CASE 1120

Hearing Date 10-19-56

My recommendations for an order in the above numbered cases are as follows:

I recommend that this application be approved. Due to the highly lenticular sand characteristics of the Pictured Cliffs the San Juan Basin and particularly in this area we could well denude the applicant the right to recover his just share of the reserves in place under his lease. The fact that the proration formula is 75% to deliverability also aggravates the likelihood of his not receiving his share of Gas. Also, Southern Union has already ~~asked~~ for and received exceptions to R-794. Also we have 80 spacing in the SE with no set pattern.

Re: Application of Gunsite Butte
Uranium Corporation - Non-
Standard Location Tapacito-
Pictured Cliffs Pool

Attention: Mr. Warren W. Mankin

Gentlemen:

This is to request a continuance to a later date of the hearing on the above-captioned matter, which is presently set for consideration before an examiner on August 7, 1956, at 10:00 A.M.

Due to an additional development which is now underway in the area involved in the above-captioned application, it is believed that additional information will become available which would be helpful in considering this matter.

Since Southern Union is possibly interested in this application, I am sending them a copy of this letter.

Yours very truly,

Jason W. Kellahin

Re: Case No. 1120

Gentlemen:

We are in receipt of your notice that the above case will be heard before Warren W. Mankin, Examiner, at Santa Fe on October 19, 1956. The case involves the application of Gunsite Butte Uranium Corporation for an unorthodox gas well location in the Tapacito-Pictured Cliffs Gas Pool, their specific proposal being to drill a well in the NW¹/₄ of Section 3, Township 25 North, Range 3 West, Rio Arriba County, New Mexico, rather than in the NE¹/₄ of said section as contemplated by paragraph (4) of the Special Rules and Regulations for said pool set forth in the Commission's Order No. R-794.

Southern Union Gas Company, as the Commission has been advised, has an existing well located in the SW¹/₄ of the section referred to above, and has numerous other wells located elsewhere in the same field. Generally speaking, it has been our Company's feeling that exceptions to the Commission's well-spacing orders should not be granted except when good and compelling reasons therefor are shown. In the present instance, we are not sufficiently informed to know whether such justifying reasons do or do not exist. We feel confident, however, that before granting the exception requested the Commission will fully inform itself as to all factual matters involved, and we therefore are making no formal protest to the application.

Very truly yours,

A. S. Grenier
