MEMO NO. 7-86

MEMORANDUM

TO: OPERATORS OF PRORATED GAS WELLS  
FROM: R. L. STAMETS, DIRECTOR *RLS*  
SUBJECT: SUSPENSION OF RECLASSIFICATION

I have instructed the Division's Gas Proration Manager to suspend the gas well reclassification which would normally occur at the end of the first trimester of the new gas proration period. This is being done as many wells are shut-in or are severely restricted due to current market conditions and wells otherwise capable of non-marginal production could be reclassified marginal.

It has been suggested that a continuing suspension should be considered because of these market conditions. Conversely, it has been suggested that reclassification should be allowed to proceed in order that allowable may flow to those operators choosing to participate in the spot market. The argument put forth is, that if the spot market is made available to producers and they choose not to participate, have not their correlative rights been protected (an opportunity to produce having been provided) and should not their share of the pool allowable be given to those who do choose to sell.

Your response to this issue will be appreciated and will be shared with the Gas Advisory Committee now looking at gas proration issues. Please submit any response in writing by July 18, 1986.
