and Gas Interests, State Owned Land

To: Commissioner of Public Lands
State of New Mexico
Santa Fe, New Mexico

Graham
Dear Commissioner:

There is inclosed copy of letter received from the Maryland Casualty Company concerning a bond issued by them on the application of Mr. Al Parker in connection with the drilling of an oil well located in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 15, Township 23 South, Range 5 East of the New Mexico Principal Meridian, Dona Ana County, New Mexico. This area is in Civil Action 1149 by which the United States acquired fee title.

KS
In view of request contained in the letter from the bonding company, it was considered advisable to communicate with you, with the information that this District will interpose no objection to the release of the bond by the State of New Mexico. This information is also being furnished the Maryland Casualty Company at El Paso, Texas.

FOR THE DISTRICT ENGINEER:

Sincerely yours,

H. K. SHADEL

47-82 Bond
State of New Mexico
Al Parker

Mr. Henry K. Shadel, Chief
Real Estate Division
Corps of Engineers
Department of the Army
P. O. Box 1538
Albuquerque, New Mexico

Dear Mr. Shadel:

Effective March 17, 1944 we issued bond No. 531604-C for the sum of \$5,000.00 to the State of New Mexico on the application of Mr. Al Parker in connection with the drilling of an oil well located in Northwest of Southeast quarter on section 15, township 23-D, range 5-EMM, Dona Ana County, New Mexico.

At some later date, the United States Government would not permit Mr. Parker to continue operations on this well and we believe the well was never plugged, but that a cement cover was placed over it. Mr. Parker has not since been permitted to resume operations and, as we have not been able to obtain release from our bond by the State of New Mexico who tell us that they now have no jurisdiction over this property, we have continued to charge Mr. Al Parker for the annual premiums on this bond. Mr. Parker refuses to pay these premiums because he is not permitted to continue operations on the well and we are bound to charge these premiums to him until we are able to obtain a release from the bond.

We recently wrote to Judge William B. Robinson, Special Assistant to the Attorney General, Lands Division, United States Department of Justice, Albuquerque, asking him to whom we should apply in order to obtain release from the United States Government. Judge Robinson recently informed us that the acquiring agency, which in this instance is the Department of the Army, might be able to advise us whether we can obtain such release and accordingly he has furnished us with your address. Will you be so good as to advise us on this matter?

We thank you in anticipation of your prompt advices.

Very truly yours,

/s/ Victor Robinson

El Paso, Texas

ATTENTION: Mr. Victor Robinson, Supervisor

Gentlemen:

Receipt is acknowledged of your letter dated 10 February 1951, concerning bond issued by your company to Mr. Al Parker, State Lessee on lands within the Fort Bliss Antiaircraft Range No. 1 acquired in fee by the Government.

It would appear to this District that since the bond was not made for the benefit of the United States, no action could legally be taken to accomplish the release thereof, and so a release should be obtained from the officials of the State of New Mexico. This District will interpose no objection to the release by the State.

FOR THE DISTRICT ENGINEER:

Sincerely yours,

Department of Oil and Gas
Santa Fe, New Mexico

Dear Sir:

We are surety for an oil well bond for Mr. Al Parker, 1717 North Stanton Street, El Paso, Texas. At the time when the bond was executed, Mr. Parker's residence was 410 South Willow, Pecos, Texas.

The well which was drilled is located in the White Sands Proving Ground area and at the present time is on land owned by the United States Government. We are now interested in securing the necessary papers for effecting our release on this bond. This letter is written with the hope that some one in this department can send the necessary papers to our office so we may have Mr. Parker execute them. Mr. Parker has promised to execute the same.

We have a letter from Corps of Engineers, U. S. Army, Office of the District Engineer located at Albuquerque, New Mexico, stating that a release on this particular bond from the State of New Mexico will not be objected to.

Very truly yours,

N/O

In regard to your inquiry of August 16, 1951, concerning the oil well plugging bond for Mr. Al Parker of El Paso, we regret to inform you that our records do not show this well to have been plugged.

In view of this fact, the bond cannot be cancelled, and under New Mexico law and rules of this Commission, Mr. Parker's only alternative is to either plug the well, subject to the Commission's approval, or continue paying the bond premiums.

Very truly yours,

Jason Kellahin, Attorney

Dear Sir:

This will acknowledge receipt of your letter of September 12, for which we thank you.

Although it may not have been brought to the attention of the Commission, the well in question has been plugged for several years. I hope that this letter will constitute notice to the Commission and that if anything can be done by this writer to effectuate our release on this bond, you will notify me.

In order for you to have a clear picture of the various facts surrounding this well, a copy of an article which appeared in the El Paso Times about June of 1950 is enclosed and a copy of the letter which we received from the Corps of Engineers, U. S. Army.

Very truly yours,

Samuel Smith,
Adjuster

OIL PRODUCTION BLOCKED BY ARMY, DRILLER CHARGES
By Dale Cockerill

Al Parker, El Paso oil and water well driller, charged Monday that the Army was blocking production of oil in the Newman area.

Parker, owner of the Mesialla Valley Drilling Co., 1717 North Stanton Street, said that after completing a well in the Newman area, he had been forced out by Fort Bliss authorities who filed condemnation proceedings to acquire the land as a firing range addition. The action was filed with U. S. District Judge Carl Hatch in Albuquerque, N. M.

The well was spudded in on June 20, 1949, on Section 23, Township 25 South, Range 8 East, in Otero County, New Mexico, about 35 miles northwest of El Paso.

"All the time we were drilling the well the Army didn't say a word, although they were out there every day," Parker said, "But shortly after a Lane Radioactivity Log taken on Sept. 13 gave a favorable report on the well, the Fort Bliss provost marshal forced my crew out on the grounds the land was condemned for a firing range."

Parker said that on Sept. 27 he received permission from Major Gen. John L. Homer, commanding general of Fort Bliss, to obtain passes for his men so the well, located on the southwest quarter of the section, could be completed.

The permission, however, was rescinded two days later by General Homer, Parker said. General Homer ruled he was not "competent to authorize continuation of operations of any nature" in the area. General Homer said that all drilling operations were "subjects for determination" by an order from the court of Judge Hatch.

Parker said his attorney, H. L. McCune, Jr., had such a request for determination pending in the New Mexico Court.

El Paso driller said production was indicated after he was granted 15 days by Judge Hatch on April 3 to complete the well.

HIGH GRAVITY OIL

"I knew I could tell whether or not it would be a possible field in that time," Parker said. "On the 18th of April, when the Army ran us off again, we had our bailer hanging up with oil dripping off it."

Fort Bliss authorities Monday night had no comment to make when questioned regarding Parker's charges.

Samples of oil taken from the well indicated a high gravity oil - testing up to 38 per cent - with high gasoline content, according to Parker.

Depth of the well, which now is plugged, is 576 feet. Pennsylvania lime was encountered at 470 feet, Parker said, showing good proosity from 490 to 600 feet with a variation of 10 to 20 per cent oil saturation. The oil man said there was practically 95 feet of pay strata.

"A shallow well such as this is attractive because even a 20-barrel well will pay for itself in a year due to the low cost of drilling. The State Land Commission of New Mexico will allow 42 barrels per day to be extracted in a well of this depth," Parker said.

Parker estimated that about 200 El Pasoans hold leases in the Newman area, totaling some 30,000 acres. Others interested in the Parker well, known as the Page A-1, and other leases include Tom Mayfield, Jr., John Christie and Dr. Leon Halsted.

El Paso, Texas

Dear Mr. Smith:

RE: Al Parker, \$5,000.00 one-well bond;
NW SE 15-23S-5E; Maryland Casualty Co.

In answer to your letter of September 17, we would like to call your attention to the fact that the well referred to in the enclosed newspaper article is located 28 miles southeast of the well in question. According to our records, the Al Parker well covered by your bond has not been plugged. We are having our oil and gas inspector, Mr. Justin Newman of Artesia, make a further check on the well to determine if it has in fact been plugged.

In order to secure a release on this bond, it will be necessary for Mr. Parker to file a Form C-105 (Well Record), a Form C-102 (Notice of Intention to Plug), and a C-103 (Report on Result of Plugging of Well) with our Artesia office. Until this has been done and the well plugged to the satisfaction of our inspector, the bond cannot be released.

Yours very truly,

Jason Kellahin, Attorney

Mr. Jason Kellahin, Att'y.,
Oil Conservation Commission,
Box 871,
Santa Fe, New Mexico

Dear Mr. Kellahin:

On a recent field trip, I went to the Al Parker well in Section 15-23S-5E., Dona Ana, County. This well has not been plugged. There are two junked 500 barrel tanks, a water well which has not been plugged, and a great deal of junk around the well.

I went on to El Paso to visit Mr. Parker and his attorney, Mr. H. L. McCune, II. Mr. Parker said he does not intend to plug the well. He said that the President had signed a bill, passed by the 82nd Congress, to give him about \$62,000.00 for the well and acreage. When Judge Hatch signs the bill, he expects to be paid, but he still does not intend to plug the well.

If we had a hearing on this within the next 40 days, I should think he might plug it. I feel sure that if we directed the bonding company to plug it he would do it rather than loose his credit rating.

Mr. Parker's address is 1717 N. Stanton, El Paso, Texas.

Very truly yours,

47-82 Bond
State of New Mexico
Al Parker

Mr. Al Parker
1717 North Stanton Street
El Paso, Texas

Dear Sir:

You have heretofore received by registered mail letter from the New Mexico Oil Conservation Commission of 1-9-52 with which was enclosed an official copy of the Oil Conservation Order No. R-126 issued in connection with their case No. 328 as respects plugging of your Al Parker State No. 1 Well, NW SE Section 15, Township 23 South, Range 5 East, N44E, Dona Ana County, New Mexico, and declaring such site to be abandoned.

The order of the Commission instructs that this site be plugged and cleaned up in accordance with directions and established procedure of the Oil Conservation Commission, following which the lease will be terminated and your liability; and our liability as surety, will be terminated. The thirty day term following issuance of the Commission order will expire as of March 1, 1952.

Following publication of the above described order of the Oil Conservation Commission, our representatives have made numerous attempts to contact you personally without results. Further, we have, under date of 2-13-52, written you by registered mail, requesting that you contact us, which letter, although received, has been ignored. Further, we have communicated with your attorney, Mr. H. L. McCune, Jr., who advises that he has not been able to talk to you either and that so far as he knows your failure to take any action upon the Commission order is based upon a plea that the United States Army will not let you on the reservation to conduct plugging operations of the well in question.

We are informed definitely, as is indicated by the Commission order, that the governmental authorities will permit authorized persons to enter the military reservation for the purpose of carrying out the Commission order and we are consequently at a complete loss to understand your plea that this is the only thing holding up your carrying out of the order.

February 26, 1952

We respectfully again direct your attention to the Oil Conservation Commission order No. R-126 and advise that if by reason of your failure to undertake the plugging and clean up work within the specified time, thereby requiring the calling upon us to do so by the Commission as surety on your bond to the State of New Mexico, that we shall look to you to save us harmless from all loss, cost and expense in accordance with your application for bond.

Kindly inform both this office and the Oil Conservation Commission immediately of the time and method or plan to be followed in the plugging and clean up work to be carried out under supervision of the Commission inspectors in compliance with the above described order No. R-126.

Very truly yours,

Dear Mr. Parker:

RE: OCC Case No. 328

We enclose an official copy of Oil Conservation Order R-126 issued in relation to the captioned Case No. 328, which was concerned with the plugging of your Al Parker State No. 1 well, NW SE Section 15, Township 23 South, Range 5 East, NMPM, Dona Ana County, New Mexico.

You will note that date of this order is January 8, 1952, and that the 30-day limit given you for plugging and for the retrieving of any recoverable material extends from said date.

Will you please advise the Commission as to your plans for plugging? It is customary for a representative of the Commission either to witness the plugging of a well, or to make thorough inspection as soon as the plugging has been completed in order that we may be assured that the operator has complied with regulations of this Commission. Approval of the field inspector must be shown to permit acceptance of the C-103 form filed describing plugging procedures.

Dear Mr. Parker: Re: OCG Case 328, Order R-126

The Oil Conservation Commission has received Form C-103 dated March 3, 1952, delineating manner in which your Parker-State No. 1 well, NW SE 15-238-SE, Dona Ana County, has been plugged, as requested by the Commission in its Order R-126.

Mr. L. A. Hanson, oil and gas inspector, District 2, has checked the location and approved the plugging as being in conformity with Commission requirements. It is therefore in order for the Commission to approve release of the following plugging bond:

Al Parker, \$5,000.00 one-well bond;
NW SE 15-238-SE, Maryland Casualty Co.

The bond may be considered eligible for cancellation, then, as of March 3, 1952. A copy of this letter is being sent to Maryland Casualty Company, which was also named in the order, in order that the company may be apprised of the fact that you have complied with terms of the order, and that Case 328 is being closed.
