Application for Exception to Rule 303-A - Surface Commingle Production
Houck Com Well #1, Section 1, T29N-R10W
Blanco Mesaverde Pool, Basin Dakota Pool
San Juan County, New Mexico

Amoco Production Company hereby makes application for exception to NMOCD general rule 303(A) to permit surface commingling of production from the Blanco Mesaverde Pool and Basin Dakota Pool for the Houck Com #1 well. The well is located 1580' FSL and 890' FEL Section 1, T29N-R10W, San Juan County, New Mexico. In support of this application, Amoco states the following:

1. Amoco is the operator of the Blanco Mesaverde Pool underlying the E/2 Section 1, T29N-R10W, San Juan County, New Mexico currently dedicated to the Houck Com #1 well.
2. Amoco is the operator of the Basin Dakota Pool underlying the S/2 Section 1, T29N-R10W, San Juan County, New Mexico currently dedicated to the Houck Com #1 well.
3. The ownership (WI, RI, ORRI) is not common for the pools which are proposed for surface commingling.
4. The Houck Com #1 well is dually completed in the Mesaverde and Dakota formations. The surface commingling of the production will allow the use of a single train of production equipment including a single compressor to reduce operating costs from both formations.
5. The commingled production will be allocated to the individual pools based on annual well testing.
6. The actual commercial value of the commingled production will not be less than the sum of the values of the production from each of the common sources of supply.
7. Approval of this application will otherwise be in the best interest of conservation, the prevention of waste, and the protection of correlative rights.

A copy of this application will be sent to all owners in the well (WI, RI, ORI) by certified mail, return receipt requested. Amoco requests that this application be set for examiner hearing of the Oil Conservation Division on October 19, 1995. In the absence of any objection we request that this matter be taken under advisement.

Sincerely,

J. W. Hawkins

Operator, TENNECO OIL COMPANY			Lease HOUCK		Well No. 1
Unit Letter I	Section 1	Township 29N	Range 10W	County San Juan	
Actual Footage Location of Well: 1580 feet from the South line and 890 feet from the East line					
Ground Level Elev: 5768	Producing Formation Mesaverde/Dakota		Pool E/2 S/2 Blanco Mesaverde/Basin Dakota		Dedicated Acreage: 320/320 Acres

1. Outline the acreage dedicated to the subject well by colored pencil or hachure marks on the plat below.
2. If more than one lease is dedicated to the well, outline each and identify the ownership thereof (both as to working interest and royalty).
3. If more than one lease of different ownership is dedicated to the well, have the interests of all owners been consolidated by communitization, unitization, force-pooling, etc?

☒ Yes ☐ No If answer is "yes," type of consolidation Communitization

If answer is "no," list the owners and tract descriptions which have actually been consolidated. (Use reverse side of this form if necessary.)

No allowable will be assigned to the well until all interests have been consolidated (by communitization, unitization, forced-pooling, or otherwise) or until a non-standard unit, eliminating such interests, has been approved by the Commission.

Case No. 11412
Allocation Method
Houck Com Well #1
San Juan County, New Mexico

Amoco met with the Bureau of Land Management in Farmington on Tuesday November 7, 1995 to arrive at an agreed method of determining an allocation formula for the above referenced well. Both zones in this well have been producing since 1986 and have established production rates; however, the compressor which is currently used for the Mesaverde will be used on both formations when commingled. Since some flush production is expected to occur in the Dakota formation due to compression, we recommend testing the Dakota formation every 6 months until a decline for the Dakota on compression can be established. The ratio of Dakota to Mesaverde production would be established and those percentage allocations would be applied to the total stream and used until the next tests were run. All tests and allocation percentage recommendations would be reported to the Aztec District of the NMOCD and the Farmington office of the BLM. Once declines could be predicted and flush production has receded, we recommend testing on an annual schedule adjusting the allocations accordingly.
