TXO Production Corp. 900 Wilco Building Midland, Texas 79701

Re:

Farmout Agreement Lovington North Area Lea County, New Mexico

Gentlemen:

The following letter sets forth the terms and conditions of an agreement between Pennzoil Exploration and Production Company and Chevron U.S.A. Inc. (hereinafter referred to as "Farmor") and TXO Production Corp. (hereinafter referred to as "Farmee"). In consideration of the benefits to accrue to the parties hereto and the covenants and obligations to be kept by Farmee it is hereby mutually agreed as follows:

I. FARMOUT ACREAGE

Pennzoil Exploration and Production Company represents without warranty of title of any kind or character, either express or implied, that it is the record owner of the following oil, gas and mineral leases:

 Oil & Gas Lease dated September 24, 1984, Ronald J. Byers, Lessor, Pennzoil Company, Lessee, insofar as said lease covers S/2 SE/4 of Section 3, T17S-R37E, Lea County, New Mexico, containing 80 acres, more or less, said lease being recorded in Book 377, Page 581, Oil & Gas Records of Lea County, New Mexico. (Pennzoil Lease No. 63995-00)

Chevron U.S.A. Inc. represents without warranty of title of any kind or character either express or implied, that it is the owner of certain contractural rights pertaining to said oil and gas lease as specified in that certain Operating Agreement dated May 1, 1987, between Pennzoil Company, as Operator, and Chevron U.S.A. Inc. as Non-Operator and any amendments thereto.

Said acreage shall hereinafter be referred to as the "Farmout Acreage".

TXO PRODUCTION CORP.

Case No. 9454
8/17/88 Examiner Hearing
Exhibit No. 2

INITIAL TEST WELL

At no cost, risk or expense to Farmor, Farmee agrees to commence or cause to be commenced on or before May 8, 1988, actual drilling of an initial test well (hereinafter referred to as the "Initial Test Well") in search of oil and/or gas at a legal, standard location on the Farmout Acreage and shall continue to drill said well with due diligence and in a prudent manner to a depth sufficient to adequately test to Farmor's satisfaction the Atoka Sands formation as found at the interval 11,600' to 11,615' subsurface in the Pennzoil No. 1 Simmons Estate well located 1980' FWL and 1310' FSL of Section 3-17S-37E, Lea County, New Mexico. Farmee agrees that the exact bottom hole location will be determined in said well by the radius of curvature method using directional survey points taken from total depth drilled to the surface at a minimum of one point per 100 feet measured depth. All directional survey results will be supplied to Farmor.

Said "Initial Test Well" shall be completed without unnecessary delay as a commercial producer of oil and/or gas or as a dry hole within ninety (90) days from commencement. Commencement date of any well drilled under the provisions of this agreement shall mean the date actual drilling is commenced using a drilling rig capable of reaching the formation and depth provided for herein. Completion date shall mean the date the drilling rig is released.

III. <u>SUBSTITUTE WELL</u>

II.

If a formation and/or some other condition is encountered while drilling any well hereunder which renders further drilling by ordinary tools or methods impracticable, Farmee shall have the right at its option for a period of thirty (30) days from the abandonment of said well to commence drilling of a substitute well (hereinafter referred to as the "Substitute Well") at a mutually agreeable location. Said "Substitute Well" shall be drilled to the same depth and in the same manner as provided for the abandoned well and all reference herein to the well abandoned shall apply with equal force and effect to the "Substitute Well" to the extent that the "Substitute Well" will replace the abandoned well for all purposes hereunder.

IV. EARNING

Upon written request within thirty (30) days after completion of said "Initial Test Well" as a producer of oil and/or gas in commercial quantities, and upon Farmee's strict compliance with all the terms and conditions hereof to Farmor's satisfaction, Farmor agrees to assign to Farmee all of its leasehold interest in and to and only to the "Farmout Acreage" contained within the proration unit assigned to the "Initial Test Well". Neither Farmor (Pennzoil Exploration and Production Company and Chevron U.S.A. Inc.) will have an ORI before payout since the lease being farmed out is burdened with a 1/4 royalty. Farmee shall be delivered a 75% net revenue interest. If the exact bottom hole location, as determined by the directional survey method as defined above in Article II, ends up being closer than 250 feet from the proration unit

line, said proration unit line being defined as the outer boundary of the S/2 SE/4 of Section 3-17S-37E, Lea County, New Mexico, containing 80 acres, more or less, then Farmor shall have the option at casing point to back-in for a 40% working interest (20% Pennzoil Exploration and Production Company, 20% Chevron U.S.A. Inc.). If the exact bottom hole location is further than 250 feet from the proration unit line, as defined herein, then Farmor will have no casing point election; but will have the option to back-in for a 40% working interest (20% Pennzoil Exploration and Production Company, 20% Chevron U.S.A. Inc.) at payout, as defined herein, in the "Farmout Acreage" earned by the "Initial Test Well" and all personal property used in connection therewith and production therefrom.

Once the bottom hole location is determined, should said bottom hole location be closer than 250 feet from the proration unit line, as herein defined, then Farmee shall have the option before Farmor exercises its casing point election to go back up the hole and redrill said hole to a bottom hole location further than 250 feet from the proration unit line. If Farmee exercises this option then another directional survey, as stipulated in Article II, will be run by Farmee to determine the subsequent bottom hole location. At casing point or at payout, if Farmee elects to back-in for its working interest, Pennzoil Exploration and Production Company's NRI will be based on a 31.25% NRI, and Chevron U.S.A. Inc.'s NRI will be based on a 43.75% NRI. In the event that any of the leases referred to in Article I expire and Farmee enters into a new lease with the lessor(s) within one (1) year of the expiration of such lease, Farmor shall have the election to join in the lease as to its interest determined on an after payout basis under the terms of the new lease.

Farmor's contingent working interest reserved herein shall be subject to proportionate reduction in proportion to Farmor's acreage contained in the proration unit established for the "Initial Test Well". In the event the interest conveyed to Farmee should cover less than the entire leasehold interest, the contingent working interest reserved herein shall be reduced proportionately to accord with the interest owned by Farmor and Farmor's lands included in the proration unit of the well.

Any assignment earned hereunder will be without warranty of title, either express or implied, and Farmor will reserve all of the leasehold rights below the stratigraphic equivalent of one hundred feet (100') below the total depth drilled in the "Initial Test Well".

In the event Farmee decides to drill a subsequent well to a different formation on the proration unit assigned to the "Initial Test Well, but prior to payout of said well, Farmee shall notify Farmor in writing of such intention and Farmor shall have the right, but not the obligation, to participate in the drilling of and the revenue and production from such subsequent well on an after payout basis regardless of the payout status of the "Initial Test Well". If a well is proposed and Farmor elects not to participate, the provisions of this agreement granting Farmee an optional 40% working interest at payout (20% Pennzoil Exploration and Production Company, 20% Chevron U.S.A. Inc.) shall apply. Should any subsequent well be drilled to a different formation on the same proration unit assigned to the "Initial Test Well" then all provisions and terms of this agreement regarding the "Initial Test Well" bottom hole location, directional survey requirements and casing point election shall apply with equal force and effect to the subsequent well.

This farmout is made subject to all of the terms of that certain Operating Agreement dated May 1, 1987, between Pennzoil Company, as Operator and Chevron U.S.A. Inc, as Non-Operator, and any subsequent amendments thereto, as identified as Exhibit "B" attached hereto, and it is understood that any rights and interests which may be earned pursuant to the terms of said farmout agreement are expressly limited to the S/2 SE/4 Section 3-17S-37E, Lea County, New Mexico. In the event the terms and conditions of the above referenced Operating Agreement are different from the terms and conditions of this agreement, the terms and conditions of this agreement shall control.

V. PAYOUT

Payout shall occur when Farmee has recovered from the net production attributable to the "Initial Test Well" (being gross production less all taxes, royalties, overriding royalties, and other interests payable out of or measured by production from said well existing and of record on or before the first date written above or created hereunder) all of the costs incurred in drilling, equipping, completing and operating of said well. Farmee shall furnish to Farmor as soon as possible after completion of the "Initial Test Well" a statement itemized in reasonable detail showing the cost and expense incurred in drilling, completing, and equipping said well and shall also furnish Farmor on or before the end of each successive quarter following the date of completion of said well with a statement itemized in reasonable detail showing the kind and amount of production from said well during the next preceding quarter, the market value of the production therefrom sold or utilized off the premises during such quarter, the reasonable operating expenses for said well and the amount of net proceeds applicable as a credit toward the hereinabove provided sums. Farmor shall have the right, at Farmor's sole expense, to inspect and audit any and all such statements within a period of two (2) years after payout; however, such audit shall be conducted during normal business Upon receipt by Farmor of written notice stating the payout as herein defined has occurred, Farmor shall have thirty (30) days from the date of receipt of said notice to exercise its option to convert its overriding royalty interest to a working interest as provided above. In the event Farmor's decision is to convert, the effective date of said conversion shall be 7:00 a.m. the day after payout has occurred. payout status of any subsequent well drilled on acreage earned by the "Initial Test Well" in which Farmor has elected not to participate shall be calculated amd maintained under separate accounting, and there shall not be any accumulation of costs from any other wells drilled under this agreement.

VI. TAKE OVER

In the event Farmee elects to plug and abandon any well located on the "Farmout Acreage" in which Farmor is not an active working interest participant or is a non-consenting party, Farmee shall so notify Farmor and Farmor shall have the right to take over at Farmor's sole cost, risk, and expense by notifying Farmee in writing of Farmor's election to do so within twenty-four (24) hours after receipt of notice. If Farmor elects to take over said well, Farmor agrees to pay the value of the well's salvable material and equipment, less the estimated cost of salvaging said material and equipment and Farmor shall, at the time of its notice, become

liable for the rig time costs. In the event such completion or deepening attempt does not result in a commercially productive oil and/or gas well, Farmor shall plug and abandon the well at its sole cost, risk, and expense. If such completion and/or deepening results in a commercially productive oil and/or gas well, Farmor shall own the well, the operating rights, and working interest therein, the material and equipment in and pertaining thereto and the production therefrom. If the well taken over by Farmor is the "Initial Test Well" then except for the duty of Farmor to pay for the well's salvable material and equipment as discussed above and the obligations pursuant to Article X, this Agreement shall terminate upon receipt by Farmee of Farmor's election to take over the "Initial Test Well".

VII. TESTING AND WELL INFORMATION

Farmee agrees to keep an accurate log of each well, to drill the same in a good faith effort to discover oil and/or gas, and to test adequately to Farmor's satisfaction all oil and gas shows encountered. Farmee will specifically comply with all requirements set out in Exhibit "A" entitled "Geological Requirements" attached hereto and made a part hereof for all purposes. Any notices and correspondence other than as required in Exhibit "A" attached hereto shall be sent to the above captioned letterhead address, Attention: Land Department.

VIII. <u>ASSUMPTION OF LEASE OBLIGATIONS</u>

During the term of this agreement, Farmee shall assume all obligations of Lessee, express or implied, under the provisions of the lease subject to this agreement and Farmee further agrees to indemnify and hold Farmor harmless from any and all claims and demands of all persons which have as their basis the breach of Lessee's obligations under said lease insofar as they relate to the interest covered by such assignments. Farmee agrees at its expense to effect settlement with surface owners for damages, if any.

Farmor agrees to pay any delay rentals which may become due on the "Farmout Acreage" during the term of this agreement and Farmee agrees to reimburse Farmor for one hundred percent (100%) of such payments within thirty (30) days of receipt of Farmor's billing. Farmor shall never incur any liability for any failure to make, or mispayment of delay rentals.

Any shut-in payments to be made on any well completed as a gas well shall be Farmee's responsibility, and in the event it is necessary that such shut-in payments be made, Farmee shall furnish Farmor evidence that such payments were timely made. Farmee agrees to notify Farmor before shutting-in any gas well drilled hereunder whether such shut-in occurs before or after initial production from a well.

Farmee agrees to render and pay all ad valorem taxes, if any as to any acreage earned hereunder and all equipment appurtenant thereto. In the event oil and/or gas is produced from said land or lease, Farmee agrees to pay to the royalty owners all royalties on account thereof and shall save,

indemnify, and hold Farmor harmless from all liability on account of obligations accruing to the royalty owners and account of the production of oil or gas from said land as to the depth earned under the terms of this agreement.

Any assignment made to Farmee under the terms of this agreement shall provide that in the event Farmee should elect to surrender, let expire, abandon or release (by failure to pay rentals or otherwise) all or any part of Farmee's rights in the "Farmout Acreage", or any part thereof, Farmee shall notify Farmor not less than ninety (90) days in advance of such surrender, expiration, abandonment or release, and if requested within thirty (30) days to do so by Farmor, Farmee shall immediately reassign to Farmor all rights previously conveyed to Farmee under the terms of this agreement. If production from any lease covered hereby ceases at any time during the primary term thereof, and Farmee or any assignee of Farmee's is then operating such lease, Farmee shall promptly notify Farmor thereof in writing within sixty (60) days.

IX. <u>ASSIGNMENT</u>

It is expressly understood that the terms of this agreement shall be binding upon the parties hereto, their heirs, successors and assigns, provided, however, that this agreement shall not be assigned by Farmee without first obtaining Farmor's written consent thereto.

X. <u>INDEMNITY AND APPLICATION OF LAWS</u>

All operations which may be conducted by Farmee hereunder, whether drilling or otherwise, shall be conducted at Farmee's sole risk and cost and Farmor shall not be subject to any obligation or liability whatsoever in connection therewith unless otherwise specifically provided herein. Farmee agrees to indemnify and save Farmor free, clear, and harmless from any claim, demand, or lien asserted by any person or persons therefor, including, but not limited to, those resulting from injury to, death of, or loss or destruction of property of any person or persons and to promptly pay all bills for labor, goods, equipment, facilities, services

or other items as they occur. Farmee shall be free and unfettered to sell, assign, mortgage, place liens upon or otherwise encumber any acreage or interest therein, from the farmout, the production therefrom or any equipment or facilities thereon which has been assigned to Farmee and which is owned by Farmee but such right of encumbrance shall not extend to any acreage, production, equipment or facilities not owned or earned by Farmee. Farmee shall defend, indemnify, and hold Farmor harmless from and against all such claims and lien. Nothing herein shall be construed to create a partnership, a joint venture, an association, a trust, a mining partnership, or other entity, nor to constitute Farmee the agent of Farmor.

This agreement is subject to all applicable Federal, State and local laws, and regulations and all development and operations hereunder shall be conducted in conformity therewith. Farmee shall defend, indemnify and hold Farmor harmless from and against any and all liabilities, demands or causes of action arising out of Farmee's failure to comply with said laws, rules, regulations, and orders. Further to nondiscrimination, Farmee agrees in the performance of this agreement and in the conduct of all of its operations hereunder to comply with all the terms and provisions of Section 202 (1) to (7) inclusive of Executive Order 11246, the terms of which are incorporated by reference in this agreement. Farmee expressly agrees to timely comply with all filing procedures, rules and regulations promulgated by either State or Federal agencies under the auspices of the Natural Gas Policy Act of 1978 to the end that the production from any well drilled under this agreement shall be entitled to the maximum lawful price permissible under the NGPA or its successor statutes, rules and regulations.

XI. <u>CURATIVE WORK</u>

Farmor shall not be obligated to perform any curative work with respect to titles involved in the "Farmout Acreage" or furnish any abstracts or other material other than such contract or title papers as Farmor now has in its possession; however, any curative work accomplished by Farmee shall inure to the benefit of Farmor and Farmor shall promptly be furnished copies of any instruments and/or legal opinions obtained by Farmee in connection with the "Farmout Acreage".

XII. <u>INSURANCE</u>

As to all operations provided for herein, Farmee shall secure and maintain Workmen's Compensation & Employer's Liability Insurance, in accordance with applicable state laws, covering the employees of Farmee engaged in operations hereunder.

Farmee shall provide certificates evidencing such insurance to Farmor upon Farmor's request. Farmee shall require its contractors and sub-contractors working and performing services on the premises covered hereby to comply with the Workmen's Compensation laws of the State of New Mexico and to carry such other insurance and in such amounts as Farmee shall deem necessary.

XIII. <u>PURCHASE OF PRODUCTION</u>

Any assignment earned hereunder shall reserve unto Farmor the following rights and options:

The option at any time and from time to time by not less than thirty (30) days advance written notice to purchase all or any part of the oil (which terms as herein used shall include distillate, condensate, and other liquid hydrocarbons as well as crude oil) produced and saved from the "Farmout Acreage" under

the Division Order terms prevailing in the field at the time of purchase. The price payable for the oil contained in a delivery thereof shall not be less than posted well prices generally prevailing at the time of delivery for oil of like grade and gravity produced in the same pricing area to be determined in accordance with the pricing practices followed from time to time by the principal purchasers of crude oil posting well prices; therefore, when varying well prices are posted, the well price posted and being paid for the largest quantity of oil produced in such pricing area shall be considered the prevailing posted well price.

- 2. The option to purchase gas produced and saved from the "Farmout Acreage" at the price and under the terms prevailing in the area at the time of purchase. In the event Farmee should receive a bonafide offer for the purchase of its gas from a purchaser other than Farmor, which Farmee is willing to accept, Farmee shall notify Farmor in writing of such offer, furnishing Farmor with the terms thereof, and Farmor shall have the option within thirty (30) days of the receipt of such notice and information to either:
 - A. Elect to purchase Farmee's gas at terms equal to or better than those contained in the offer which Farmee has received, or
 - B. Furnish another purchaser who will purchase such gas at terms equal to or better than the offer which Farmee has received, and to require the Farmee to sell the gas to the purchaser provided by Farmor.

Should Farmor not exercise either Option A or B above within thirty (30) days from receipt of Farmee's notice, Farmee may at its option within ninety (90) days thereafter, enter into a contract to sell its gas to such purchaser in accordance with said bonafide offer. If, however, Farmee does not enter into such contract with its purchaser (or, if, for any reason, Farmee does not make or discontinues making a sale of gas pursuant to such contract), then Farmor's right to make the above election and Farmee's obligation to sell gas to Farmor or to the purchaser provided by Farmor hereunder shall be reinstated subject to the terms and conditions set forth above. Should Farmor exercise Option B or should Farmee enter into a contract with its purchaser as provided for in the above sentence, Farmor shall have the right to purchase all by-products removed from such gas, including but not limited to all liquefiable hydrocarbons and sulfur. An offer to renew or extend a contract covering existing sales of gas or to enter into a new contract with the existing purchaser shall fall within the offers which are subject to the terms and conditions of this subparagraph.

It is understood and agreed that the rights and options to purchase hereby reserved may be assigned by Farmor at any time, at all times and from time to time without limitation.

XIV.

WINDFALL PROFIT TAX

Each party hereto expressly agrees to bear and pay one hundred percent (100%) of any excise or severance tax accruing on its share of production from the area subject to this agreement by virtue of the Crude Oil Windfall Profit Tax of 1980 (WPT); specifically as provided in the WPT on the excess of the actual selling price (the "removal price") over the adjusted base price with a deduction for severance taxes on the Windfall Profit. Each party recognizes that the Internal Revenue Service is responsible for all regulations pertaining to the WPT and that these regulations may be amended from time to time, and each party expressly agrees to meet all responsibilities it may have under the WPT in a timely manner. For instance, any information required to be certified to a first purchaser by a producer or operator shall be submitted by such certifying party in a manner sufficient to permit compliance with the WPT and its accompanying regulations.

Should a certifying party such as a producer or operator fail to timely submit such information and/or fail to submit all information necessary to permit such compliance and as a result thereof any other party hereto incurs any liability under said WPT and/or said regulations, such certifying party shall indemnify and hold such other party free and harmless from any and all liability so incurred. However, if such certifying party does not possess the information required for a timely and proper certification to a first purchase or a producer but any other party or parties hereto does possess such required information, such information shall be furnished to the certifying party promptly upon its written request therefor. The certifying party shall be relieved of and freed from the indemnification above provided as to any party or parties hereto who fail to provide promptly such required and requested information to such certifying party.

XV.

MISCELLANEOUS

It is understood that time be of the essence of this agreement and no provisions hereof shall be modified or waived except in writing.

ACCEPTANCE

This farmout letter agreement shall not be binding upon Farmor until Farmee has evidenced its acceptance in the space provided below and returned a fully executed copy to the letterhead address above by May 4, 1988. If Farmee fails to execute and return this agreement in a timely manner, Farmor shall have the option to declare this letter null and void. This instrument may be executed in a number of counterparts, no one of which needs to be executed by all parties, and shall be binding upon all parties, their heirs, successors and assigns who have executed such counterpart with the same force and effect as if all parties had signed the same document.

Very truly yours,

S/2 SE/4 Section 3, T-17-S, R-37-E

Lea County, New Mexico Penron Byers #1 Well

Gentlemen:

TXO Production Corp. accepts the above captioned Farmout Agreement, subject to Pennzoil's and Chevron's acceptance of the following amendments to that Farmout Agreement:

- 1. The following language shall be added to the Farmout:
 "There is no obligation upon Operator to commence a well under the terms of this agreement, and the only penalty for failure to commence such well, or to drill to the objective depth and complete the test well as a well capable of commercial production, will be the forfeiture of all rights hereunder and the automatic reversion to Assignor of the interest hereby assigned effective as of the date hereof."
- Page 2, IV. Earning the first sentence shall read: "Upon written request within thirty (30) days after completion papers have been filed on said 'Initial Test Well'...."
- 3. Page 3, 5th Paragraph, line 8, "Farmee" shall be amended to read "Farmor".

Pennzoil Company Chevron U.S.A., Inc. Page Two May 2. 1988

> Re: Penron-Byers #1 Well 3/2 SE/4 Section 3 T-17-S, R-38-E Lea County, New Maxico

Gentlemen:

Pursuant to our telephone conversation of yesterday's date, I have attached the directional surveys run by DIG on the Penron-Byers #1 Well. We are currently 314 from the leasaline according to the surveys. As we discussed yesterday, the Farmout Agreement in Paragraph II "Initial Test Well" specified that directional survey points shall be taken at a minimum of one point per 100' measured depth, however, some of our points are greater than 100'. If the manner in which TXO has been taking the directional survey points is acceptable by Pennsoil, please so indicate by signing below and returning one copy to me by telecopier if possible. We are sorry for any inconvenience that may have been caused. Upon receipt of this signed letter, I will notify Chevron and have them execute at the bottom of this letter. We appreciate your cooperation in this matter and your early response.

This form is to be filed with the appropria. District Office of the Commission not later than—ays after the completion of any newly-drilled or deopened well. It shall be accompanied by one copy of all electrical and ralio-activity logs run on the well and a summary of all special tests choducted, including drill stem tests. All depths reported shall be measured depths. In the case of directionally drilled wells, true vertical depths shall also be reported. For multiple completions, Items 30 through 34 shall be reported for each zone. The form is to be filed in quintuplicate except on state land, where six copies are required. See Rule 1105.

OF THE STATE OF NEW MEXICO

IN THE MATTER OF THE APPLICATION OF TXO PRODUCTION CORP. FOR AN UNORTHODOX OIL WELL LOCATION, LEA COUNTY, NEW MEXICO

CASE NO. 9454

AFFIDAVIT OF MAILING

•

STATE OF NEW MEXICO)
: ss.
COUNTY OF EDDY)

PATTI WIER, being first duly sworn, upon oath, states that the notice provisions of Rule 1207 of the New Mexico Oil Conservation Division have been complied with, that Applicant has caused to be conducted a good-faith diligent effort to find the correct addresses of all interested persons entitled to receive notice, and that pursuant to Rule 1207, notice has been given at the correct addresses as provided by such rule.

In support hereof, affiant states that a true copy of the Application of TXO Production Corp. for an Unorthodox Well Location, Lea County, New Mexico, was mailed in accordance with Rule 1207, to any offsetting operator or owner of undrilled leases bordering Applicant's spacing unit on a common boundary or unit corner, in a securely sealed, certified mail, return receipt requested, postage prepaid envelope, addressed to the following named party:

TXO PRODUCTION CORP.

Case No. 9454
8/17/88 Examiner Hearing
Exhibit No. 4

Pennzoil Company
P. O. Box 2967
