SEMU NO. 9 & NO. 95

ATTACHMENT TO FORM C-108 NOS. VII, VIII, IX, AND X

VII.

1. Proposed average and maximum daily rate:
4000 BWPD average
5000 BWPD maximum
2. System is closed.
3. Proposed average and maximum injection pressure:
650 psi average injection pressure
maximum pressure not to exceed .2 psi/ft. of depth
4. Injected fluid will be the produced water from Conoco wells in the Warren McKee Waterflood (SEMU and Warren Unit McKee), the Warren Unit, and the Skaggs Pool Waterflood. Analysis of this water and compatibility tests with the San Andres formation are attached.
5. There are no productive San Andres wells within one mile of the proposed well. The attached water analysis from Warren Unit McKee No. 24 (San Andres formation) was made when the well was being tested for a water supply well to the Warren McKee lease in 1972.

VIII. Geological data is as follows: The lithology of the San Andres injection zone consists of dolomite, sandstone, and anhydrite. No known sources of underground drinking water are present in the area of review.

IX. Proposed Stimulation Program: Perforate the wellbore in the San Andres formation. Stimulate well with 15% HCL as necessary.

X. Logs and test data were submitted when the well was initially completed.

Dear Mr. Adams:

We have evaluated water samples from the Warren Unit McKee #24 SWD and the San Andres formation. We find no compatibility problems with commingling these waters.

If you have any questions or require further information, please contact us.

Sincerely,

A handwritten signature in cursive script that reads 'Bill Steiner'.

Application of Conoco Inc. for Authority
to Convert its SEMU Wells No. 9 & 95 to
Saltwater Disposal

Gentlemen:

This letter is to advise you that Conoco Inc. has filed an application with the New Mexico Oil Conservation Division seeking authority to convert its SEMU Wells No. 9 & 95 to saltwater disposal in the San Andres formation. Notification is supplied to you, the surface landowner of the acreage in the SE/4, Section 23, T-20S, R-37E, by certified mail as required by the New Mexico Oil Conservation Division.

This application has requested that it be set for hearing before a Division Examiner on October 5, 1990. As surface landowner you may appear and present testimony, but you are not required to attend the hearing. However, failure to appear at that time and become a part of record will preclude you from challenging the matter at a later date.

Parties appearing in cases have been requested by the Division (Memorandum 2-90) to file a Prehearing Statement substantially in the form prescribed by the Division. Prehearing statements should be filed in Santa Fe by 4:00 p.m. on the Friday before the scheduled hearing.

If you have any further questions please feel free to contact me at (915) 686-6548, 10 Desta Drive West, Midland, TX 79705.

Very truly yours,

Jerry W. Hoover
Regulatory Coordinator

**Application of Conoco Inc. for
Authority to Convert its SEMU Wells
No. 9 & 95 to Saltwater Disposal**

Gentlemen:

In a letter dated September 7, Conoco notified you that an application had been filed with the New Mexico Oil Conservation Division seeking authority to convert its SEMU Wells No. 9 & 95 to saltwater disposal in the San Andres formation. A copy of that application and exhibits were also enclosed with the letter.

In the cover letter, the date of the proposed hearing was incorrectly reported as October 5. Please note that the correct hearing date is October 3, 1990.

If you have any further questions, please feel free to contact me at (915) 686-6548, 10 Desta Drive West, Midland, TX 79705.

Very truly yours,

Jerry W. Hoover
