TRANSCRIPT OF HEARING

MR. MACEY: For the purpose of taking a record, I understand we are going to have requests for continuances in Cases 889, 890 and 891. I have a telegram in connection with Case 890, from International Minerals and Chemical Corporation, Mr. R. H. Lane, whereby he says: "International Minerals and Chemical Corporation requests the continuation of Case 890 until the regular June hearing. International's personnel will be unable to show, due to coal show and Eastern coal mine inspection trip."

Mr. Herbert, do you have a statement to make?

MR. HERBERT: Ira Herbert, representing the Southwest Potash Corporation. Southwest Potash Corporation requests a continuance of Case 889.

MR. WEAVER: G. C. Weaver, representing Duval Sulphur, and we request the continuance of Case 891 to the June hearing.

MR. MACEY: I understand that Mr. Moxey has a statement that he would like to put into the record in these cases.

MR. MOXEY: Mr. Fred Moxey, the New Mexico Oil and Gas Association Executive Secretary. I appear on behalf of 48 companies and 30 individuals affected directly and indirectly in this matter. We had a meeting concerning these three cases. We concur in the request for continuance, however, we would like to have an indefinite

continuance. We suggest that a committee be appointed, similar in nature to the committee which was appointed in 1951 by the Land Commissioner, for study of this whole problem. This committee to use such sub-committees as it sees fit, and make recommendations from both industries to the Commission, to guide them in their final determination of these cases.

MR. MACEY: Mr. Weaver and Mr. Herbert, would you have any objection to the formation of a committee similar to what Mr. Moxey proposes?

MR. WEAVER: None whatever, we would agree with it.

MR. MACEY: How about you, Mr. Herbert?

MR. HERBERT: All right with us.

MR. MACEY: Do you have any feeling as to what International would feel?

MR. WEAVER: I don't know.

MR. MOXEY: The Committee in 1951 was made up of two members of the potash and two members of the oil industry, the fifth member being the State Geologist. As I see from the files, in going back over the case, there were several sub-committees under that group, and they did some extensive work that seemed to work out pretty good, and the results have been satisfactory up to this period.

The request for extension in these areas, the extent that they are, we think that probably it is time to renegotiate the thing on another basis here. Probably that size committee, as far as our industry is concerned, that would be all. If it please the Commission, that would certainly be all right. We would be guided by your choice on that.

MR. MACEY: Mr. Weaver, Mr. Moxey requested an indefinite

continuance of the case.

MR. MOXEY: May I correct that. I would like the case continued until the committee has had sufficient time to make recommendations.

MR. MACEY: Why couldn't we continue the cases on the docket and then you could make a report the 28th of June, by mail, if you wanted to. We could read it into the record as the progress of the cases. I don't want to get into something that is hanging in the air. The potash companies are interested in getting it straightened up; inasmuch as International has requested the continuance until June and they are not represented, although I feel that they probably would want to go along with the committee all right, we can't chop them off the docket without some notice.

MR. MOXEY: I would say that would be satisfactory, subject to further continuance.

MR. MACEY: The Commission will appoint a committee and advise everyone in the industry, through our mailing list, as to the membership in the committee and see if we can't solve the problem in that manner. Mr. Weaver, do you have any preference as to the size of the committee?

MR. WEAVER: I don't think it should be too large.

MR. MACEY: Mr. Moxey's was two from potash industry and two from the oil industry, plus a member of this Commission.

MR. WEAVER: I had something to do with the hearings in 1951, I think that was about the right size committee.

MR. MACEY: Thank you.

MR. STANLEY: Concerning the study, I would recommend that the United States Geological Survey be incorporated within this

committee and perhaps to furnish information. During my study I have found they have considerable information.

MR. MOXEY: They were members of the committee, an advisory committee in 1951. I don't think they were allowed to serve in an official capacity. We would welcome having them on there, or any other group as an advisory group.

MR. MACEY: Anyone else have any further statements to make in Cases 889, 890 and 891? If not we will continue the cases until June.

TRANSCRIPT OF HEARING

MR. MACEY: Gentlemen, before we bring up the next case on the docket, I want to take up Cases 889, 890 and 891. Those three cases are known as the potash-oil cases. The Committee which has been appointed in those cases has had a meeting and in each instance of Cases 889, 890 and 891, the operators have asked for a continuance in the cases until the August 17th hearing. Therefore, without objection, we will continue those three cases until the August 17th hearing.
