

BEFORE THE
OIL CONSERVATION DIVISION

NEW MEXICO DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES

APPLICATION OF ENERGEN RESOURCES CORPORATION
FOR POOL EXTENSION, SPECIAL POOL RULES, AND
AMENDMENT OF THE DEPTH-BRACKET ALLOWABLE
FOR THE SAUNDERS-SAN ANDRES POOL, LEA COUNTY, NEW MEXICO

CASE NO. 12838

RECEIVED
OCT 23 11 21 AM '02

AMENDED APPLICATION

Energen Resources Corporation, ("Energen"), through its counsel, hereby makes application to the Oil Conservation Division for an order extending the pool boundaries, establishing special pool rules and increasing the depth bracket allowable and the gas-oil ratio limitation for the Saunders-San Andres pool as established by Order No. R-10091. In support of its Amended Application, Energen states:

1. By Order No. R-10091 dated March 28, 1994, the Division created the Saunders-San Andres pool with horizontal limits comprising the SW/4 of Section 4, Township 15 South, Range 33 East, NMPM, Lea County, New Mexico. The discovery well for said pool was the Charles B. Gillespie, Jr. State Q Well No. 2 completed in the San Andres formation in 1994. The State Q Well No. 2 is located 1760' FSL and FWL (Unit K) of said Section 4. The top perforations in the well are located at 4,956 feet.

2. Energen is the owner and operator of the State Q Well No. 1 completed on June 4, 1991 and located 1980' FSL and 660' FWL (Unit L) of said Section 4 and the State Q Well No. 2 referenced above. Energen acquired the State Q No. 1 and No. 2 wells on December 1, 2000. On January 8, 2002, Energen drilled and completed the State S No. 1 Well located 1980' FSL and 660'

FEL (Unit I) in Section 5, Township 15 South, Range 33 East. All three wells currently produce from a common source of supply within the San Andres formation. Saunders-San Andres Pool.

3. The Saunders-San Andres Pool is currently governed by Division Rule 104.B with development on standard 40-acre spacing and proration units each having a top unit depth bracket allowable of 80 barrels of oil per day and a limiting gas-oil ratio of 2.000 cubic feet of gas per barrel of oil.

4. Energen seeks the extension of the horizontal limits of the Saunders-San Andres pool to include the S/2 NE/4 and the SE/4 of Section 5, Township 15 South, Range 33 East, NMPM in Lea County.

5. Energen also seeks the establishment of special pool rules for the Saunders-San Andres pool increasing the depth bracket allowable for oil production to 160 barrels of oil per day with a limiting gas-oil ration at the current level of 2,000 cubic feet of gas per barrel of oil. Both the State Q No. 1 Well and the State S No. 1 Well are capable of producing at such rates without unnecessarily dissipating reservoir energy, violating correlative rights or reducing the ultimate recovery of reserves. In addition, the State Q No. 2 Well may be capable of producing at such rates.

6. The establishment of special pool rules for the Saunders-San Andres Pool is necessary to effectively and efficiently produce 40-acre proration units in the pool. Authorization of the development of the pool at the increased depth-bracket allowable and at the current gas-oil ratio limitation will increase production from the pool and will result in the recovery of additional reserves that will otherwise go unproduced.

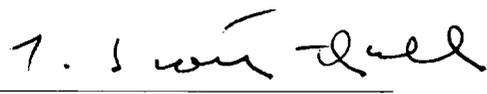

7. Energen further requests the Division establish special pool rules for the Saunders-San Andres Pool effective retroactively to December 1, 2000, being the date it became Operator of

the State Q No. 1 and No. 2 Wells.

8. Granting this application will be in the best interests of conservation, the prevention of waste and the protection of correlative rights.

WHEREFORE, Energen Resources Corporation requests this matter be set for hearing before a duly appointed Examiner of the Oil Conservation Division on March 21, 2002, and that after notice and hearing as required by law, the Division enter its order granting this Application and providing such other relief as deemed appropriate.
