Santa Fe, New Mexico

Attention: Mr. Jason Kellahin

Gentlemen:

Enclosed herewith are two copies of Commission Order No. R-2095, entered in Case No. 2377, approving the H. R. Williamson Seven Lakes-MV Waterflood Project.

According to our calculations, when all of the proposed producing wells have been completed, and when all of the authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 208 barrels per day.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate District proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.
