Re: Application for 468.15-Acre Eumont Non-Standard Gas Proration Unit, Comprising the SW/4 of Section 30 and the N/2 of Section 31, T-21-S, R-37-E, to be Assigned to Gulf's H. T. Mattern "B" Well No. 10

Gentlemen:

On July 17, 1957, the New Mexico Oil Conservation Commission issued Administrative Order NSP-375 approving a 314-acre non-standard gas proration unit consisting of the N/2 of Section 31, T-21-S, R-37-E, Lea County, New Mexico. Gulf Oil Corporation now respectfully submits application for permission to extend this unit across the section line to include the SW/4 of Section 30, thereby creating a 468.15-acre Eumont non-standard gas proration unit to consist of the SW/4 of Section 30, and the N/2 of Section 31, T-21-S, R-37-E. It is requested that the Commission set this matter for Examiner Hearing at an early date.

The following facts are offered in support of this application:

- (1) The above described 468.15 acres comprise a portion of the Gulf owned and operated H. T. Mattern "B" Lease, which consists of the S/2 of Section 30 and the N/2 of Section 31, all in T-21-S, R-37-E, as shown on the attached plat.
- (2) The proposed unit well, Gulf's Mattern "B" Well No. 10 is located 1980 feet from the west line and 660 feet from the north line of Section 31, T-21-S, R-37-E, Lea County, New Mexico. On May 20, 1957, this well was dually completed so as to produce gas through casing perforations from intervals within the vertical limits of the Eumont Gas Pool from 2695' to 3635' and oil from the Grayburg through casing perforations from 3736' to 3786' in the Penrose-Skelly Oil Pool.
- (3) Gulf Oil Corporation is requesting that the above described acreage be established as a non-standard 468-acre gas proration unit in exception to New Mexico Oil Conservation Commission Order R-520.

August 9, 1957

- (4) By copy of this letter of application, all operators owning interests in the sections involved and all operators within 1500 feet of the proposed unit well are notified of the intent of Gulf Oil Corporation to form the proposed non-standard gas proration unit.

Respectfully submitted,

GULF OIL CORPORATION
