O
Dear Sir:

P
Reference is made to Commission Order No. R-3121, recently entered in Case No. 3445, approving the Kersey MCA Waterflood Project.

Injection is to be through the two authorized water injection wells, each of which shall be equipped with tubing and packers, said packers being set as near to the casing shoe above the open hole interval as is practicable.

Y
As to allowable, our calculations indicate that when both of the authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 168 barrels per day when the South-east waterflood allowable factor is 42.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned commission offices by letter of any change in the status of wells in the project area, i.e., when active injection
