

FLARED OR VENTED GAS VOLUMES (POOLS)

Southeast New Mexico

Total casinghead production	25,620,000 MCF
Total flared	231,300 MCF
Less than 1%	

Northwest New Mexico

Total casinghead production	971,000 MCF
Total flared	42,750 MCF
Around 4%	

Some of the gas from both areas is from new wells and will probably be connected at some later date.

For the month of August 1970
