Re: Extension of Caprock pool for The
Superior Oil Co. State "340" #1-340
Sec. 30-13-32

Dear Bill:

You will receive a letter from Mr. Fred Spears of the Superior Oil Co. in Midland in regard to Form C-123 for their State "340" #1-340, which was filed Feb. 5th. Superior has asked for an extension of the Caprock pool for this well and it was not included in the February hearing, although there was an extension for that pool on the docket, or the March advertisement.

What happened was this-when I came across the Form C-123 in the course of preparing the plats for the nomenclature case, I wanted to include it in the February hearing, as unadvertised, but when I asked Mr. Porter, he said that you had told him you did not want any more extensions of the Caprock field, unless it was necessary. He also told me to hold it until a further study could be made. So I put it away with that notation.

Mr. Spears called from Midland yesterday and asked about this form, wanting to know whether it had been included in the Feb. case. I told him what had happened, and since he said they were very anxious to have the pool extended, and would like to have it advertised for March, I suggested that he write you as soon as possible. I told him that I would also write you explaining why we had done nothing with it.

Yours very truly,

By John Smith

Santa Fe, New Mexico

Attention: Mr. W. B. Macey

Gentlemen:

Please be advised that on February 5, 1955, The Superior Oil Company mailed Form C-123 requesting an extension to the Caprock Field so as to include our New Mexico State #1-340 well located 660' FWL & 1980' FWL, Section 30, T-13-S, R-32-E, Lea County, and producing from the Queen Sand in open hole interval 3053-3070' PBTD. Forms C-104 & C-105 & C-110 have all been filed with the Commission and we have been granted our allowable effective February 3, 1955.

We are advised by your Hobbs District office that the Form C-123 on this well has not been forwarded to your Santa Fe office pending investigation into the possible joining of the Drickey (Queen) & Caprock Fields.

We respectfully request that our application for extension of the Caprock Field to include Superior Oil Company's New Mexico State #1-340 be processed at your earliest convenience.

Yours very truly,

THE SUPERIOR OIL COMPANY,

J. E. Beakey,
General Superintendent.

Re: March 1955 Nomenclature Case 863-A:
Superior Oil Co. State 335 #1-335

Dear Mr. Rieder:

With reference to the above case, the operator states that the gravity of the fluid produced from this well is 41.5 A.P.I. with a Gas-Oil Ratio of 1709-1. Based upon this fact the pool should be classified as an oil pool. The operator plans to conduct further tests.

Yours very truly,

OIL CONSERVATION COMMISSION
