Puckett "B" _____ September 12, 19 60
Well No. 19 is located 2615 ft. from N line and 2615 ft. from EX line of sec. 25
SE/NW Sec. 25 17S 31E NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a test to the Abo formation at a depth of approximately 8000 feet. Surface casing will be 13 3/8" set at about 300 feet and cement will be circulated to the surface. Approximately 4100 feet of 8 5/8" casing will be set and cemented to at least the top of the salt. A 5 1/2" liner will be used for production string and cemented into the 8 5/8", or a complete string of 5 1/2" will be used and cemented to 1000 feet above the shoe. Pipe will be set through the Abo pay.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
