Administrative Extension -
Order No. R-1451-A

Gentlemen:

Reference is made to your application for extension of time in which to flare or vent low pressure casinghead gas from your Jicarilla 35 Well No. 1 located in the NW/4 SW/4 of Section 35, Township 25 North, Range 5 West, Rio Arriba County, New Mexico, in the Otero-Gallup Oil Pool.

By authority granted me under provisions of Order No. R-1451-A, you are hereby authorized to flare gas from the above described well in exception to Order No. R-1237-A until September 21, 1964.

Prior to that date, please furnish the Santa Fe office of the Commission with a re-evaluation of the possibility of eliminating the flaring or venting of gas from the above described well. Failure to do so will subject the well to cancellation of allowable.

Very truly yours,

A. L. PORTER, Jr.,
Secretary-Director

Subject: Request for Hearing

Mr. A. L. Porter, Secretary Director
New Mexico Oil Conservation Commission
Capitol Annex Building
Santa Fe, New Mexico

Dear Sir:

Pan American Petroleum Corporation Jicarilla Tribal 35 No. 1 Well is located in the NW/4 of the SW/4, T-25-N, R-5-W, Rio Arriba County, New Mexico. This well is located in the proposed extension area to the Oterro-Gallup Oil Pool, as set out in Paragraph 'G' of Case 1690. Consideration of this extension was continued to the July, 1959, regular hearing.

Pan American requests that a hearing be scheduled at the earliest possible date in order that Pan American may show the Commission why the above mentioned well should not be subject to any rule, order, or regulation of the Commission relating to the flaring of produced casinghead gas.

Very truly yours,

GWK:ljj

Subject: Request for Extension to
No-Flare Exception
Administrative Order R-1451-A
Jicarilla 35 No. 1
Otero Gallup Pool
Rio Arriba County, New Mexico

Mr. A. L. Portex, Jr.
Secretary-Director
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Sir:

Pan American Petroleum Corporation respectfully requests an extension to Order No. P-1451-A, dated July 21, 1960, to permit the continued flaring of gas from Pan American's Jicarilla 35 No. 1 in exception to the no-flare provisions of Rule 4, Order No. R-1237-A, Otero Gallup Pool Rules, dated October 19, 1959. Your letter of September 18, 1962, authorized the flaring of casinghead gas from this well until September 21, 1963.

Please refer to our letters of June 13, 1961, File: N-174-986.510.1, and August 17, 1961, File: N-358-986.510.1, in which the economics of selling casinghead gas from the subject well were presented. As shown in these letters, an economic loss would result from the connection of this well to a gas gathering facility.

Attachment No. 1 is a summary of the gas-oil ratio tests taken on the subject well. As can be seen, the gas and oil rates have declined to 59 MCF per day and 18 barrels per day, respectively. This tabulation shows that the producing capacity of this well is definitely on the decline and that the gas reserves are no more and are probably less than the 67,500 MCF as presented in our above mentioned letters. Since the cost to install gas gathering facilities are the same as before, an economic loss would still result for Pan American to collect this casinghead gas.

Therefore, it is requested that Pan American Petroleum Corporation be granted an extension to Order No. R-1451-A, dated July 21, 1960, to permit the continued flaring of gas from the Jicarilla 35 No. 1 in
