1323, FWL*

Oil Conservation Commission  
State of New Mexico  
P.O. Box 871  
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

Cities Service Oil Company, operator of the Drickey Queen Sand Unit, Caprock Queen Pool, Chaves County, New Mexico, requests administrative approval for the conversion of the following wells:

- Tract 34 Well 1, Unit B, Section 16, T-14S, R-31E
- Tract 36 well 1, Unit P, Section 16, T-14S, R-31E.

It is further requested that approval be given to drill the following injection well:

- Tract 33 Well 2-W, Unit k, Section 16, T-14S, R-31E.

These wells do not comply with requirements for conversion as provided in Rule 701 but are necessary to protect correlative rights with the Phillips Petroleum Company's West Cap Unit. New Mexico Oil Conservation Commission Order R-2336 authorizes 17 wells in the West Cap Unit to be converted simultaneously, thus to cooperate and protect correlative rights it will be necessary for the Drickey Unit to inject into these wells. Cities and Phillips have entered into a line agreement providing for mutually accepted terms along the common lines of the two units. In the event these wells cannot be approved administratively, Cities therefore requests an examiner hearing at the earliest possible date to consider this matter.

The injection wells will be equipped with cement lined tubing and a packer to prevent possible contamination of fresh water zones in the event of a casing leak (see attached schematic diagram).

Copies of this application have been sent to each offset operator and to the State Engineer.

DOCKET MAILED
