

APPLICATION FOR AUTHORIZATION TO INJECT

State "B" #2 - Unit M Sec. 6-T17S-R34E

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? yes no
- II. Operator: Yates Petroleum Corporation
- Address: 207 S. Fourth Street, Artesia, New Mexico 88210
- Contact party: Albert R. Stall Phone: (505) 746-3558
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project _____.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- * VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- * VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- * X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- * XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification
- I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
- Name: Albert R. Stall Title Engineer
Signature: Albert R. Stall Date: 6-13-86
- * If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal. Compensated Neutron Log and Dual Induction Laterolog were submitted by the original operator, H.L. Brown Jr., to the N.M.O.C.D. Dist. Office-Hobbs
- DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate Division

III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.
- (1) The name of the injection formation and, if applicable, the field or pool name.
 - (2) The injection interval and whether it is perforated or open-hole.
 - (3) State if the well was drilled for injection or, if not, the original purpose of the well.
 - (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
 - (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

FORM C-108 Supplement

State "B" #2

I. Purpose:

To re-enter this well and complete in the Queen formation as a salt water disposal well. Planned injection interval is 3770-3810'.

II. The Operator is Yates Petroleum Corporation
207 South Fourth Street
Artesia, New Mexico 88210

Attn: Albert R. Stall

III. Well Data:

See attached well data sheet.

V. Lease ownership map attached (Midland Map Co.) with a scale of:
1" = 2000'.

Well and lease information posted through January 1, 1986. Map has a two-mile radius circle and a one-half mile radius circle around the subject well.

VI. There are three wells, including the proposed disposal well, within the area of review, as shown on the attached map. All available data concerning the three wells is included in the attached tabulation and schematics.

VII. Data on proposed operations:

(1). The proposed average rate of injection is 2000 barrels per day, and the estimated maximum is 5000 barrels per day. The estimated total volume of fluid to be injected is 18.25×10^6 bbls.

(2). The system will be closed.

(3). The average injection pressure will be 0 to 758 PSIG.

(4). The source of injection fluid will be produced water from the following wells:

a. Hoover "ADR" St. #1
1650' FSL & 990' FEL
Sec. 1, T.17S., R.33E.
Queen Formation—3767-3774'
See attached analysis.

b. Hot Toddy "ABQ" St. #1
1980' FNL & 1500' FEL
Sec. 18, T.16S., R.34E.
Upper Wolfcamp Formation—10051-10056'
See attached analysis.

c. Vacuum North "ADJ" St. Comm #1
833' FNL & 660' FWL
Sec. 34, T.16S., R.34E.
Permo Penn Formation—10185-10756'
See attached analysis.

- (5). Chlorides from water produced by the above-mentioned wells range from 61,334 to 180,000 parts per million. The subject well is not yet completed in the proposed injection zone and therefore, a water analysis is not available. However, water chlorides are expected to be very similar to the produced water of the Hoover "ADR" St. #1 and injection compatibility appears acceptable.

The proposed injection zone is not included within the vertical limits of any established pool.

VIII. Geological data:

Injection zone: 3770-3810'

Queen (Permian)

Sandstone: gray, very fine grain, subangular to subrounded, good intergranular porosity, friable

Dolomite: some dolomite cement

The underground source of drinking water in this area is Ogallala formation of Tertiary age, the base of which is estimated at 250' at the location of the proposed disposal well. There are no other probable fresh water aquifers in this area.

- IX. The planned completion program is to selectively perforate and stimulate with acid within the proposed injection interval 3770-3810'.
- X. Electric logs have been submitted to the NMOCD, Hobbs District Office by the original operator, H.L. Brown, Jr.
- XI. There are five water wells within a one-mile radius of the subject well. Location and status are as follows:

<u>LOCATION</u>	<u>STATUS</u>
Unit H Sec.6,T.17S.,R.34E.	Open well-inoperative-no sample available
Unit M Sec.6,T.17S.,R.34E.	Capped well-inoperative-no sample available
Unit B Sec.7,T.17S.,R.34E.	Capped well-inoperative-no sample available
Unit F Sec.12,T.17S.,R.33E.	Waterflood supply well-sample analysis attached
Unit H Sec.12,T.17S.,R.33E.	Open well-inoperative-no sample available

- XII. Available geological and engineering data have been examined and no evidence of open faults or any other hydrologic connections between the disposal zone and any underground fresh water aquifers have been found.

XIII. The offset operators listed below have been furnished a copy of this application by certified mail.

Mobil Producing Texas &
New Mexico, Inc.
P.O. Box 633
Midland, TX 79702
ATTN: Kent M. Johnston

Southern Union Expl. Co.
Suite 400
1217 Main St.
Dallas, TX 75202
ATTN: Craig Nielson

H.L. Brown, Jr.
P.O. 2237
Midland, TX 79702
ATTN: Peter Courtney

Tenneco Oil Company
7990 IH 10 West
San Antonio, TX 78230
ATTN: Rex Bourland

Amoco Production Company
P.O. Box 3092
Houston, TX 77253
ATTN: C.L. Raper

The surface owners listed below have been furnished a copy of this application by certified mail.

State of New Mexico
Commissioner of Public Lands
P.O. Box 1148
Santa Fe, New Mexico 87504-1148

Grazing Lessee:
Williams & Son Cattle Co.
Billy Williams
P.O. Box 30
Maljamar, New Mexico 88264

Additional data submitted:

to surface.

Injection interval3770 feet to 3810 feet
(perforated or open-hole, indicate which) perforated

*8 5/8" intermediate casing was shot and pulled from 1250' when the well was plugged.
5 1/2" 17# K-55 casing will be run inside the 8 5/8" casing from 4450' to surface.
 Cement behind the 5 1/2" casing string will be circulated to surface. The Queen
 interval 3370' to 3810' will be selectively perforated and stimulated for injection.
 Stimulation is expected to consist of a 2500 gallon acid job.

Tubing size 2 7/8" lined with plastic (material) set in aGuiberson Uni VI nickel-plated (brand and model) packer at 3700 feet

(or describe any other casing-tubing seal).

Other Data1. Name of the injection formation Queen2. Name of Field or Pool (if applicable) None3. Is this a new well drilled for injection? Yes NoIf no, for what purpose was the well originally drilled? oil and/or gas test4. Has the well ever been perforated in any other zone(s)? List all such perforated intervals and give plugging detail (sacks of cement or bridge plug(s) used) No - Drilled & Abandoned5. Give the depth to and name of any overlying and/or underlying oil or gas zones (pools) in this area. Vacuum Grayburg San Andres - approximate depth is 4650'N.W. Vacuum Wolfcamp - approximate depth is 10950'N.W. Vacuum Penn - approximate depth is 11750'

TABULATION
State "B" #2
Wells Within Area of Review

Sec. 1, T.17S., R.33E.

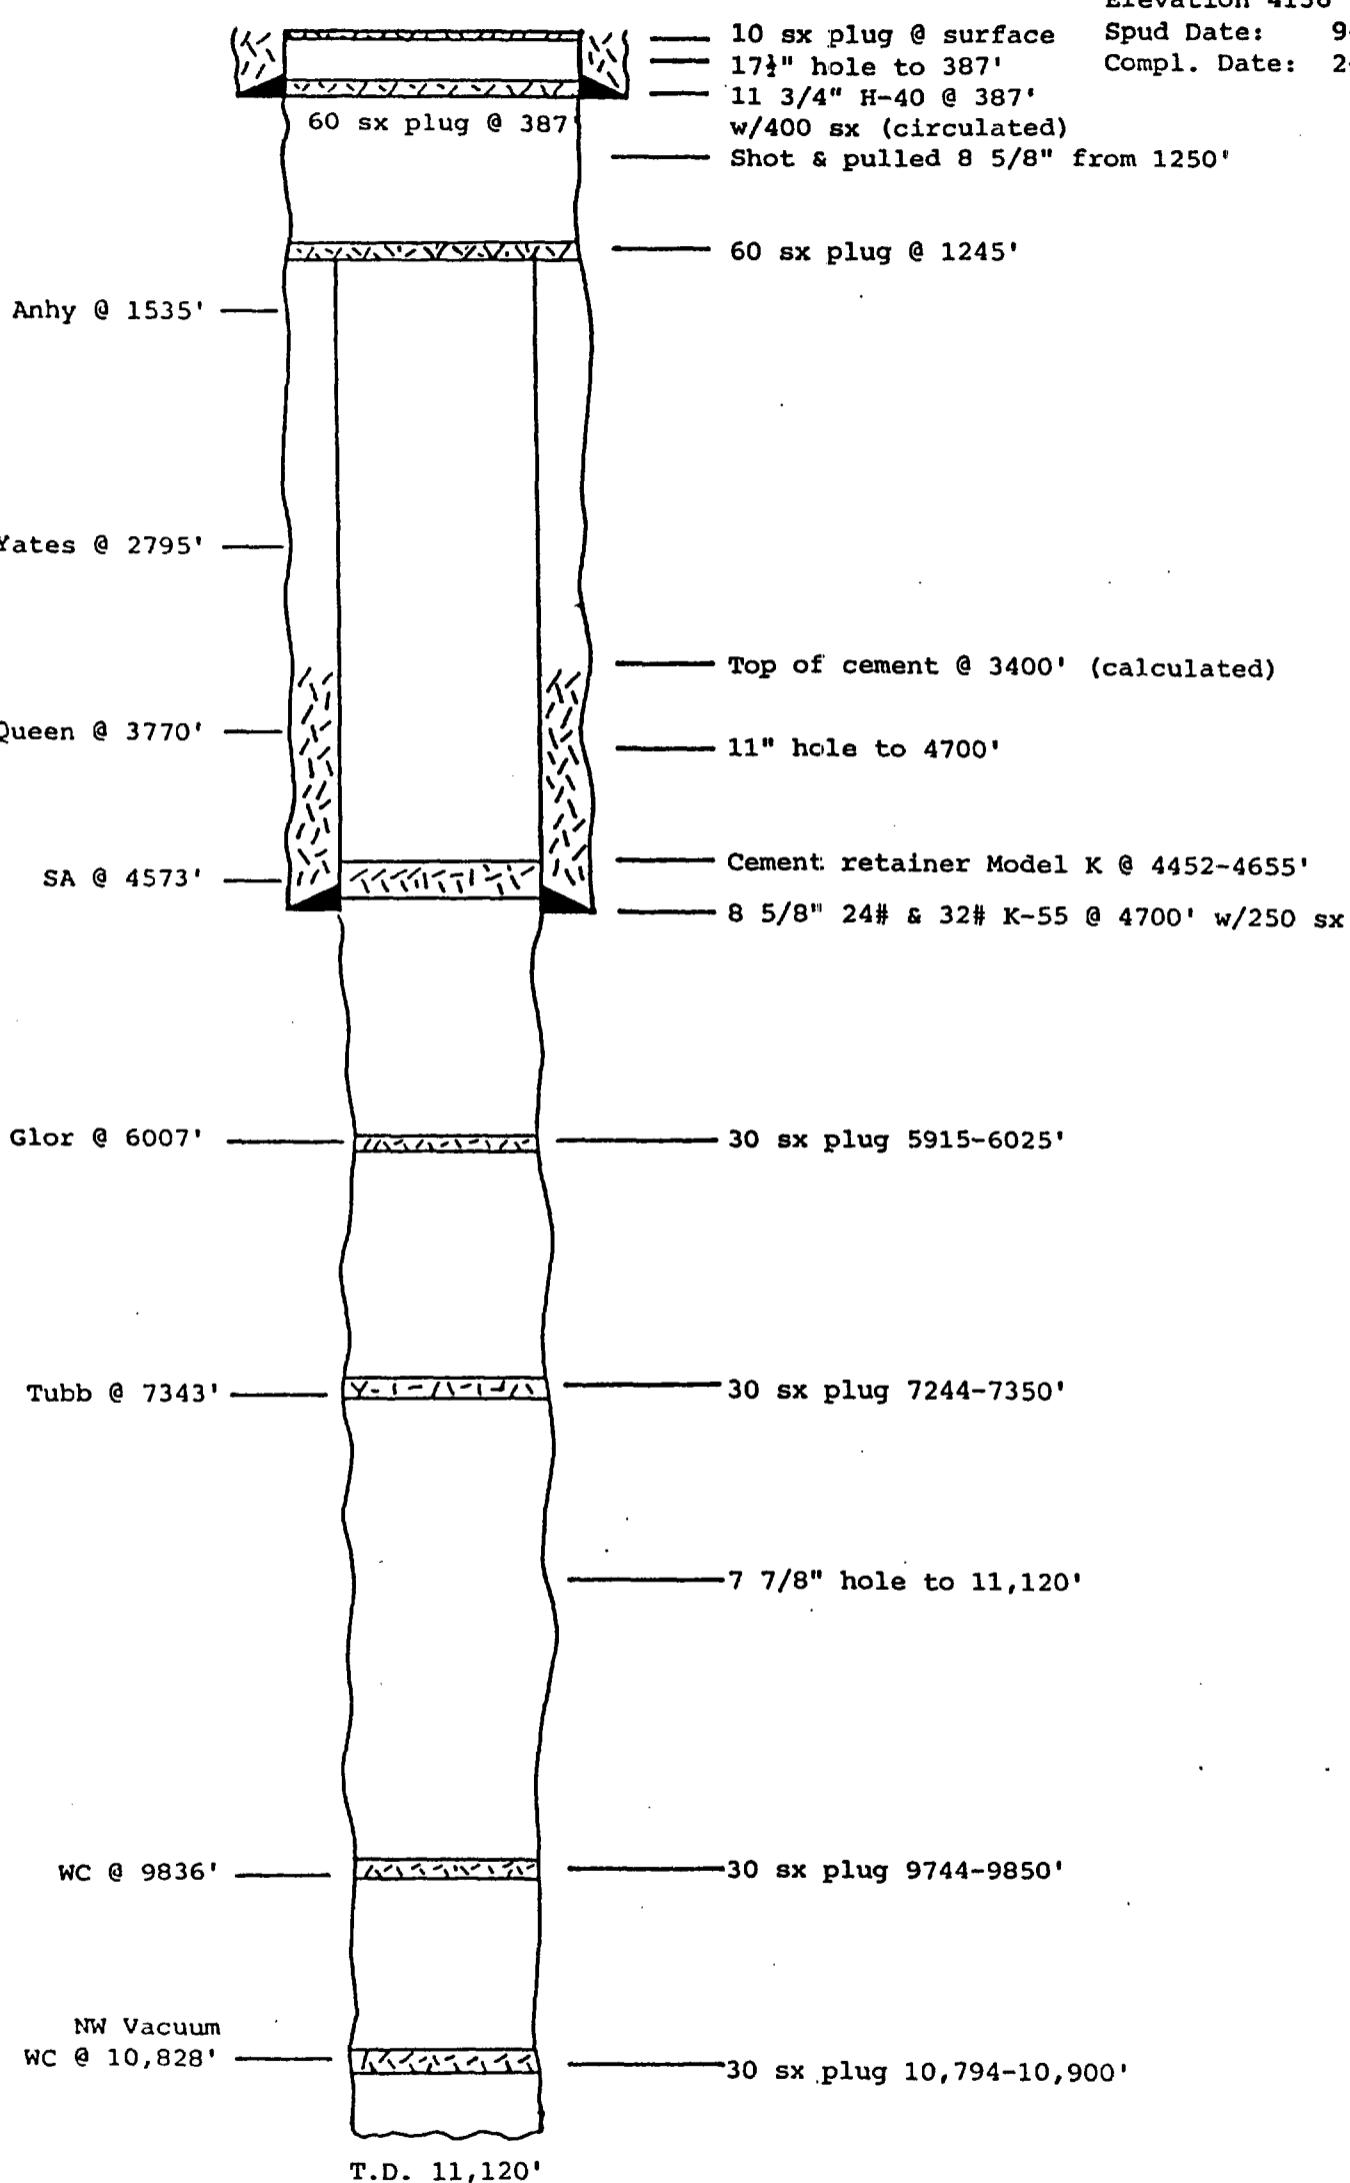

- (1). Yates Petroleum Corporation Hoover "ADR" State #1 1650' FSL & 990' FEL
This well was spudded on December 31, 1985. TD is 11825' - Penn. Casing and cement: 13 3/8" in 17 1/2" hole set at 448' and cemented with 425 sacks, cement circulated to surface; 8 5/8" in 11" hole set at 4530' and cemented with 1725 sacks, cement circulated to surface; drilled 7 7/8" hole to TD. Plugged back to base of intermediate casing as shown on the attached schematic and completed in the Queen. Perforated 3767-3774' with 14 holes and acidized with 2000 gallons 7 1/2% NEFE acid. Initial potential pumping 48 BOPD and 496 BWPD.

Sec. 6, T.17S., R.34E.

- (2). Sinclair Oil & Gas Co. State 197 #3 1980' FNL & 1762.5' FWL
This well was completed in April, 1957 as a dry hole. TD was 5050' - San Andres. Casing and cement: 13 3/8" in 17 1/2" hole set at 307' and cemented with 350 sacks, cement circulated to surface; 8 3/4" hole to TD with no production casing run. Well was plugged per attached schematic.
- (3). H.L. Brown, Jr. State "B" #2 990' FSL & 330' FWL
This well was completed on February 4, 1974, as a dry hole. TD was 11120' - Wolfcamp. Casing and cement: 11 3/4" in 17 1/2" hole set at 387' and cemented with 400 sacks, cement circulated to surface; 8 5/8" in 11" hole set at 4700' and cemented with 250 sacks, no cement top reported, calculated top is 3400'; 7 7/8" hole drilled to TD with no production casing run. Well was plugged per attached schematic, "Present Well Condition." Yates Petroleum Corporation proposes to re-enter this well as the State "B" #2 and complete for water disposal as shown on the attached "Injection Well Data Sheet" and "Disposal Well Diagram."

INSTRUCTIONS

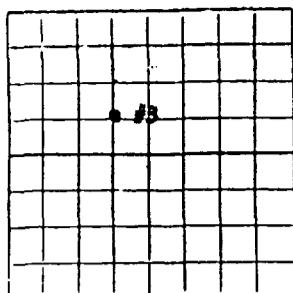

This form is to be filed with the appropriate District Office of the Commission not later than 20 days after the completion of any newly-drilled or deepened well. It shall be accompanied by one copy of all electrical and radio-activity logs run on the well and a summary of all special tests conducted, including drill stem tests. All depths reported shall be measured depths. In the case of directionally drilled wells, true vertical depths shall also be reported. For multiple completions, items 30 through 34 shall be reported for each zone. The form is to be filed in quintuplicate except on state land, where six copies are required. See Rule 1105.

INSTRUCTIONS

This form is to be filed with the appropriate District Office of the Division not later than 20 days after the completion of any newly-drilled or deepened well. It shall be accompanied by one copy of all electrical and radio-activity logs run on the well and a summary of all special tests conducted, including drill stem tests. All depths reported shall be measured depth. In the case of directionally drilled wells, true vertical depth shall also be reported. For multiple completions, items 30 through 34 shall be reported for each zone. This form is to be filed in quintuplicate except on state land, where six copies are required. See Rule 1105.

ENERGY AND MINERALS DEPARTMENT
OIL CONSERVATION DIVISION

IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:

CASE NO. 8940
Order No. R-8312

APPLICATION OF YATES PETROLEUM
CORPORATION FOR SALT WATER DISPOSAL,
LEA COUNTY, NEW MEXICO.

ORDER OF THE DIVISION

BY THE DIVISION:

This cause came on for hearing at 8:15 a.m. on September 17, 1986, at Santa Fe, New Mexico, before Examiner David R. Catanach.

NOW, on this 22nd day of September, 1986, the Division Director, having considered the record and the recommendations of the Examiner, and being fully advised in the premises,

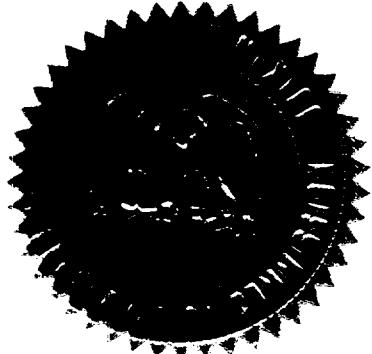

FINDS THAT:

The applicant's request for dismissal should be granted.

IT IS THEREFORE ORDERED THAT:

Case No. 8940 is hereby dismissed.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
