Re: Chesapeake Compulsory Pooling, Lea County, New Mexico, Burnett "1" Well.

Dear sir:

I own several minor parcels both in and outside the unit Chesapeake is dedicating to their proposed Burnett "1" well. Since Chesapeake has completed their drilling division order title work, I would appreciate being informed just which of my properties, size, and what my share of the AFE would be if I should elect to participate in the planned well. If this is provided, and Chesapeake proves the need for their requested unorthodox well location, I will have no opposition to my interests being force pooled, subject to the customary terms of pooling orders.

I will expect Chesapeake to furnish the New Mexico Oil Conservation Division and myself with detailed costs of the well upon completion, whether I elect to participate or not.

Sincerely,

Bill Taylor
