Case 4562

Heard 6-28-71

Rec. 7-6-71

Grant Texas O & G. an N.S.L.
in the Indian Basin ~~Stratum~~
+ Morrow. The well is to be
~~located~~ 990 from N & W line
of Sec. 22-22S-23E.

It appears to me that 350 Ae.
can be reasonably be as-
sumed to be productive.

The geology in the area is
quite controversial but I have
used the testimony of all 3
participants to arrive at this
figure.

The data shows me that
~~approx~~ a portion of the NE/4,
most of the NW/4 and a portion of
the SW/4 is productive.
The acreage factor for Proctor
purposes is then .55
