Hobbs, New Mexico

Attention: Mr. H. D. Raymond

Re: Commingling Order
No. R-1599

Gentlemen:

Reference is made to your letter dated December 19, 1963, wherein you request authority to commingle the Blinbry and Tubb oil on your Mittie Weatherly Lease comprising the NW/4 of Section 17, Township 21 South, Range 37 East, Lea County, New Mexico, on the basis of periodic well tests. This production was heretofore authorized to be commingled by Commission Order No. R-1599 dated February 8, 1960, which order required that all production from each pool shall be separately metered prior to commingling. It is our understanding that the production from each of the aforesaid pools is now of marginal nature and that commingling on the basis of periodic tests as now proposed would be in accordance with the Commission "Manual for the Installation and Operation of Commingling Facilities," and would be eligible for administrative approval.

By the authority vested in me under the provisions of Rule 303 (b) of the Commission Rules and Regulations, you are hereby authorized to commingle the production from the aforesaid pools on said lease in the above-described manner. Provided however, that the installation shall be operated in accordance with the provisions of the Commission "Manual for the Installation and Operation of Commingling Facilities"; and provided further, that you shall notify the Hobbs District Office of the Commission at such time as any well in either of the aforesaid pools is capable of top allowable production. In other respects, Order No. R-1599 shall remain in full force and effect.

Very truly yours,

A. L. PORTER, Jr.

Re: Revision of Commingling Order
No. R-1599, TEXACO Inc., Mittie
Weatherly Lease, Blinebry (Oil)
and Tubb (Oil) Pools, Lea County,
New Mexico

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

TEXACO Inc. respectfully requests revision of the subject order to permit commingling on periodic well test basis rather than by the presently approved separate zone metering method in accordance with Section II-1, "Manual for the Installation and Operation of Commingling Facilities". All wells producing from the Blinebry (Oil) and Tubb (Oil) pools on the subject lease are incapable of producing top unit allowable, as indicated on the attached 60-day period production tabulation. Also attached are schematic diagrams of the present battery installation and the proposed installation.

Yours very truly,

H. D. Raymond
Assistant District Superintendent

WPY-jr
