Bogle Farms, Inc.
Box 358
Dexter, New Mexico 88230

Dear Sir:

I am contemplating drilling a 2850' deep well in Section 2, T. 18S, R. 28 E. in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ SW $\frac{1}{4}$, further described as 2452' from the west line and 2310' from the south line of Section 2, shown on the enclosed map, which is a part of the "Red Lake" Topographic map with a 1:24000 scale. I am also enclosing a copy of a map that Depco (now DeKalb) sent me which is large scale and shows the wells in the area.

It is my understanding that Bogle Farms, Inc. owns the surface of this section.

I own and operate the four wells shown on the map as the 160 acres colored yellow. My proposed location would come 35' west of the high line so I intend to move 142' east.

The well will be in the middle of an existing road - which is shown on the topo map - so no new roads will be built.

I will add one more tank (10' diameter) to the existing tank battery and tank dike.

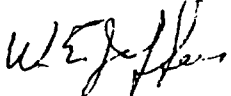

I will use the smallest size location possible so the surface damage will be held to a minimum.

My drilling the well depends on the New Mexico Oil Commission approval of the location. I am to appear in Santa Fe on November 15, in front of the Oil Commission and I need a letter from the surface owner as to what would be satisfactory for surface damages.

Will you please let me know what you would consider satisfactory as payment for surface damages connected with drilling this well.

Your consideration appreciated.

Yours truly,

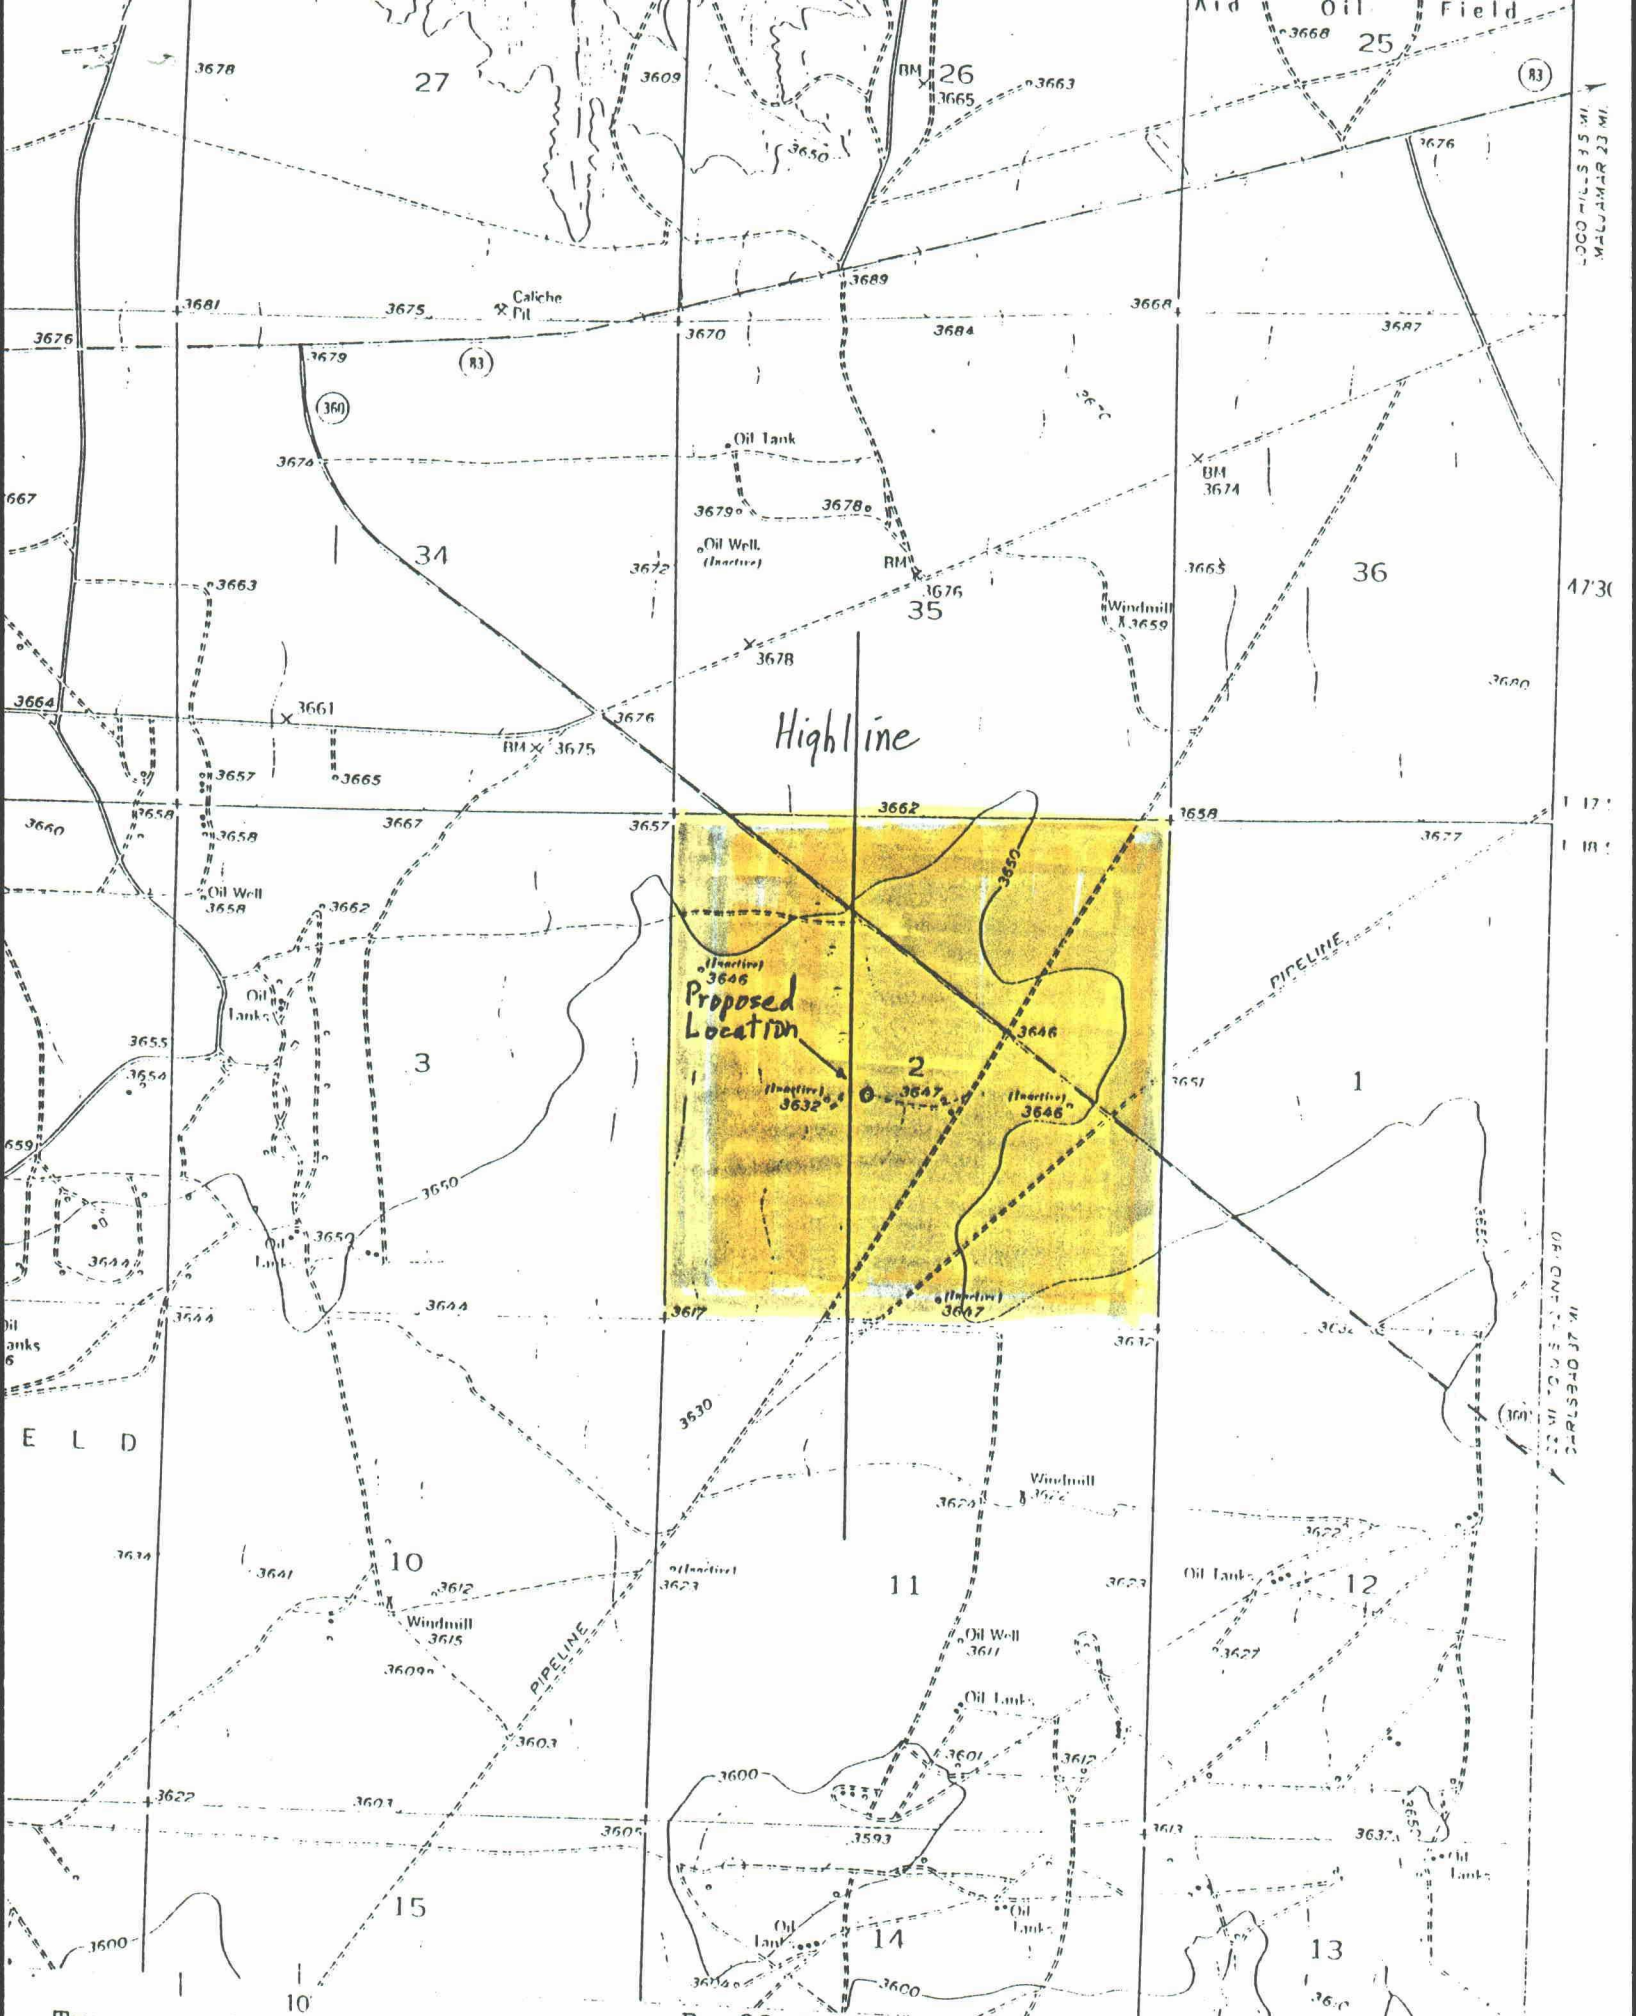

W. E. Jeffers
