Dryx Energy Co.

1" = 1250'

PRODUCTION PENALTY
Re: Order No. R-8913

NMDCD CASE NO. 9802
November 1, 1989
Exhibit No. 8

$$\frac{990 + 990}{1650 + 1650} = .6$$

$$\frac{\text{east-west variance} + \text{north-south variance}}{\text{standard setback} + \text{standard setback}} = \text{PENALTY}$$

$$\frac{0 + 1320}{1650 + 1650} = .4$$
