Amerind Oil Company's Proposed B.E. Shipp "28" No. 1, SW/4 SE/4 of
Section 28, T-16S, R-37E, Lea County, New Mexico
- Application for Compulsory Pooling and Non-Standard Proration Unit

Gentlemen:

In response to the captioned application scheduled for Hearing in Santa Fe on July 1, 1987, Conoco maintains the following position. Although Conoco supports the drilling of the proposed well, we oppose the suggested non-standard 80-acre oil spacing and proration unit. It is Conoco's feeling that this non-standard proration unit does not protect our correlative rights in the S/2 of Section 28, primarily because it would take away a second viable Strawn location that could be drilled in the SE/4 SW/4 of Section 28. The loss of this second location would deprive Conoco of our equitable share of recoverable reserve in the Strawn pool. Conoco presently owns a 9.375% working interest in the S/2 of Section 28.

Also, we feel that this loss of ultimate recoverable reserves would result in underground waste, not reflective of a prudent development plan.

It is Conoco's understanding that Rio Pecos Corporation (a 20% working interest owner) will attend the Hearing to present testimony in opposition to Amerind's proposal. This letter serves as evidence that Conoco hereby protests Amerind Oil Company's application for a non-standard oil spacing and proration unit covering the SW/4 SE/4 and the SE/4 SW/4 of Section 28, T-16S, R-37E, Lea County, New Mexico.

Lea County, New Mexico
(See Attached Docket and Plat)

BEFORE EXAMINER CATANACH
OIL CONSERVATION DIVISION

7-1-87 EXHIBIT NO. 12

CASE NO. 9162

Gentlemen:

Amerind Oil Company has filed an application with the New Mexico Oil Conservation Division seeking an order for compulsory pooling and a non-standard 80-acre oil spacing and proration unit to be dedicated to the captioned well. The case (Case No. 9162) is scheduled for an Examiner Hearing in Santa Fe on July 1, 1987.

Amerind is the Operator of two producing Strawn wells, the Shipp No. 1 Well in the NW/4 NE/4 and the Meyers No. 1 Well in the NE/4 NW/4 of Section 33, which were completed in December, 1985, and February, 1986, respectively, and which we feel are draining the oil and gas reserves from the Strawn pool that extends into the S/2 of Section 28. We feel that the Strawn pool which Amerind is draining lies in approximately equal proportions beneath the S/2 of Section 28 and the N/2 of Section 33 which warrants the drilling of two wells, one in the SW/4 SE/4 and one in the SE/4 SW/4 of Section 28, offsetting Amerind's two wells.

Amerind's proposed non-standard proration unit would take away the right of the mineral and leasehold owners in the S/2 of Section 28 to drill and share in the production from a second well that we feel can and should be drilled in the SE/4 SW/4 of Section 28. If the mineral and leasehold owners in the S/2 of Section 28 are not allowed to drill a second well, then they will lose their right to recover their just and equitable share of the recoverable reserves in the Strawn pool. Amerind's delay in drilling the offsetting wells has already resulted in the mineral and leasehold owners losing a portion of their share of the recoverable reserves in the Strawn pool. Why should the royalty and leasehold owners in the N/2 of Section 33 be allowed to drain the Strawn pool with two wells versus only one well for the royalty and leasehold owners in the S/2 of Section 28?

Also, we feel that a loss of ultimate recoverable reserves will occur resulting in underground waste if a second well is not drilled in the SE/4 SW/4 of Section 28.

charge for risk involved in drilling said well. Said area is approximately 1 3/4 miles east of the community of Nadine, New Mexico.

CASE 9107: (Continued from June 3, 1987, Examiner Hearing) **THIS CASE WILL BE DISMISSED.**

Application of Mesa Grande Resources, Inc. for compulsory pooling, Rio Arriba County, New Mexico. Applicant, in the above-styled cause, seeks an order pooling all mineral interests in the Undesignated Cavilan-Mancos and Undesignated Cavilan Greenhorn-Graneros-Dakota Oil Pools underlying the E/2 of Section 5, Township 25 North, Range 2 West, forming a standard 320-acre oil spacing and proration unit in both pools to be dedicated to a well to be drilled at a standard location thereon. Also to be considered will be the cost of drilling and completing said well and the allocation of the cost thereof as well as actual operating costs and charges for supervision, designation of applicant as operator of the well and a charge for risk involved in drilling said well.

CASE 8963: (Continued from June 3, 1987, Examiner Hearing) (Reopened) **THIS CASE WILL BE DISMISSED.**

Application of Mesa Grande Resources, Inc. for compulsory pooling, Rio Arriba County, New Mexico. Applicant, in the above-styled cause, seeks an order pooling all mineral interests in the Cavilan-Mancos and Cavilan Greenhorn-Graneros-Dakota Oil Pools underlying the W/2 of Section 16, Township 25 North, Range 2 West, to be dedicated to a well to be drilled at a standard location thereon. Also to be considered will be the cost of drilling and completing said well and the allocation of the cost thereof as well as actual operating costs and charges for supervision, designation of applicant as operator of the well and a charge for risk involved in drilling said well.

CASE 9151: (Continued from June 17, 1987, Examiner Hearing)

Application of Bettis, Boyle & Stovall for an unorthodox gas well location, Eddy County, New Mexico. Applicant, in the above-styled cause, seeks approval of an unorthodox gas well location for a well to be drilled 660 feet from the North line and 1980 feet from the West line (Unit C) of Section 9, Township 25 South, Range 29 East, to test the Wolfcamp, Strawn, Atoka, and Morrow formations, the W/2 of said Section 9 to be dedicated to the well.

CASE 9162: Application of Amerind Oil Company for compulsory pooling and a non-standard oil proration unit, Lea County, New Mexico. Applicant, in the above-styled cause, seeks an order pooling all mineral interests in the Strawn or Atoka formation underlying the SW/4 SE/4 and SE/4 SW/4 of Section 28, Township 16 South, Range 37 East, forming a non-standard 80-acre oil spacing and proration unit for either the West Casey-Strawn, Casey-Strawn, or Northeast Lovington-Pennsylvanian Oil Pools. Also to be considered will be the cost of drilling and completing said well and the allocation of the cost thereof as well as actual operating costs and charges for supervision, designation of applicant as operator of the well and a charge for risk involved in drilling said well. Said area is located approximately 6.5 miles east-southeast of Lovington, New Mexico.

CASE 9163: Application of ARCO Oil and Gas Company for pool creation, special pool rules, and discovery allowable, Lea County, New Mexico. Applicant, in the above-styled cause, seeks the creation of a new oil pool for Wolfcamp production comprising the W/2 NW/4 of Section 9, Township 16 South, Range 32 East, and the promulgation of special rules therefor including a provision for 80-acre spacing and designated well locations. Applicant further seeks the assignment of an oil discovery allowable, as provided by Rule 509 of the Division's General Rules, to the discovery well for said pool being its West Anderson Ranch State Well No. 1 located 1980 feet from the North line and 660 feet from the West line (Unit E) of said Section 9 (approximately 6 miles north of Maljamar, New Mexico).

CASE 9164: Application of Phillips Petroleum Company for downhole commingling, Lea County, New Mexico. Applicant, in the above-styled cause, seeks approval for the downhole commingling of Eumont-Queen gas production and Eunice Monument-Crayburg-San Andres oil production in the wellbore of its New Well No. 2 located 1980 feet from the North line and 330 feet from the East line (Unit H) of Section 26, Township 20 South, Range 36 East, being approximately 4 1/2 miles northwest of Oil Center, New Mexico.

CASE 9165: Application of Terra Resources, Inc. for a non-standard gas proration unit and an unorthodox gas well location, Eddy County, New Mexico. Applicant, in the above-styled cause, seeks approval of a 169-acre non-standard gas spacing and proration unit comprising the SW/4 of Section 1, Township 22 South, Range 27 East, Undesignated East Carlsbad-Wolfcamp Gas Pool, to be dedicated to a well to be drilled at an unorthodox gas well location 1330 feet from the South line and 660 feet from the West line (Unit L) of said Section 1, said well being approximately 5 miles east of Carlsbad, New Mexico.

CASE 9154: (Continued and Readvertised)

Application of Tenneco Oil Company for an unorthodox gas well location, San Juan County, New Mexico. Applicant, in the above-styled cause, seeks approval of an unorthodox gas well location to be drilled 595 feet from the North line and 335 feet from the East line (Unit A) of Section 1, Township 31 North, Range 11 West, Blanco-Pictured Cliffs Pool, the NE/4 of said Section 1 to be dedicated to the well.

[illegible]
