Abilene, Texas

Dear Mr. Prentice:

We are enclosing a copy of the transcript of the Examiner Hearing July 28, 1959 and the Hearing De Novo November 18, 1959, of Case No. 1728, the application of Hanson, Waters, and Williamson for a Water Flood Project in the Coyote-Queen Pool, Chaves County, New Mexico. This is in accordance with the request of your attorney, Mr. Howard C. Bratton, Roswell, New Mexico.

Please return the transcripts when you are finished with them.

Very truly yours,

DANIEL S. NUTTER
Chief Engineer

Mr. Dan Nutter
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Dan:

We have today filed an Application for a waterflood project in the Coyote Queen Pool on behalf of C. T. Robertson. It is my understanding that there had been previous hearings on a waterflood project by Hanson, Waters and Williamson in the Coyote Queen Pool which hearings were held in Case No. 1728. There was an Examiner hearing and a de novo hearing.

I would appreciate it if you would send me transcripts of the hearings held in Case No. 1728. I believe that I mentioned this to you in our telephone discussion a few days ago. If you have not already sent the transcripts when this letter arrives, please send them direct to:

Mr. Robert G. Prentice
Room 5
Bacon Building
Abilene, Texas

Your early attention to this matter would be appreciated.

With best personal regards.

Very truly yours,

HERVEY, DOW & HINKLE

Hanson, Waters & Williamson
c/o Mr. Ernest A. Hanson
P. O. Box 852
Roswell, New Mexico

O
Dear Mr. Hanson:

We are in receipt of your letter of December 14, 1959, wherein you have inquired as to the maximum calculated allowable for the HWW-Coyote Queen Water Flood Project.

P
Our original calculation indicated that with the wells which have been drilled, plus the six proposed water injection wells, there would be a maximum total allowable of 490 barrels per day. Your calculation indicates a maximum allowable of 546 barrels per day.

Y
It would appear that the discrepancy between the two figures results from your inclusion of the following wells in the project area, while to our knowledge these are still undrilled locations, just as indicated on the plat which you enclosed with your letter.

P-6	NW/4 SW/4 Section 15
P-7	NE/4 SW/4 Section 15
P-8	SE/4 NW/4 Section 15
P-9	SW/4 NW/4 Section 15

At such time as these wells or any other wells are drilled and completed which would affect the project area allowable and we are so notified by letter, we shall be most happy to make the appropriate adjustments in the allowable.

Very truly yours,

DANIEL S. NUTTER
Chief Engineer

Gentlemen:

Reference is made to Commission Order No. R-1473-A, entered by the Commission November 27, 1959, in Case No. 1728, approving the HWM-Coyote Queen Water Flood Project.

According to our calculations, when all of the authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 490 barrels per day.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate District proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.

Your cooperation in keeping the Commission so informed as to the status of the project and the wells therein will be appreciated.

Very truly yours,

A. L. PORTER, Jr.
Secretary-Director

Re: Commission Order No. R-1473-A
Dated Nov. 27, 1959, in Case No. 1728
H W W - Coyote Queen Water Flood Project

Dear Mr. Porter:

By letter of November 30, 1959, addressed to Hanson, Waters & Williamson, c/o Mr. Ernest A. Hanson, you requested that we report any error in the calculated allowable of 490 barrels under Rule 701-E-3, and keep the Commission offices currently informed at all times of any change in the status of project wells.

We have conferred with our water-flood consultants, Russell Engineering of Abilene, and find that our figure of 546 barrels per day is an increase of 56 barrels over the 490 barrels calculated by the Commission.

Our calculations follow:

<u>40 Acre Tract</u>	<u>No. Wells</u>	<u>Allowable</u>
f	2	56
g	2	56
h	1	42
i	2	56
k	4	84
m	3	70
p	1	42
q	2	56
t	1	42
u	1	42
	<u>23</u>	<u>546</u>

If our calculations appear to be out of line, please let us know.

As requested, we will attempt to keep the Commission fully informed at all times regarding the status of the project and the wells therein.

Yours very truly,

Attention: Mr. A. L. Porter

Dear Mr. Porter:

I am enclosing application for hearing de novo before the Oil Conservation Commission of New Mexico on Case No. 1728, Order No. R-1473, entered by the Commission on September 1.

In behalf of Hanson, Waters & Williamson, applicants, we request that this hearing be set, if possible, for the regular monthly hearing in October.

Yours very truly,

Jason W. Kellahin
