Case 12667

Re: McKinney SWD No. 1

Dear David:

Attached please find charts reflecting casing integrity tests on the above-referenced well. One test successfully pressured the well casing to 2,000 psi. The second test, witnessed by Buddy Hill, tested to 650 psi and is accompanied by the Baker Tool report which includes a diagram of the packer.

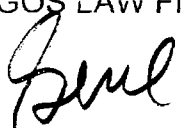

Please give me a call (983-6686) after you have had a chance to review these and are able to advise that the well can be returned to injection status.

Thank you for taking your time on a Friday afternoon to give attention to this matter.

Sincerely,

GALLEGOS LAW FIRM, P.C.
