STATEMENT OF CASE

APPLICANT:

Conoco Inc. seeks approval for a high angle/ horizontal directional drilling pilot project in the Basin Fruitland Coal Gas Pool. The proposed project is the W/2 of Section 18, T32N, R11W, San Juan County, New Mexico.

Conoco proposes to utilize its existing FC Fed Com No. 8 Well as an observation well and replace it with the FC Fed Com No. 8R Well to be located at a standard surface location in the SW/4 and to then be drilled vertically to a kickoff point of approximately 2885 feet TVD and then drilled horizontally in a northwesterly direction within a drilling producing window in the W/2 of Section 18 such that its surface location and producing interval will be no closer than 790 feet to the outer boundaries of the spacing unit.

Conoco seeks to drill this high angle well in a south to north direction in order to intersect substantially more of the coal cleats than a vertical well might thereby increasing the opportunity for a more productive well.

PROPOSED EVIDENCE

APPLICANT

WITNESSES	EST. TIME	EXHIBITS
Reed Meek (geologist)	20 min.	7
Billy Goodwin (petroleum engineer)	20 min.	6

PROCEDURAL MATTERS

None applicable at this time.
