Re: Application for Downhole Commingling  
Gulf-State No. 1-E  
Section 36, T20S-R38E  
Lea County, New Mexico

Dear Mr. Stamets:

Mewbourne Oil Company is this day making application for downhole commingling the above referenced well according to Rule 303 C of the State of New Mexico Rules and Regulations. We are complying with the requirements as follows:

1. Name and address of the operator.

Mewbourne Oil Company, P. O. Box 7698, Tyler, Texas 75711

2. Lease name, well number, well location, name of the pools to be commingled.

Gulf-State #1-E, Sec. 36, T20S-R38E, Lea County, New Mexico  
Blinebry, Tubb, Drinkard and Abo

3. A plat of the area and ownership of all offsetting leases.

See Attached Map

4. A current 24-hour productivity test.

See attached copy of Form C-116 previously submitted. (This test should have been reported for all four pools). We do not have individual tests for each pool.

5. Resume of well's completion including treating, testing, etc., of each zone and a prognostication of future production for each zone.

See attached Form C-103 for perforations and treating reports. Total stabilized production for all four commingled zones is 11 BOPD, 42 BWPD and 26 MCFPD on pump.

6. Estimated bottom-hole pressures for each artificially lifted zone.

Abo	-	776 psia
Tubb	-	719 psia
Drinkard	-	556 psia
Blinebry	-	511 psia

(Based on SITP and IFL after treating)

7. A description of the fluid characteristics of each zone showing that the fluids will not be incompatible in the well-bore.

All oil is 36° to 38° API for all zones. No foaming or precipitates have formed to date.

8. A computation showing that the value of the commingled production will not be less than the sum of the values of the individual streams.

N/A

9. A formula for the allocation of production to each of the commingled zones and a description of the factors or data used in determining such formula.

25% of the total production for each of the four zones.

10. A statement that all offset operators have been notified in writing of the proposed commingling.

See attached letter and offset operator address list.

Note: The Blinebry had declined to about 3 BOPD in June and July 1987 and was considered as a plugging candidate. The addition of the new oil from the other three zones is the only way to continue to produce this well economically and prevent a waste of oil reserves.

Mr. R. L. Stamets

ATTACHED DISTRIBUTION LIST:

Re: Application for Downhole Commingling  
Gulf-State #1  
Section 36, T20S-R38E, Unit E  
Lea County, New Mexico

Gentlemen:

We have this date made application for downhole commingling the referenced well. The four zones we propose to commingle are the Blinebry, Tubb, Drinkard, and Abo. This application has been requested because the well will be uneconomical to operate unless the commingling is granted.

If you have no objection to the approval of the application, please sign two of the attached copies in the space provided at the bottom of this letter. Self-addressed, stamped envelopes have been enclosed for your convenience in mailing one copy to this office and one copy to the New Mexico Oil Conservation Commission in Santa Fe, New Mexico.

Thank you for your prompt attention in regard to this matter.

Very truly yours,

MEWBOURNE OIL COMPANY

No well will be assigned an allowable greater than the amount of oil produced on the official test.  
 During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.  
 Gas volumes must be reported in MCF measured at a pressure base of 15,025 psia and a temperature of 60° F. Specific gravity base will be 0.60.  
 Report casing pressure in lieu of tubing pressure for any well producing through casing.  
 Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Commission in accordance with Rule 301 and appropriate pool rules.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
