Santa Fe, New Mexico 87501

Case No: 5899
Applicant: Robert P. Wallach, Ray A.
Wallach & Patricia L. House

*File
Case 5899*

Dear Joe:

Pursuant to our recent discussion and your request regarding an additional monitor hole between holes 14 and 15, as previously drilled, you will enclosed herewith find a plat showing the additional monitor hole No. 21, approximately equidistant between holes 14 and 15.

The hole was drilled April 13, at which time it was dry and was checked several days later and again still dry. Monitoring on this hole will be on the same routine as used on holes 1 through 20.

Trusting this meets with your requirements, I remain

Yours very truly,
