(3) That said water flood project has caused an increase in the producing capacity of the above-described well to the extent that it is now or soon may be capable of producing in excess of the top unit allowable for the Caprock-Queen Pool.

(4) That there is a possibility that waste will occur if the production from the above-described well is curtailed.

(6) That a hearing should be held on January 20, 1959, to determine whether waste will actually result if the production from said well is curtailed.

(7) That in the event the applicant fails to prove that waste will be caused if the production from the above-described well is curtailed, then any oil produced from said well in excess of the normal unit allowable shall be charged against the future allowable for said well.
