STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION COMMISSION

RECEIVED

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION OF NEW MEXICO FOR THE PURPOSE OF CONSIDERING:

SEP 1 1 1987

JIL CONSERVATION DIVISION

Case No. 9148

APPLICATION OF TEXACO PRODUCING, INC. FOR A DRILLING PERMIT IN THE POTASH OIL AREA, EDDY COUNTY, NEW MEXICO.

Case No. 9158

APPLICATION OF TEXACO PRODUCING INC. FOR A DRILLING PERMIT IN THE POTASH OIL AREA, EDDY COUNTY, NEW MEXICO,

Order R-8491

MOTION TO STRIKE

Applicant, Texaco Producing, Inc. moves to strike the Application for Rehearing filed by Western-Ag Minerals Company and International Minerals and Chemical Corporation ("Protectants"). In support, Texaco states:

- 1. The Application is untimely. Section 70-2-25 N.M.S.A. (1978) states, in part:
 - (A) Within twenty (20) days after entry of any order or decision of the Commission, any party of record adversely affected thereby may file with the Commission an application for rehearing . . .

The Commission's order in this case, Order R-8491, was entered on August 17, 1987. The twentieth day after entry of the order fell on Sunday, September 6, 1987. the protestants' rehearing application was filed on Tuesday, September 8, 1987. (Monday,

September 7, 1987 was Labor Day). Thus, the protestants' application was filed 22 days following the actual date of entry of the order.

2. The Commission is now without jurisdiction to entertain an application for rehearing in this case. Section 70-2-25, supra, is the pronouncement of the New Mexico Legislature setting out the boundaries of the Commission's quasi-ajudicative authority. It is a jurisdictional statute. (See, Pubco Petroleum Corporation v. Oil Conservation Commission, 399, P.2d 932 [N.M. 1965].) The Commission has no authority to exceed its jurisdiction by granting an untimely rehearing application.

The New Mexico Legislature has clearly expressed the plain meaning of its intent in Section 70-2-25: applications for rehearing must be made within twenty days. There is no allowance for applications beyond twenty days. No contrary meaning has been expressed in the statute and none should be implied. (Weiland v. Vigil, 560 P.2d 939 [N.M. 1977].) Unlike the powers accorded to the judicial branch of state government to prescribe rules of procedure allowing for enlargements of deadlines where the filing date falls on a "Saturday, a Sunday, or a legal holiday" (Rule 1-006, S.C.R.A.) the Oil Commission has no such power, express or implied. The Commission cannot, by administrative fiat, expand the steps for rehearing under Section 7-2-25, supra.

where the legislature has established steps for perfecting an appeal (or reconsideration) of an administrative matter, the steps are jurisdictional, (See, Matter of Application No. 0436-A into 3841, 686 P.2d 269, 271 [Ct. App. 1984].) "The steps the

legislature intended as prerequisites to perfecting an appeal . . . cannot be waived." Id., 271. The statutorily required administrative procedures must be fully complied with. An agency has no authority to alter the statutory scheme. (See, Application of Angel Fire Corp., 634, P.2d 202, 203 [N.M. 1984].)

3. It has been the Commission's long-standing interpretation of Section 70-2-25 that applications for rehearing be filed on or before the expiration of twenty days. Requests filed after twenty days because the twentieth day falls on a Saturday, Sunday or legal holiday have been rejected. Such long-standing administrative construction of a statue is persuasive and should be accorded particular weight. (Kenneth v. Schmoll, 482 F.2d 90 [10th Cir. 1973]; Molycorp v. State Corporation Commission, 624 P.2d 1010 [1981].)

WHEREFORE, Texaco requests that the protestants' Application for Rehearing by striken.

Respectfully submitted:

CAMPBELL & BLACK

J. Scott Hall

P.O. Box 2208

Santa Fe, New Mexico 87504-2208 (505) 988-4421

I hereby certify that I mailed a copy of the foregoing pleading to opposing counsel of record on this 11th day of September, 1987.

J. Scott Hall

See, for example, Order No. R , in Case No. , Application of MGF Oil Company for Compulsory Pooling, Lea County, New Mexico. [We have attempted to obtain copies of this and other orders denying untimely filed applications for rehearing, but were advised that the Commission's case files are aware for micro-filming and are unavailable.]

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION COMMISSION

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION OF NEW MEXICO FOR THE PURPOSE OF CONSIDERING:

CASE NO. 9148

APPLICATION OF TEXACO PRODUCING INC. FOR A DRILLING PERMIT IN THE POTASH OIL AREA, EDDY COUNTY, NEW MEXICO.

fle

CASE NO. 9158

APPLICATION OF TEXACO PRODUCING INC. FOR A DRILLING PERMIT IN THE POTASH OIL AREA, EDDY COUNTY, NEW MEXICO.

. ORDER R-8491 -

APPLICATION FOR REHEARING

TO THE HONORABLE MEMBERS OF THE OIL CONSERVATION COMMISSION:

WESTERN AG-MINERALS COMPANY ("Western Ag") and INTER-NATIONAL MINERALS AND CHEMICAL CORPORATION ("IMCC"), parties of record adversely affected by the Order of the Oil Conservation Commission ("OCC") entered in this matter on August 17, 1987, file this Application for Rehearing pursuant to 70-2-25(A) NMSA 1978 and Rule 1222 of the OCC's Rules of Procedure, and in support thereof, respectfully show the following:

I.

The OCC, in approving the application for permit to drill in Case Number 9158, has clearly failed to observe the prohibition in 70-2-6(A) against the "waste of potash as a result of

oil or gas operations" and the prohibition against "waste" of potash in 70-2-12(B)(17). These prohibitions require, at a minimum, that before approving an application for permit to drill in the Potash Area, the OCC must first determine the amount of potash that will be lost if the well is allowed. Only after such a factual finding can it be determined if the proposed well will result in "undue" or prohibited waste of potash. The failure to make such a factual determination in this case is particularly significant because it is the position of Western Ag and IMCC that the value of potash that will be wasted if the well is allowed far exceeds the additional costs that would be incurred if the well is required to be directionally drilled from a surface location within the area of potash already wasted by the Forty Niner Ridge Unit Well No. 1.

II.

The OCC, in approving the application for permit to drill in Case Number 9158, failed to consider and determine whether the proposed well would constitute a hazard to underground mining activities as required by Order R-111-A, Section III(2), as amended. This prohibition against oil and gas activities that create a hazard to mining operations requires careful evaluation and an affirmative finding by the OCC on whether such activities will or will not create a safety hazard.

The OCC failed to observe or misunderstood the State Land Office Rules and Regulations on lease suspensions by concluding in Finding No. 7 that the denial of the application in Case Number 9158 would place the Forty Niner Ridge Unit at risk. Section 1.061 of such Rules and Regulations, entitled Waiver of Development in Potash or Other Mineral Areas, specifically provides for the waiver of drilling development under such circumstances.

IV.

The limitations set forth in Finding No. 23 against primary mining within 100 feet of the well casing and against secondary mining within 1200 feet of the casing are based upon a misunderstanding of the evidence. The spacing requirements necessary between oil and gas activities and potash deposits, to the extent referred to by Western Ag and IMCC, were those necessary to prevent damage to well casings by subsidence due to mining operations. To establish spacing requirements based on this evidence without considering the distance required to prevent oil and gas operations from becoming a hazard to mining operations is contrary to Order R-111-A and 70-2-6 NMSA 1978.

٧.

The OCC, in approving the application for permit to drill in Case Number 9158, misconstrued the record evidence in arriving at Findings Numbers 7, 9, 10, 12, 14, 15, 16, 19, 21, 23, 24, 25 and Paragraphs Numbers 2, 5, 6 and 7 of its Order.

The failure of the OCC to require directional drilling from the area around Forty Niner Ridge Unit Well No. 1 under the facts of this case is in violation of its statutory duty to prevent the waste of potash as set forth in the Oil and Gas Act, 70-2-1, et seq., 1978.

WHEREFORE, upon the foregoing grounds, it is respectfully urged that the OCC grant this Application for Rehearing, withdraw the Order of August 17, 1987 and schedule oral arguments on the issues raised or reopen the record so these important issues can be corrected and resolved.

Respectfully submitted,

Mr. William J. LeMay Director State of New Mexico Oil Conservation Division Energy and Minerals Department P.O. Box 2088 Santa Fe, New Mexico 87501

RE: Application of Texaco Producing, Inc.; OCC Cases Nos. 9148 and 9158

Dear Mr. LeMay:

This is in response to your request that the parties identify the issues to be resolved by the Oil Conservation Commission ("OCC") in the above-captioned cases.

Under the Oil and Gas Act, as you know, the OCC has the statutory responsibility of preventing the "waste of potash as a result of oil or gas operations". Section 70-2-6, NMSA 1978. The "waste" prohibited includes any:

drilling or producing operations for oil or gas within any area containing commercial deposits of potash where such operations would have the effect unduly to reduce the total quantity of such commercial deposits of potash which may reasonably be recovered in commercial quantities or where such operations would interfere unduly with the orderly commercial development of such deposits.

Section 70-2-3(F), NMSA 1978. In addition, OCC Order R-111-A, Section III(2) provides that:

No wells will be drilled for oil or gas at a location which, in the opinion of the Commission or its duly authorized representative, would result in undue waste

Mr. William J. LeMay June 11, 1987 Page Two

of potash deposits or constitute a hazard to or interfere unduly with potash deposits.

Given these statutory duties, it is our position that the OCC must decide the following issues in Cases Nos. 9148 and 9158:

- 1. Whether the proposed well locations will penetrate commerical deposits of potash;
- Whether the proposed wells, if allowed, will unduly reduce the total quantity of commercial deposits of potash;
- 3. Whether the potash deposits in the area of the proposed wells can be reasonably recovered in commercial quantities;
- 4. Whether the proposed wells, if allowed, would interfere unduly with the orderly commercial development of potash deposits; and
- 5. Whether the proposed wells, if allowed, would constitute a hazard to the recovery of potash deposits.

Our position on each of these issues is summarized in a separate letter to you along with a tentative list of witnesses and exhibits as you requested. Additional issues, as well as witnesses and exhibits, may arise or become necessary after we have reviewed the documents subpoenaed from Texaco Producing, Inc.

The hazards of oil and gas activities in the vicinity of underground mining is of critical concern to us, as well as our underground miners, so we trust that the OCC will carefully consider this as well as the other issues so that mine safety is not sacrificed in the interest of saving time or increasing oil and gas production.

Sincerely,

кемр, ѕмътн

June 11, 1987

Mr. William J. LeMay Director State of New Mexico Oil Conservation Division Energy and Minerals Department P.O. Box 2088 Santa Fe, New Mexico 87501

REREWEIDED

JUNN 2 198987

OHOGOCISATBRATATION YEARION 100

Application of Texaco Producing, Inc.; OCC Cases Nos.

Dear Mr. LeMay:

This is in response to your request for a brief statement of position from Western Ag-Minerals Company and International Minerals and Chemical Corporation concerning the Applications of Texaco Producing, Inc. in OCC Cases Nos. 9148 and 9158.

It is our position that both applications should be denied because (1) the drilling of the proposed wells will result in the "waste" of potash in violation of Section 70-2-2 NMSA (1978); (2) the proposed well locations will constitute a hazard to the recovery of underlying potash deposits; and (3) the proposed well locations will interfere with the orderly development of mining operations.

We believe this waste and safety hazard can be avoided and the oil and gas lease still developed if drilling activity in Section 16 is pursued from a drilling island around the existing well known as Forty-Niner Ridge Unit No. 1 or from the barren area northwest of the proposed surface locations. If these locations are unacceptable to Texaco, it should request a suspension of the lease until the potash is recovered.

Our witness and exhibit lists are not finalized yet but we currently plan on calling the following witnesses:

Mr. William J. LeMay June 11, 1987 Page Two

Walt Thayer
A.J. Schwandt
Donald Galbraith
Robert Kreul
Randy Foote
Robert Nicholson
Jim Wilcox

We plan to offer into evidence a number of studies involving the potash deposits in the Potash-Oil Area and if a dispute arises over their admissibility, we may have to call their authors as witnesses.

Sincerely,

KEMP, ZMYTH, DUNCAN & HAMMOND

EXHIBIT "A"

"Documents" or "records" mean every writing and record of every type and description in the possession, custody or control of International Minerals & Chemical Corporation whether prepared by you or otherwise, which is in your possession or control or known by you to exist, including but not limited to, all drafts, correspondence, memoranda, handwritten notes, notes, minutes, entries in books of accounting, computer printouts, tapes and records of all types, minutes of meetings, studies, contracts, agreements, books, pamphlets, schedules, pictures and voice recordings, videotapes and every other device or medium on which, or for which information of any type is transmitted, recorded or preserved and whether or not such documents or records are marked or treated as confidential or proprietary. The term "document" also means a copy where the original is not in possession, custody or control of the company or corporation to whom this request is addressed, and every copy of the document where such copy is not an identical duplicate of the original, all things similar to any of the foregoing however denominated by the parties.

- 1. All potash core assay information evidencing the thickness and quality of potash reserves underlying Section 16 and adjoining sections in Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.
- 2. All documents evidencing the <u>volumes</u> of potash reserves in the areas identified in No. 1 above that you contend will be lost if Texaco drills its two wells at the proposed locations in Section 16, Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.

- 3. All documents supporting your contentions that the value of potash reserves potentially lost will be between two million dollars and eight million dollars.
- 4. All documents evidencing your right to mine in Section 16, Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico, including but not limited to, leases, assignments, farmouts, operating agreements and all governmental approvals.
- 5. All documents and maps evidencing your mining plans for the last ten years, all future mining plans and areas actually mined and/or developed.
- 6. All documents demonstrating how you define or otherwise distinguish "barren" potash areas from commercial potash areas.

The term "document" also means a copy where the original is not in possession, custody or control of the company or corporation to whom this request is addressed, and every copy of the document where such copy is not an identical duplicate of the original, all things similar to any of the foregoing however denominated by the parties.

- 1. All potash core assay information evidencing the thickness and quality of potash reserves underlying Section 16 and adjoining sections in Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.
- 2. All documents evidencing the <u>volumes</u> of potash reserves in the areas identified in No. 1 above that you contend will be lost if Texaco drills its two wells at the proposed locations in Section 16, Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.

- 3. All documents supporting your contentions that the $\underline{\text{value}}$ of potash reserves potentially lost will be between two million dollars and eight million dollars.
- 4. All documents evidencing your right to mine in Section 16, Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico, including but not limited to, leases, assignments, farmouts, operating agreements and all governmental approvals.
- 5. All documents and maps evidencing your mining plans for the last ten years, all future mining plans and areas actually mined and/or developed.
- 6. All documents demonstrating how you define or otherwise distinguish "barren" potash areas from commercial potash areas.

Re: Application of Texaco Producing, Inc.: OCC Case Numbers 9149 and 9158

Dear Mr. Lemay:

Enclosed are subpoenas for International Mineral and Chemical Corporation (IMC) and Western Ag Minerals Company, the opponents in the above-referenced consolidated cases.

On May 29, 1987 the applicant, Texaco Producing, Inc., served its Request for Production of Documents to both IMC and Western Ag in care of their attorney, Charles High. Although IMC and Western Ag have not filed their responses or objections to the requests, Mr. High advised via telephone that one of his clients might produce the documents and that the other had not then been contacted. Since that conversation, we have not heard again from Mr. High and have been provided none of the documents requested.

Accordingly, we respectfully request the issuance of the two subpoenas.

Very truly yours,

J. Scott Hall

RE: Case Nos. 9148 and 9158
Application of Texaco, Inc.

Gentlemen:

In planning the Commission hearing scheduled for June 18, 1987, it has become clear to me that some pre-hearing agreement may be necessary in order to expedite the hearing process through limitation of repetitive or cumulative testimony and stipulation of facts. In order to accomplish this, I would ask each of you to submit to the Commission and opposing counsel a list of issues to be covered, witnesses, exhibits, and proposed timing as soon as practicable. I would also ask that each of you draft a concise statement of your client's position and summary of evidence supporting same on not more than one page. this, I would hope to set out a schedule, allotting to each side an equal amount of time in which to present its case or pursue cross-examination. By letting you know prior to the hearing the amount of time allotted to your case, we hope to maximize your ability to present a clear and convincing case to the Commission on contested issues. Because scheduling is difficult for a three member body with many other job responsibilities, this will allow us to plan the meeting agenda so as to treat each side fairly while allowing sufficient evidence in the record to support findings and orders.

Please let me have the requested information by June 10th if possible.

Sincerely,

William J. LeMay

Re: New Mexico Oil Conservation Commission Cases 9148 and 9158: Applications of Texaco Producing, Inc.

Dear Charlie:

Enclosed are two Requests for Production of Documents for your clients, International Minerals Co. and Western-Ag. Minerals Co. The Requests call for the production of the documents at our offices in Santa Fe on Friday, June 5, 1987, at 9:00 a.m.

Although you indicated your objection and resistance to discovery at the arbitration hearing today, I now propose that the documents produced be subject to the provisions of the enclosed confidentiality agreement. This is a reasonable approach to discovery and should satisfy your concerns.

If the confidentiality agreement is inadequate and your clients still refuse to produce the documents, please let me know before Tuesday, June 2, 1987, and I will proceed to obtain subpoenas.

Thanks for your cooperation.

Very truly yours,

J. SCOTT HALL

APPLICATION OF TEXACO PRODUCING, INC. FOR PERMIT TO DRILL IN POTASH-OIL AREA, EDDY COUNTY, NEW MEXICO

Case No. 9148 Case No. 9158

REQUEST FOR PRODUCTION OF DOCUMENTS

To: Western-Ag-Minerals Co.
P.O. Box 511
Carlsbad, New Mexico 88220
c/o Charles High, Esq.
Kemp, Smith, Duncan & Hammond
P.O. Drawer 2800
El Paso, Texas 79999-2800

Pursuant to Section 70-2-8 N.M.S.A. (1978) and New Mexico Oil Conservation Commission Rule 1211, Applicant Texaco Producing, Inc. requests the production of the following documents for inspection and copying at the offices of Campbell and Black, P.A., 110 North Guadalupe, Suite 1, Jefferson Place, (P.O. Box 2208), Santa Fe, New Mexico 87504-2208 at 9:00 a.m. on Friday, June 5, 1987.

As used herein the term "document" means all written recorded or graphic material of every type and description, in whatever form, however produced or reproduced, including but not limited to, all original and all non-identical duplicates, copies or reproductions thereof, memoranda, agreements, contracts, letters of intent, maps, charts, credit reports, telex, cables, wires, telecopies, notes, notations, work papers, desk calendars, appointment journals, diaries, reports, recordings of telephone or other conversations or of interviews, conferences or meetings, ledgers, notebooks, bank records, drafts, checks, negotiable or

non-negotiable instruments, leases, credit files, books of account, data compilations, affidavits, notices, microfilm, dictation, records, tape recordings, cassette recordings, photographs, films, video tapes or cassettes, software or floppy disks or diskettes, computer storage materials including magnetic tapes, computer materials, purchase agreements or contracts, invoices, purchase orders, statements, monthly or annual reports of condition, and any notes, annotations, jotting, scribblings, file or routing marks or other indications added to any such document, and any drafts, preliminary versions, revisions, corrections and amendments thereof.

REQUEST NO. 1: All potash core assay information evidencing the thickness and quality of potash reserves underlying Section 16 and adjoining sections in Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.

REQUEST NO. 2: All documents evidencing the <u>volumes</u> of potash reserves in the areas identified in Request No. 1 above that you contend will be lost if Texaco drills its two wells at the proposed locations in Section 16, Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.

REQUEST NO. 3: All documents supporting your contentions that the value of potash reserves potentially lost will be between two million dollars and eight million dollars.

REQUEST NO. 4: All documents evidencing your right to mine in Section 16, Township 23 South, Range 30 East, N.M.P.M., Eddy County, New Mexico, including but not limited to, leases, assignments, farmouts, operating agreements and all governmental approvals.

REQUEST NO. 5: All documents and maps evidencing your mining plans for the last ten years, all future mining plans and areas actually mined and/or developed.

REQUEST NO. 6: All documents demonstrating how you define or otherwise distinguish "barren" potash areas from commercial potash areas.

Respectfully submitted:

Mr. William J. LeMay, Director Oil Conservation Division Energy and Minerals Department State of New Mexico P.O. Box 2088 State Land Office Building Santa Fe, New Mexico 87501

> Application of Texaco Producing, Inc. for Permit to Drill Potash-Oil Area, Case No. 9148

Dear Mr. LeMay:

Our firm represents International Minerals and Chemical Corporation and Western AG-Minerals Co. and hereby enters an appearance on their behalf in the above-captioned matter.

In addition, we are requesting that the hearing on the application set for June 3, 1987 for the Oil Conversation Commission be postponed and rescheduled to a later date. support of this request, we would respectfully show the following:

- Both Western AG and IMCC are producing potash operators in the Potash-Oil Area and, therefore, have a substantial interest in the application filed by Texaco;
- We have learned through correspondence and telephone conversations with Mr. J. Scott Hall, attorney for Texaco, that this matter has been set for hearing before the New Mexico OCC on June 3, 1987 but have not been served with

sec de de la company de la france la

Mr. William J. LeMay, Director May 27, 1987 Page Two

a Notice of Hearing from the State of New Mexico as required by Rules 1204 and 1205 of the Oil Conservation Division Rules of Procedure; and

3. The scheduling of a hearing on June 3, 1987, assuming such a hearing is scheduled, does not provide these potash operators with adequate time to prepare for the hearing. The issues involved in the application are complex, as you know, and will require the testimony of outside experts on drilling and mining technology as well as the impact such drilling activities will have on the safety of miners. We cannot, on such short, informal notice, have these individuals present to testify in Santa Fe on June 3, 1987.

Accordingly, and for the foregoing reasons, we respectfully request that the OCC postpone the hearing currently set for June 3, 1987, if such a hearing is scheduled, and reschedule it to a date after proper notice has been given and sufficient time allowed for hearing preparation.

Sincerely,

KEMP, SMITH, DUNCAN & HAMMOND

> Forty-Niner Ridge Unit Well No. 3 Edie County, New Mexico

M.S. 9148

Dear Russ:

This will confirm our telephone conversation today during which I informed you that the Potash Industry would not oppose your Company's drilling of the above-referenced well provided it is relocated to the barren area north and west of the currently proposed site and drilled from a surface location which is a distance away from commercial grade ore equal to the depth of the ore plus 10% plus whatever additional distance your company believes is necessary to prevent any migration of methane gas into our mine in the event of a leak.

When you have made the determination on this new location, I would appreciate your letting me know the exact location. We will then plot the location on our maps and let you know our position. As stated above, if the new location meets the guidelines set forth above, we will have no opposition to the new location. This is true even if, as you suggested, you want to drill three or four wells.

appreciate your cooperation with this matter and I look forward to hearing from you.

Mr. Russell S. Pool January 22, 1986 Page Two

> Re: Forty Niner Ridge Unit Well No. 3, Section 16, Township 23 South, Range 30 East, Eddy County, New Mexico

Dear Mr. Baker:

This letter will confirm our phone conversation on December 17, 1985.

By my letter of November 27, 1985, I advised you that the permit to drill the subject well approved by the Division on November 4, 1985, was valid. The letter recited the sequence of events which led to that decision. It has now come to my attention that the notice given to the potash operators as reflected by the return receipts submitted with the application to drill did not include a copy of the application to drill as required by the rules.

As a result of this later information, I must now withdraw our approval of the application to drill and set this matter for arbitration. At this time both Texaco and potash representatives have indicated that such an arbitration meeting can be held in my office at 10:00 a.m. on Thursday, January 9, 1986. That time and date is to be confirmed not later than December 23rd. I will advise you of any variation from this schedule.

Dear Mr. Thayer:

Enclosed is a copy of a letter advising Texaco Inc. that approval of the application to drill their Forty Niner Ridge Unit Well No. 3 has been withdrawn.

The letter is self explanatory as to the reason for the withdrawal. Please note that an arbitration meeting has been set on this matter in my office at 10:00 a.m. on January 9, 1986. Unless advised otherwise by any interested party by December 23, 1985, this date is firm. All parties would be advised of a change in time for the arbitration meeting.

RE: Forty-Niner Ridge Unit Well No. 3
Section 16, Township 23 South, Range 30 East
Eddy County, New Mexico

Dear Mr. Stamets:

This will confirm our telephone conversation in which I informed you that International Minerals and Chemical Corporation disagrees with your approval of the application for permit to drill at the above-mentioned location. It is our position that the protest filed by IMCC was timely and that your failure to order a hearing on the application is in violation of both the Oil and Gas Act and your agency's regulations.

I also appreciate your willingness to meet with us on such short notice to discuss this important issue and look forward to meeting with you on Tuesday, December 17, 1985

Mr. R. L. Stamets December 13, 1985 Page Two

at 1:00 p.m. to discuss and hopefully resolve this matter without litigation.

Best regards.

Sincerely,

KEMP, SMITH, DUNCAN & HA

Mr. J. H. Hunt Resident Manager Potash Producers, Inc. P.O. Box 511 Carlsbad, NM 88220

Dear Mr. Hunt:

Enclosed is a letter advising Texaco that they possess a valid permit to drill a well in the Potash-Oil Area. This is the well you objected to in your letter of November 13, 1985.

The permit was approved as no potash operator objected to the proposed location following notice by Texaco and in accordance with the Potash-Oil Area Rules contained in Division Order R-III-A as amended. The Division's approval of permits to drill is automatic under these circumstances and does not reflect any determination as to the commercial nature of any potash reserves which may underlie the well site. Your attorney can advise you of any other relief you might seek before this agency if you indeed wish to stop the drilling of this well.

If any potash operator or interest owner or any oil operator feels that the Potash-Oil Area Pules do not provide sufficient protection for any party, I would encourage them to seek a hearing to amend the rules. The original rules date from 1951 and perhaps could benefit from some "moderization". I have hoped for some time that both those with potash interests and oil interests could get together to update the rules should it appear beneficial to do so. I would offer to assist in any way this Division could with such a proposal.

November 27, 1985

MEL ORANDUM

TO:

TONEY ANAYA, GOVERNOR

THROUGH HARVEY FREEMAN, GOVERNOR'S COUNSEL

FROM:

PAUL BIDERMAN, SECRETARY

SUBJECT: POTENTIAL COMPLAINTS RELATIVE TO OIL DRILLING IN THE

POTASH AREA

Attached are letters relative to the possible drilling of an oil well in the potash mining area of Southeast New Mexico.

As can be seen from the letters, the potash operators received notice of the proposed application to drill but failed to file their objections until well after the time limit provided in the rules applicable to this area. The permit to drill was therefore approved.

In the past, such drilling proposals have resulted in direct attempts by potash operators and/or unions to involve the Governor's office in attempting to halt the drilling of the proposed well. I would encourage the Governor to advise any such party in the current case to proceed with seeking relief before the Department's Oil Conservation Division as provided by law. As you can see from the enclosed letters, the Division anticipates that there may yet be relief for the potash operators in this matter if they are serious in their objections to the proposed drilling. You will also see that the Division has encouraged any interested party to seek such changes in the special rules or statutes as they believe may be appropriate in this matter.

> Re: Forty Niner Ridge Unit Well No. 3, Section 16, Township 23 South, Range 30 East, Eddy County, New Mexico

Dear Mr. Baker:

Your letter of November 20, 1985, inquired as to whether Texaco possessed a valid permit to drill the above referenced well.

Based on my review of this matter, I have determined the following:

- Cn October 30, 1985, Texaco filed an application to drill the subject well in the Potash-Oil Area. The permit was filed with our Artesia district office.
- 2) The application included return receipts showing notice to potash operator(s).
- 3) The return receipts attached to the application show that both International Minerals and Chemical Corporation and Potash Producers Inc. had received copies of the application on October 3, 1985.
- 4) No objection was received from either a potash operator or interested party with 10 days after their receipt of notice.
- 5) The permit was approved by the Division on November 4, 1985.
- 6) Both IMC and Potash Producers filed protests with the Division on November 15, 1985, nearly 6 weeks after their receipt of notice.

7) The protests were not filed within the time period provided in the special rules for the Potash-Oil Area.

Based on the above, I can only conclude that Texaco now possesses a valid permit to drill.

Please note that this determination is based solely on compliance by Texaco with the special rules applicable to drilling in the Potash-Cil Area. It in no way implies a determination as to the presence or absence of commercial potash at the well location nor does it guarantee that one or more potash operators will not seek other relief from this agency to prevent the drilling of the well.

Sincerely

R. L. STAMETS Director

RE: Forty Niner Ridge Unit Well No. 3 Section 16, T-23-S. R-30-E Eddy County, New Mexico

Gentlemen:

Pursuant to our telephone conversation of November 14, 1985, attached is a copy of the approved drilling permit for the subject well. Based on this permit, Texaco is proceeding with plans to drill this well at the permitted location. This will allow continued development of the Forty Niner Ridge Delaware Pool.

Potash Producers, Inc. and International Minerals & Chemical Corporation have protested this location (copies of their letters are also attached), and the status of this permit is now in question. Please advise if the permit is still in effect or if this situation will have to be arbitrated per Order No. R-111-A.

Yours very truly,

W. A. BAKER II

RE: Forty Niner Ridge Unit Well No. 3
Proposed Location

Dear Mr. Baker:

We have received your letter of October 29, 1985 with the Application for Permit to Drill attached. The well referenced is located 2310' FNL and 2310' FEL of Section 16, Township 23-South, Range 30-East. Thank you for your courtesy.

Commercial ore is indicated in holes to the north and to the east of your proposed location. Confirming the telephone conversation of October 21, 1985 between IMC's mine engineer Dan Morehouse and Texaco's Gary Porter, and their subsequent meeting of October 28, I iterate: IMC does object to this location because it poses a safety hazard to the miners and it wastes potash.

IMC would not object to the drilling of this well if it were moved a safe distance to the south west.

Sincerely yours,

Original signed by Mr. Thayer
