Re: Granting of Allowables to
Wells in the Angel's Peak
Gallup Oil Pool

Gentlemen:

Order R-1357 signed on March 20, 1959 by the Oil Conservation Commission reclassifies the Angel's Peak Gas Pool to the Angel's Peak Gallup Oil Pool. All future oil or gas production on these wells will be set out in the regular monthly oil schedule or on supplements to this schedule and your production should be restricted accordingly.

No oil allowables have been granted your wells as of this date, as Gas-Oil Ratio tests have not been received in our office. The wells should remain shut in until you and the transporter have received supplements to the oil production schedule granting them allowables.

Commission Rules also prohibit the commingling of fluids from separate pools in the absence of an order authorizing it. Therefore no Gallup oil should be produced unless it is produced separately into tanks where the production may be measured. It was my understanding that the question of metering the oil production from the Gallup and Dakota Formations before commingling was to be brought up at the pool rule hearing to be held April 22nd.

We are sending a copy of this letter to your oil transporter in order that they may be advised of the above facts. If you have any questions regarding handling of the above matter, please contact me.

Yours very truly
