Mr. A. L. Porter, Jr., Director  
Oil Conservation Commission  
State Land Office Building  
Santa Fe, New Mexico

Dear Sir:

We submit herewith Application of Socony-Mobil Oil Company, Inc. for authority to institute a waterflood project within the area to be designated as the West Henshaw Premier Unit, Eddy County, New Mexico, containing 2,400 acres, more or less, said waterflood project to be operated in accordance with Rule 701 of the Commission; a copy of this Application has been forwarded to the Office of the State Engineer.

We also submit herewith Application of Socony-Mobil Oil Company, Inc. for approval of Unit Agreement for the area to be designated as the West Henshaw Premier Unit, Eddy County, New Mexico, with copy of Unit Agreement attached thereto.

Very truly yours,

  
James E. Sperling

Dear Mr. Sperling:

Reference is made to Commission Order No. R-3045, recently entered in Case No. 3378, approving the Sococo Mobil West Henshaw Premier Waterflood Project.

Injection is to be through the 25 authorized water injection wells, each of which shall be equipped with a packer and with tubing, with the casing-tubing annulus filled with inhibited water to prevent corrosion.

As to allowable, our calculations indicate that when all of the authorized injection wells have been placed on active injection, the maximum allowable which this project will be eligible to receive under the provisions of Rule 701-E-3 is 1974 barrels per day. If Tract 7B, Lot 6 of Section 3, should be committed to the unit later, this maximum allowable would be increased to 2016 barrels per day.

Please report any error in this calculated maximum allowable immediately, both to the Santa Fe office of the Commission and the appropriate district proration office.

In order that the allowable assigned to the project may be kept current, and in order that the operator may fully benefit from the allowable provisions of Rule 701, it behooves him to promptly notify both of the aforementioned Commission offices by letter of any change in the status of wells in the project area, i.e., when active injection commences, when additional injection or producing wells are drilled, when additional wells are acquired through purchase or unitization, when wells have received a response to water injection, etc.
