

DESCRIPTION OF EXHIBITS

OPERATORS

A plat of the quarter section where the subject well is located plus all direct and diagonal offsetting quarter sections and showing the wells completed in the Farmington, Fruitland and Pictured Cliffs formations on each quarter section.

The subject well is highlighted with an arrow.

The Pictured Cliffs are shown because 3 of the wells are multiple completions with the Fruitland formation.

OPERATORS AND WELLS

A list of all wells shown on the plat arranged by completion formations. The list includes the operators' names, well names, numbers, and locations.

The asterisks and numbers in the right hand column identify those completions which are downhole commingled completions and the numbers of the orders of approval.

ROYALTY OWNERS

A plat of the southeast quarter of section 13, T29N, R11W showing the royalty ownerships by name, address, and amount of royalty interest.

The interests in the north 80 acres are undivided, and the interests in the south 80 acres are undivided.

DATA SHEET

Completion date of the subject well.

The well has 70 total perforation; 46 in the Farmington zone and 24 in the Fruitland zone. The perforations reflect the amount of pay in each zone.

Therefore, the proposed production split is based on the percent of pay - i.e. Farmington = 65% and Fruitland = 35%.

TEST DATA

Shows the available test history of the subject well.

This indicates the pressures are approximately the same; therefore, there is no danger of either zone being a thief zone.

BLOOMFIELD FARMINGTON OIL POOL

This is a 9-section plat surrounding the subject well showing the location of a portion the Bloomfield Farmington Oil Pool within the area. The subject well is shown.

AZTEC FRUITLAND GAS POOL

This is a 9-section plat surrounding the subject well showing a portion of the Aztec Fruitland Gas Pool within the area.
