Coastal has also advised that their proposed field rules will provide for standard locations for development to be within 150 feet of the center of the NW/4 or the SE/4 of the 160-acre proration unit.

This is to advise that as an operator in the subject field planning the immediate commencement of two wells therein, we support the proposal by Coastal subject to the flexibility of well spacing cited above and strongly recommend its adoption by the Commission.

Very truly yours,

Gentlemen:

Subject: Baum-Wolfcamp Pool
Lea County, New Mexico

We have been requested by Coastal States Gas Producing Company for a waiver in connection with their application for special field rules for the subject pool. It is our understanding that Coastal intends to request 160-acre spacing with proration rules similar to the Vada-Penn with the exception of the 6.77 allocation factor and the well location provision.

This is to inform you that Champlin does not intend to be at the hearing scheduled for December 20 in Santa Fe nor do we intend to object to the application.

Sincerely yours,

Pete Hoffmar
