CASE NO. 10826

APPLICATION

Applicant states:

1. Applicant is the operator of the oil and gas interests underlying Section 17, Township <sup>21</sup>/~~16~~ South, Range 26 East, NMPM, Eddy County, New Mexico and within the vertical limits of the Catclaw Draw Morrow Gas Pool (the Pool).

2. Applicant proposes to drill the Inexco Federal "17" No. 2 Well (the Well) at a surface location 2300 FSL and 1800 FEL of Section 17 which will be dedicated as the proration unit of the Well and directionally drill the Well to a bottom hole location of 800 FNL and 1400 FEL of Section 17 to a depth sufficient to test the Pool. The special rules and regulations of the Pool require standard location to be no closer than 1650 feet from the outer boundaries of a proration unit.

3. Applicant's proposed bottom hole location is necessitated by geological and subsurface conditions and will enable applicant to recover her fair share of oil and gas from the Pool.

4. Approval of this application is in the best interests of conservation of oil and gas and prevention of waste.

WHEREFORE, Applicant prays that this application be approved in its entirety and for such other and appropriate relief as the Division deems appropriate.

Respectfully submitted:
