In Re: Application to Dual Complete  
Amerada Petroleum Corporation's  
State LMT No. 2, Langlie-Mattix  
Field, Lea County, New Mexico.

Attention: Mr. R. R. Spurrier, Secretary-Director

Gentlemen:

Application is hereby made to dual complete our State LMT Well No. 2,  
located in Section 36, Twp. 23S, R-36E, Lea County, New Mexico.

The well is presently producing from the Stuart Sand in open hole between  
3455' and 3600'. Five and one-half inch (5-1/2") casing is set at 3455'.

If permit is granted we propose to produce gas from the Yates formation  
through perforations from 2930' to 3430' with a packer set at 3436'. Oil  
will be produced through the tubing and gas through the casing.

Gas produced from the Yates will be used for lease operations, primarily  
gas lift. El Paso Natural Gas Company is connected at the lease and  
therefore the gas used for gas lift will be utilized and not flared.

Attached is a plat showing the development surrounding the subject well.

It would be appreciated if the case could be set for hearing July 6, to  
coincide with other cases of interest to Amerada.

Yours very truly,

AMERADA PETROLEUM CORPORATION

J. O. Hathaway
