Re: Order R-207-2, Permission to  
Complete Langlie Federal No.2  
in an Undesignated Paddock,  
Justis Blinebry, Justis Tubb/  
Drinkard Reservoir

Dear Mr. Nutter:

Since making application and receiving the order permitting the triple completion of the Langlie Federal #2 well located in the NW/4 SE/4 Section 14, T-25-S, R-37-E, NMFM, Lea County, New Mexico, the Paddock zone was found to be noncommercial.

As per our telephone conversation of October 10, 1961, I am submitting drawings showing that the above described well was dually completed from the Justis Blinebry and Justis Tubb/Drinkard reservoir. The in-hole equipment installed to affect the dual completion (conventional) is as follows: Baker 415 D Production Packer, set at 5790'. Tubb/Drinkard tubing - 2 3/8" EUE J-55 4.7#; Blinebry tubing - 2 3/8" EUE BT J-55 4.6#.

With the submission of this letter and diagrammatic sketch of the in-hole equipment, I am assuming that we have properly fulfilled our obligation to the State and have permission for this dual completion.

Yours very truly,
