STATEMENT OF CASE

APPLICANT

Applicant seeks an order increasing the gas:oil ratio in the West Nadine-Blinebry Pool to 10,000:1 (from the current 4000:1), and to cancel overproduction in one of Applicant's wells. As reasons therefor, Applicant states that there has been a general increase in GOR in the pool over the past decade. In addition, Applicant has recompleted a well in a separate Blinebry zone, which has led to increased production, but also increased GOR. In order to produce the wells in the pool at a reasonable, economic rate, the GOR should be increased. The recompleted well inadvertently became overproduced due to a substantially increased production rate and the higher GOR of the well. As a result,

Applicant requests cancellation of overproduction by the McAllister Well No. 4.
