RE: Case No. 1308, Rehearing
on Bisti Spacing

Mr. A. L. Porter, Jr.
Secretary - Director
New Mexico Oil Conservation Commission
Box 871
Santa Fe, New Mexico

Dear Mr. Porter:

We enclose herewith a tabulation of the completion dates and production from certain wells which were the subject of rehearing on Bisti spacing. Mr. Errebo requested that this information be furnished to the Commission. A copy of the tabulation has also been sent to Mr. Errebo.

You will notice that Well 23-15 had considerable fluid production in November. This well is an interior well on the particular lease and most, if not all, of the fluid produced by this well was used on the same lease for frac purposes.

With regards,

Very truly yours,

OS:ms

Case 7308

RECEIVED
NOV 29 1957

DELHI-TAYLOR OIL CORPORATION

CORRIGAN TOWER

DALLAS 1, TEXAS

W. C. SMITH
VICE PRESIDENT

December 26, 1957

Mr. A. L. Porter
Secretary Director
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Mr. Porter:

Delhi-Taylor owns working interest or royalty interest in an extremely large area in San Juan County. Some of this acreage lies in the vicinity of the proposed extension of the Bisti Lower Gallup Pool, namely in Sections 3, 4, 17, 27, 28, 29, 30, 31 and 33 of T 26N, R 11W. Some of this acreage has had wells drilled and completed in the Lower Gallup formation.

Mr. Wallace Tucker, Petroleum Engineer representing Delhi-Taylor Oil Corporation in Dallas, Texas, attended the hearing on September 19-20 and the re-hearing on December 19-20 regarding the application for 80-acre spacing for the Bisti Lower Gallup Pool in San Juan County. Considering the testimony that has been presented at the hearings before the New Mexico Oil Conservation Commission, it is our opinion that it is not feasible to develop the Lower Gallup Formation on 40-acre spacing. We therefore urge that the 80-acre spacing should be adopted.

Yours very truly,

W. C. Smith

Gentlemen:

During the captioned case, Mr. Seth requested completion dates and November 1957 production on Sunray Mid-Continent C-14 and C-21, located in the NE/4 Section 8, Township 25N, Range 12W.

Complying with this request, we have included this information in the following table.

	<u>Spudded</u>	<u>Completed</u>	<u>Nov. 57 Prod.</u>
C-14	6-15-56	7-6-56	0
C-21	8-18-56	9-13-56	0

Culver City, California

VERmont 8-3169

December 13th, 1957

Oil Conservation Commission
State of New Mexico
Santa Fe, New Mexico

Gentlemen:-

It is our understanding that an additional meeting has been called for December 18, 1957 relative to the 40-acre spacing for oil wells in San Juan County, New Mexico. As we expressed in our letter addressed to you prior to the last meeting of September 18, 1957, we are still of the firm conviction that 40-acre spacing should continue in this area. Our Engineers at that time completely satisfied us that one well would not drain 80 acres in the Gallup series and we have had no information since to change our opinion.

You, of course, recognize that the State of Utah has no pro-ration or conservation plan, therefore there are no established allowables. With the completion of the new oil line to California and Jal, New Mexico from the Four Corners area, we feel that it would be possible for a major portion of the capacity of these lines to be taken from Utah. This would decrease the gross take from New Mexico, which would of necessity reduce the taxes paid to your State, and therefore reduce the amount of monies usable for schools and other purposes. In view of this possibility and in order to protect themselves in this market where there is a surplus of oil and oil being hard to sell, perhaps the State of New Mexico should increase the allowables in the Bisti area to protect themselves against Utah taking the major portion of the deliveries to the pipe lines.

We respectfully request that you make no change in the present 40-acre spacing which was established by your order of October 9th, 1957.

Very truly yours,

Jack Sullivan
