not be duplicated and resubmitted. Please show the data and the earlier submittal.

Application for Hearing
Pilot Pressure Maintenance Project
Eddy County, New Mexico

Gentlemen:

Reference is made to your letter dated October 10, 1995, proposing a pilot pressure maintenance project on your Neff Federal Lease, covering Section 25, Township 22 South, Range 31 East, Eddy County, New Mexico.

Texaco Exploration and Production Inc. has no objection to Pogo's proposed pilot pressure maintenance project.

Yours very truly,

A handwritten signature in cursive script that appears to read "Terry L. Young".

Re: Neff Prospect NM-503
Eddy County, New Mexico
Application for Hearing
Pilot Pressure Maintenance Project

Gentlemen:

Please be advised that Pogo Producing Company has applied to the Oil Conservation Division for a pilot pressure maintenance project for its Neff Federal Lease, which covers Section 25, Township 22 South, Range 31 East, in Eddy County, New Mexico. Injection will be through the Neff Federal Well No. 3, located in Unit D of Section 25, and the injection interval will be the Delaware formation. A copy of the Application is enclosed.

This matter was set for hearing on Thursday, November 2, 1995, but has been continued to Thursday, November 16, 1995, at 8:15 A.M., at the Division's offices at 2040 South Pacheco Street, Santa Fe, New Mexico. Failure to appear at that time will preclude you from contesting this matter at a later date.

Very truly yours,
POGO PRODUCING COMPANY

BEFORE THE NEW MEXICO OIL CONSERVATION DIVISION

APPLICATION OF POGO PRODUCING
COMPANY FOR A PILOT PRESSURE
MAINTENANCE PROJECT, EDDY COUNTY,
NEW MEXICO

NO. 11403

AMENDED APPLICATION

Pogo Producing Company, for its application, states:

1. Applicant is the operator of the Neff Federal lease, which covers all of Section 25, Township 22 South, Range 31 East, N.M.P.M., Eddy County, New Mexico.

2. Applicant proposes to institute a pilot pressure maintenance project for the Neff Federal lease by injecting water into the Delaware formation (Livingston Ridge-Delaware Pool) through perforations from 7050 feet to 7068 feet in its existing Neff Federal Well No. 3, located 430 feet from the North line and 760 feet from the West line (Unit D) of Section 25.

3. The Form C-108 for the project is attached hereto as Exhibit A.

4. The granting of this application is in the interests of conservation and the prevention of waste.

WHEREFORE, Applicant requests that, after notice and hearing, the relief requested herein be granted.

Respectfully submitted,

HINKLE, COX, EATON, COFFIELD
& HENSLEY, P.L.C., Ltd., Co.

Attorneys for Applicant

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
 Application qualifies for administrative approval? Yes No
- II. Operator: ENCO PRODUCING COMPANY
 Address: P. O. Box 10340, Midland, Texas 79702
 Contact party: Richard L. Wright Phone: 915/682-6822
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? Yes No
 If yes, give the Division order number authorizing the project _____
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half-mile radius circles drawn around each proposed injection well. This circle identifies the well's area of review.
- VI. Attach a tabulation of data on all wells of public record within the area of review which penetrates the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- VIII. Attach appropriate geological data on the injection zone including appropriate lithology detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Bill F. Wajepeska Title: Agent, P. E.

Signature: Bill F. Wajepeska Date: 08/15/95

If the information required under Sections VI, VIII, X, and XI above has been submitted, it need not be duplicated and resubmitted. Please show the date and the earlier submittal.

EXHIBIT
A

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in "use" and schematic form and will include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.
- (1) The name of the injection formation and, if applicable, the field or pool name.
 - (2) The injection interval and whether it is perforated or open-hole.
 - (3) State if the well was drilled for injection or, if not, the original purpose of the well.
 - (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
 - (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

IV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leaseholder operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

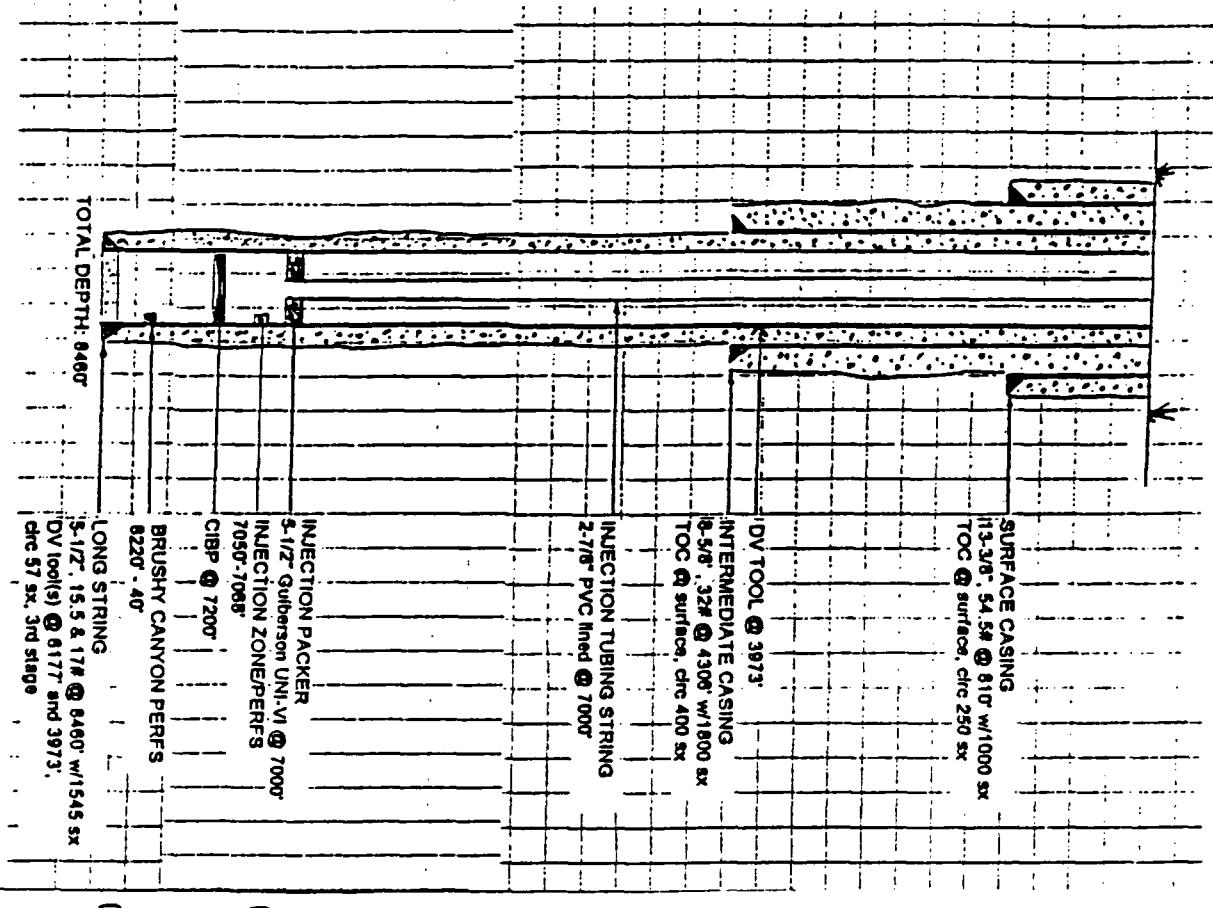

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

APPLICATION FOR AUTHORIZATION TO INJECT

Neff Federal No. 3

- I. Purpose: Secondary Recovery Pressure Maintenance Diagonal Storage
 Application qualifies for administrative approval? Yes No

II. Operator: POGO PRODUCING COMPANYAddress: P. O. Box 10340, Midland, Texas 79702Contact party: Richard L. Wright Phone: 915/682-6822

III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? yes no
 If yes, give the Division order number authorizing the project _____.

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)

XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification

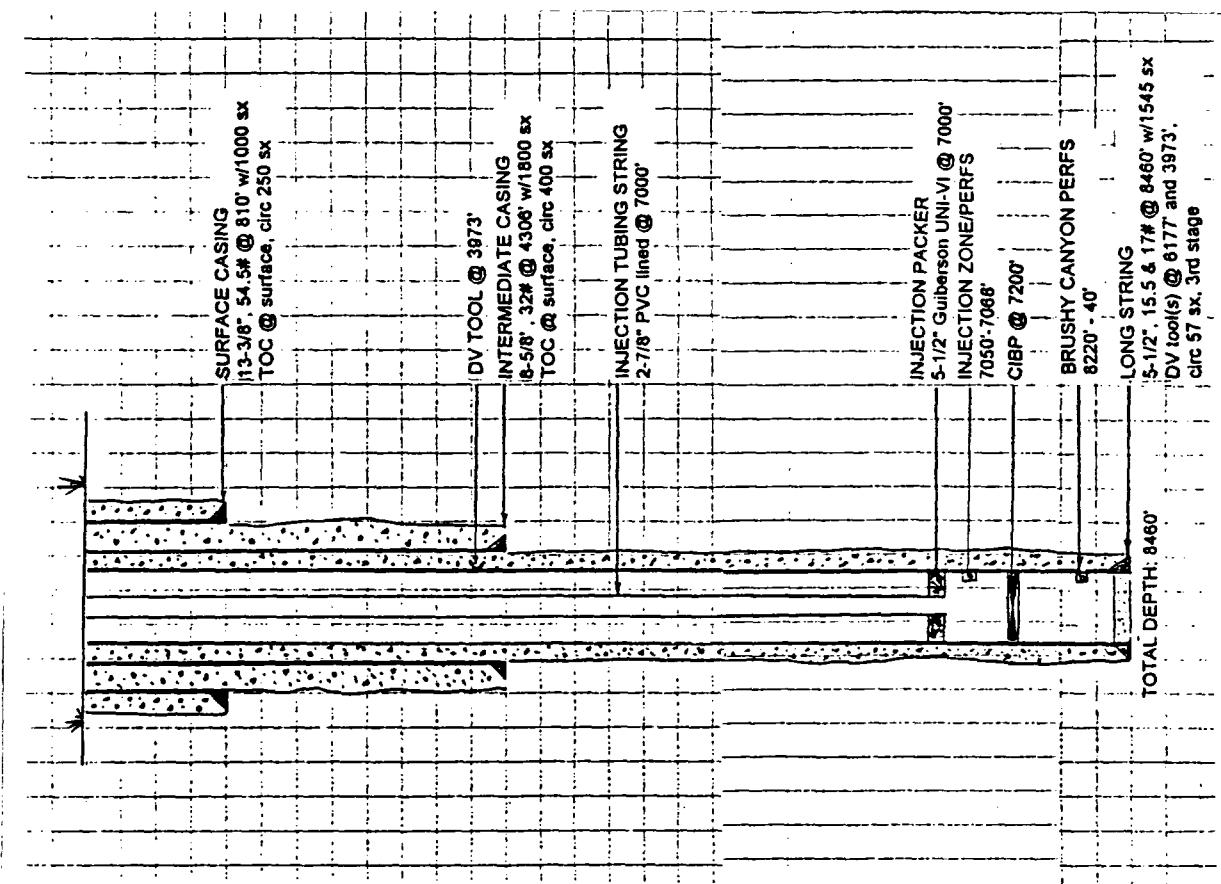

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Bill F. Halepeska Title: Agent, P. E.Signature: Bill Halepeska Date: 08/16/95

If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

Re: Neff Fed. No. 3 - OCD No. 11403

Dear Sirs:

This letter is written in support of the above referenced matter in which Pogo Producing Company has requested permission to conduct a pilot pressure maintenance project at the referenced well. By letter dated November 10, 1995, IMC Global Operations Inc. objected to Pogo's request. Several of the arguments contained in IMC's letter are addressed below.

IMC implies that it owns an interest in a federal potash lease 760' to the west of the Neff Fed. No. 3 well. This is not correct. The lease in question, identified by BLM as Lease No. NM-90851, was illegally issued by BLM. A copy of a Stipulated Judgment filed in Federal Court is attached hereto as Exhibit A. In the Stipulated Judgment, BLM admitted the lease was illegally issued and agreed to "revoke, cancel and terminate" the lease to IMC. By decision dated December 10, 1993, BLM canceled IMC's lease. A copy of the Cancellation Decision is attached hereto as Exhibit B. IMC has appealed the decision canceling their claimed lease. However, applicable regulations do not allow IMC the right to presently claim any interest in that potash lease. Furthermore, OCD Order R-111-P (G) clearly calls for LMRs to be filed only as to federal or state lands leased for potash. IMC has, therefore, improperly included those lands in its LMR.

IMC also incorrectly claims that a lawsuit by Doyle Hartman against Texaco is relevant to these proceedings. That lawsuit is currently on appeal and has no precedential value. Furthermore, the trial in that case only resulted in a general finding of liability against Texaco for trespass and nuisance. No findings of fact or special interrogatories as to any factual basis for the multiple theories of possible fluid migration presented by Hartman were ever entered in that lawsuit.

Very truly yours,

James A. Gillespie

UNITED STATES DISTRICT COURT
ALBUQUERQUE, NEW MEXICO

OCT 28 1993

POGO PRODUCING COMPANY,
a Delaware Corporation, and
YATES PETROLEUM CORPORATION,
a New Mexico Corporation,

R. Thompson March

Plaintiffs,

vs.

Civ. No. 93-0213 JP

THE BUREAU OF LAND MANAGEMENT,
New Mexico State Office, MONTE JORDAN,
acting BLM New Mexico State Director,
in his official capacity; REED L. SMITH,
BLM Deputy State Director, Lands & Minerals,
in his official capacity; LESLIE CONE,
BLM District Manager, Roswell District,

Defendants.

STIPULATED JUDGMENT

THIS MATTER, having come before this Court upon a Motion for Order to Show Cause, filed by the Plaintiffs Pogo Producing Company ("Pogo") and Yates Petroleum Corporation ("Yates"), this Court having issued its Order to Defendants to show reason why they have not violated the terms of the Stipulation and Order entered in this matter on February 23, 1993, and the parties having agreed upon the form of this Stipulated Judgment and being otherwise fully advised as to the merits of this cause, this Court FINDS:

1. The Defendant New Mexico State Office, Bureau of Land Management (BLM), breached the terms of the February 23, 1993 Stipulation between Pogo and Yates and the Defendant by issuing Potassium Lease NM-90581 on March 5, 1993.

2. The Defendant violated the February 23, 1993 stipulation. The Defendant submits that the breach was inadvertent, as shall be further explained in the letter submitted pursuant to paragraph 1, below.

3. Pogo and Yates have reasonably and necessarily incurred attorneys fees and costs as a direct result of the violation of the February 23 Stipulation and Order.

IT IS, THEREFORE, ORDERED AS FOLLOWS:

1. Within 10 days of entry of this Stipulated Judgment the Defendant BLM will issue a written statement, explaining in detail the circumstances surrounding and the cause for the violation of the February 23 Stipulation and Order.

2. Defendant BLM shall pay to Pogo Producing Corporation and Yates Petroleum Corporation the sum of \$11,000.00, said sum shall be paid within 90 days of entry of the Stipulated Judgment.

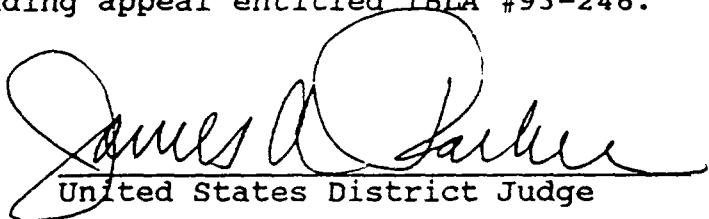

3. Within 10 days of entry of this Stipulated Judgment the Defendant will take such steps as are necessary to revoke, cancel and terminate the issuance of Potassium Lease NM-90581 to IMC Fertilizer, Inc. on March 5, 1993, including, but not limited to, a joint motion with the Plaintiffs to remand IBLA Appeal No. 93-521, attaching thereto a copy of this Stipulated Judgment.

4. Upon receipt of satisfactory evidence that BLM has taken the steps outlined above, Pogo and Yates will move, if necessary, to dismiss their IBLA Appeal No. 93-521.

5. Defendants shall not issue a Potassium lease for the lands covered by Potassium Lease NMNM-86719 to IMC or anyone else

until Pogo and Yates have exhausted their administrative appeals and any other legal remedies with respect to the rejection of their bid on Potassium Lease NMNM-86719.

6. In the event that it becomes necessary for Pogo and/or Yates to enforce this order due to a breach hereof by defendant BLM, Pogo and/or Yates shall be entitled to recover from defendant BLM their reasonable attorney fees and costs incurred in enforcing this order. This provision for attorney fees and costs is not intended to impose and shall not be construed to impose on defendant BLM any obligation to pay plaintiff's attorney fees in the event of an appeal by IMC of the rescission of the lease referred to herein, or in the event of any other judicial or administrative action which may be taken by IMC or by any other entity. "Breach" as used above shall mean if the subject lease is issued by BLM to IMC or any other lessee during this pending civil litigation or during the pending appeal entitled IBLA #93-246.

DECISION

IMC Fertilizer, Inc. :
Attn: Walt Thayer : Potassium Lease
P.O. Box 71 :
Carlsbad, NM 88220 :
:

Cancellation of Potassium Lease

On March 5, 1993, the Bureau of Land Management, New Mexico State Office (BLM) issued Federal potassium lease NMNM 90581 (originally designated as NMNM 86719) to IMC Fertilizer, Inc (IMC). The lease was suspended as of April 1, 1993, and was to remain in effect pending a resolution of an appeal to the Interior Board of Land Appeals (IBLA) by Pogo Producing Company (Pogo) and Yates Petroleum Corporation (Yates) of the BLM's rejection of Pogo and Yates' potassium lease bid (NMNM 86719) on the same minerals.

Prior to lease issuance, Pogo and Yates had sued the BLM and several of its officers in a Complaint for Temporary Restraining Order, Preliminary Injunction and Permanent Injunction (U.S. District Court, D. New Mexico, CIV 93-0213 JP), arguing that the lease should not be issued to anyone, including IMC, until after the resolution of their IBLA appeal. In order to resolve the suit, the BLM entered into a settlement agreement with Pogo and Yates, agreeing not to issue the potassium lease to anyone until after the resolution of Pogo and Yates' IBLA appeal. The settlement took the form of a Stipulation signed by representatives of Pogo, Yates, and the BLM.

The U.S. District Court Judge James A. Parker subsequently filed a Stipulated Dismissal Order on February 23, 1993, incorporating the Stipulation therein. Accordingly, since the IBLA appeal has not yet been resolved, the BLM's March 5, 1993, lease issuance to IMC was in violation of the Stipulation. Subsequent to the March 5, 1993, lease issuance to IMC, Pogo and Yates filed a

EXHIBIT

B

Motion for Order to Show Cause in CIV No. 93-0213 JP alleging breach of the Stipulation.

An order to Show Cause was filed by the Court on August 10, 1993. Again, in an effort to settle the matter, the BLM entered into a Stipulated Judgment with Pogo and Yates which was filed on October 28, 1993. In the Stipulated Judgment, the BLM agreed to cancel the erroneously issued lease to IMC.

Therefore in accordance with the Stipulated Judgment of October 28, 1993, and the regulation found at 43 CFR 3509.4-2(c), which states that "[i]f a lease is issued improperly, it shall be subject to administrative cancellation," lease NMNM 90581 is canceled in its entirety, effective immediately.

This Decision may be appealed to the Interior Board of Land Appeals, Office of the Secretary, in accordance with the regulations contained in 43 CFR, Part 4, and the enclosed Form 1842-1. If an appeal is taken, your notice of appeal must be filed at the Bureau of Land Management, Roswell District Office, 1717 W. Second, Roswell, New Mexico 88201-2019 within 30 days from receipt of this Decision. Copies of the Notice of Appeal must also be submitted to the Field Solicitor, U.S. Department of the Interior, P.O. Box 1042, Santa Fe, New Mexico 87504-1042 and to the Carlsbad Resource Area Office, P.O. Box 1778, Carlsbad, New Mexico 88221-1778. Within 30 days after filing the Notice of Appeal, you must also file a complete statement of reasons why you are appealing. The appellant has the burden of showing that the Decision appealed from is in error.

If you wish to file a petition (request) pursuant to regulation 43 CFR 4.21 (58 FR 4939, January 19, 1993) for a stay (suspension) of the effectiveness of this Decision during the time that your appeal is being reviewed by the Board, the petition for a stay must accompany your notice of appeal. A petition for a stay is required to show sufficient justification based on the standards listed below. Copies of the notice of appeal and petition for a stay must also be submitted to each party named in this Decision: Mr. Gregory J. Nibert, Hinkle, Cox, Eaton, Coffield & Hensley, P.O. Box 10, Roswell, NM 88202; A.J. Losee, Ernest L. Carroll, Mary Lynn Bogle, Losee, Carson, Haas & Carroll, P.A., P.O. Drawer 239, Artesia, NM 88211-0239; to the Interior Board of Land Appeals, and to the appropriate Office of the Solicitor (see CFR 4.413), at the same time the original documents are filed with the Roswell Office. If you request a stay, you have the burden of proof to demonstrate that a stay should be granted.

Except as otherwise provided by law or other pertinent regulation, a petition for a stay of a decision pending appeal shall show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied;
2. the likelihood of the appellant's success on the merits;
3. the likelihood of immediate and irreparable harm if the stay is not granted; and
4. whether the public interest favors granting the stay.

Sincerely,

Kathy Eatzel
William C. Calkins
Acting State Director
