WORKING INTEREST OWNERS' MEETING
FEBRUARY 27, 1990

AGENDA

EMSU STATUS REPORT

- **GEOLOGY**
- **WATERFLOOD PERFORMANCE**
- **SIMULATION WORK**
- **PROJECT ACTIVITIES**
- **AFE STATUS**
- **ADDITIONAL DISCUSSION**

EMSU EXPANSION

- **PROPOSED EXPANSION OVERVIEW**
- **INVESTMENT ADJUSTMENT**
- **CAPITAL EXPENDITURES**
- **OPERATING EXPENSE SHARING**
- **ADDITIONAL DISCUSSION**

EMSU STATUS REPORT CHRONOLOGY OF DEVELOPMENT

- APRIL 1979** Arco Completed Preliminary Feasibility Study
- MAY 1979** First Working Interest Owners' Meeting Gulf to Expedite
- JULY 1979** First Tech. Committee Meeting
- FEB. 1983** Final Tech. Committee Meeting
- AUG. 1983** Final WIO Meeting Prior to State Hearings (21 Owners)
- NOV. 1984** OCD Hearing
- FEB. 1985** Effective Unit
- NOV. 1986** Water Injection Begins
- FEB. 1990** 87 MMBBL of Water Injected (38% of Fillup)
- MAR. 1991** Field Response
- SEPT. 1994** Peak Oil Response

MAP OF THE PERMIAN BASIN OF WEST TEXAS AND SOUTHEASTERN NEW MEXICO SHOWING LARGE SCALE FEATURES DELINEATED BY SUBSURFACE STUDIES AND MOUNTAIN RANGES EXPOSING GUADALUPIAN STRATA ALONG THE WESTERN MARGIN OF THE DELAWARE BASIN. (AFTER WARD, HARRIS, KENDALL, 1986)

EUNICE MONUMENT SOUTH UNIT WATERFLOOD MONITORING PLAN

GOAL: MAXIMIZE PROFITS BY OPTIMIZING RECOVERY "OPTIMIZE UNIT PERFORMANCE"

OBJECTIVE	ACTION	SECONDARY ACTION	RESULTS
<p>I. Optimize Vertical Sweep Efficiency</p>	<p>A. Profile Wells (133 by 7/1/89) (every 12 - 18 months thereafter)</p> <p>B. Maximize Continuity (Review Well Logs)</p>	<p>1. Analyze Logs</p> <p>2. Install Data on Workstation (log traces)</p> <p>3. Install Data on PIECES</p> <p>1. Generate and Evaluate Fence diagrams, X-Sections, etc.</p>	<p>a. Generate Sweep Improvement Workovers</p> <p>b. Use data as Diagnostic Tool</p> <p>c. Monitor Sweep / Make Rec's</p> <p>a. Prepare W/O Recommendation</p> <p>i). Add Perforations</p> <p>ii). Squeeze Off Out of Zone Inj.</p>
<p>II. Minimize Fillup Time</p>	<p>A. Step Rate Tests (10-15/yr.)</p> <p>B. Hallplot Generation (qtrly)</p>	<p>1. Evaluate Step Rate Tests</p> <p>1. Evaluate Hallplots</p>	<p>a. Recommend Inj. Rate Changes</p> <p>a. Recommend Changes</p> <p>i). Cut rates</p> <p>ii). Stimulate</p> <p>iii). No Action</p> <p>iii). No Action</p>
<p>III. Maximize Oil Production and Minimize Water Production</p>	<p>A. Generate Plots and Evaluate</p> <p>B. Pattern Evaluation (FIFO Qtrly) (Build / Initiate FIFO Prgm by 6/1/90)</p> <p>C. Gather & Analyze Water Samples (yearly basis)</p>	<p>1. Rate vs. Time (monthly)</p> <p>2. Rate vs. Cume. (semi-annually)</p> <p>3. MOR vs. Cume. (semi-annually)</p> <p>4. Miscellaneous Plots (as needed)</p> <p>1. Balance Patterns</p> <p>2. Evaluate Performance</p> <p>1. Identify Water Source in Problem Wells</p>	<p>a. Generate Workovers</p> <p>b. Recommend Changes</p> <p>c. No Action</p> <p>a. Stimulate Producers</p> <p>b. Stimulate Injectors</p> <p>c. Change Rates</p> <p>a. Generate Workovers</p> <p>b. No Action</p>
<p>IV. Optimize Recovery Method</p>	<p>A. Model the Reservoir</p>	<p>1. Scale-up CLASS</p> <p>2. Build CHI-TUBE model</p>	<p>a. Evaluate Present Operations</p> <p>b. Infill Drilling</p> <p>c. CO2 Flooding</p> <p>d. Pattern Re-alignment</p>
<p>V. Obtain Reservoir Parameters</p>	<p>A. Run Buildups (15+ per year)</p> <p>B. Run Falloffs (10-15/yr)</p>	<p>1. Evaluate Data</p>	<p>a. Track Reservoir Pressure across Unit</p> <p>b. Calculate FVF's</p> <p>c. Calculate Skin Damage / Generate Workovers</p> <p>d. Determine if MMP is Achieved</p>

Ultimate Recoveries for Nine Patterns

- S/P Ratio = 0.51
- Primary = 9.8 MMSTB
- Primary Plus Secondary = 14.8 MMSTB
- Secondary = 5.0 MMSTB

EMSU Simulation

Summary

- History Match of 9-Pattern Strip Successful
- S/P Ratio for Field = 0.51
- Simulation & Technical Committee Waterflood Forecasts Are Similar

I. EMSU ACTIVITIES

A. WORK TO DATE

- 1. SURFACE FACILITIES**
- 2. DRILLING WELLS**
- 3. WORKOVERS**

B. FUTURE WORKOVERS

- 1. LEASE LINE CONVERSIONS**
- 2. WATER SHUTOFFS**
- 3. PATTERN ALIGNMENT**
- 4. STIMULATION**

C. HIGHLIGHTS

II. AFE STATUS

A. EXPENDITURES

B. COST SAVINGS

EMSU PRODUCTION SYSTEM

- * 217 MILES OF PRODUCTION LINES
AND FLOW LINES

- * 12 SATELLITE BATTERIES

- * 48 PRESSURE VESSELS

- * 1 CENTRAL TANK BATTERY

- * 4 PRESSURE VESSELS

- * 12,000 BBLS OF TANKAGE

TOTAL COST \$7.6MM

EMSU INJECTION SYSTEM

- * 5 MULTISTAGE GOULD
CENTRIFUGAL PUMPS
- * 3 WEMCO FILTERS
- * 5 10,000 BBL WATER TANKS
- * 67 MILES OF INJECTION PIPE
- * 46 INJECTION MANIFOLDS

TOTAL COST \$8.2MM

EMSU GENERAL FACILITIES

- * 151 MILES OF NEW AND
IMPROVED ROADS**

- * 60 MILES OF POWER
DISTRIBUTION LINES**

- * SUPERVISORY CONTROL AND
DATA ACQUISITION SYSTEM
(SCADA)**

TOTAL COST \$2.9MM

EMSU DRILLING ACTIVITY

- * 28 PATTERN PRODUCERS
- * 2 INFILL PRODUCERS
- * 18 INJECTORS
- * 6 WATER SUPPLY WELLS
- * 19 WELLS WITH REPEAT
FORMATION TESTS
- * 17 WELLS CORED

EMSU WORKOVER ACTIVITY

- * 404 WORKOVERS PERFORMED
- * 270 WELLS DEEPENED
- * 115 CONVERSIONS
- * 116 RECONDITIONS/PERFS
CLEAN OUTS/ACIDIZE/LOG
- * 20 WATER SHUTOFFS
- * 8 PLUGBACK INJECTORS
- * 13 WSW REPAIRS
- * 10 CASING LEAKS
- * 6 INJECTOR TUBING LEAKS

FUTURE WORKOVER ACTIVITY

LEASE LINE INJECTOR CONVERSIONS

- * 12 PROBABLE
- * 28 POSSIBLE

WATER SHUTOFFS

- * PLUGBACKS
- * LINERS
- * POLYMER SQUEEZES

PATTERN ALIGNMENT

- * PERFORATE PRODUCERS
- * PERFORATE INJECTORS
- * SHUTOFF OUT OF ZONE INJECTION
- * PROFILE MODIFICATION

STIMULATION

- * INCREASE INJECTIVITY
- * REMOVE WELLBORE DAMAGE

EMSU HIGHLIGHTS

- * ELIMINATED INTERMEDIATE CASING STRING

- * AIR MIST DRILLING

- * DRILLED ONLY 6 WSW, RUN 3 OR 4 PUMPS AT ONE TIME

- * PORTABLE POC

- * COLD WEATHER PRODUCING CAPABILITIES

- * OPTIMIZED PUMPING UNITS

- * PURCHASED SONIC FL DEVICE

EUNICE MONUMENT SOUTH UNIT

PROJECT DRILLING & WORKOVER METHODS

Drilling

Original Method -	Surf 11'3/4" @ 400' (FW Sands) Int. 8 5/8" @ 2700' (Salt Section) Prod. 5 1/2" to TD (last 600' drid. req'd. low fluid loss mud with high concentrations of LCM due to depleted zones)
Improved Method -	Surf 8 5/8" @ 1200' Prod. 5 1/2" to TD (Used Air/Mist drilling program from 2700' to TD')
Results -	ROP increased 101%, mud cost cut 66% . Rotating hours decreased 40% (Savings \$35K/well)
<u>Workovers</u> -	Over 270 wells req'd. deepening
Original Methods -	Deepened with mud containing large quantities of LCM
Improved Method -	Deepened with Air/Mist System
Results -	ROP increased 97%, decreased load wtr lost by 50%, job time cut 22%, formation damage decreased, oil prod. return almost instantly (W/O Saving \$16K/Well)

EMSU PORTABLE PUMP OFF CONTROLLERS

EMSU #238

- OCT 1988 - WELL PUMPING 17/96 BFPD
SONIC FL INDICATES <50' PS
- NOV 1988 - INSTALLED POC
WELL NEVER PUMPED OFF
UPGRADED UNIT TO 320
INCREASED PLUNGER SIZE
- DEC 1988 - WELL PUMPING 31/180 BFPD

EMSU #302

- JUL 1989 - WELL PUMPING 1/216 BFPD
SONIC FL INDICATED +- 200' PS
- LATE 1989 - INSTALLED POC
WELL NEVER PUMPED OFF
UPGRADED UNIT TO 456
INCREASED PLUNGER SIZE
WELL PUMPING 23/280 BFPD

EMSU WIO MEETING (FEB. 27, 1990)

EMSU EXPANSION PROPOSAL

GOAL: Develop Agreement on the Basis
of EMWU Admission into the EMSU

ISSUES:

1. Determine Equitable Investment Adjustment
– Cost to buy into existing EMSU Injection System
2. Determine Equitable Expense Sharing Agreement
– Proportionate sharing of common injection
system monthly expenses
3. Determine Equitable Method of Sharing Capital
Expenditures on Common Injection System

INVESTMENT ADJUSTMENT COST BASIS

Main Trunk Lines	
Water Inj. Plant	\$ 328,098
Water Supply Wells (Surf. Equip.)	\$ 2,229,298
Water Disposal Well (Surf. Equip.)	\$ 403,974
Water Supply Wells (D&C and Equip.)	\$ 20,591
Water Disposal Well (W/O Costs)	\$ 3,511,044
	\$ 87,000
TOTAL	\$ 6,580,005

Investment Adjustment

**Calculation of Capital Depreciation Cost
(Units of Production Method)**

EMSU Oil & Gas Production

Year	BOPY	MCFPY	BOEG	Dep./BOEG	Dep. Expenses
1987	469217	1830573	774312.5	\$1.18	\$ 913,688.75
1988	436255	1787207	734122.0	\$0.81	\$ 594,638.82
1989	475231	2207220	843101.0	\$1.05	\$ 885,256.05
1990	487200	1938317	810252.8	\$1.05	<u>\$ 850,765.48</u>

Total Dep. Expenses **\$3,244,349.10**

(est. 1990 values)

$$\text{Dep. (yrlly)} = \frac{\text{Mineral (NBV)}}{\text{Proved Reser.}} + \frac{\text{Wells, Equip. \& Fac. (NBV)}}{\text{Proved Dev. Reser.}} + \frac{\text{Unprovided Aban. Cost}}{\text{Proved Dev. Reser.}}$$

$$\begin{aligned}\text{Depreciation Factor} &= 1 - (\text{Tot. Dep. Exp. / Gross Exp. thru 1990}) \\ &= 1 - (3244349.1 / 50000000) = (.93511)\end{aligned}$$

Depreciated EMSU Inv. Adj. Cost Basis = \$ 6,153,048.33

EMSU / EMWU Shared Operating Expenses

- * Base EMWU share of EMSU Operating Expenses on Monthly Water Injection and Water Supply take.
(% of total inj. and total wat. supplied)
- * Direct Measurement of Volumes and Elec.
- * Indirect Charges (contract labor, etc.)
coded differently and shared proportionally.
- * Interruptions in system affect both areas equally.

EMWU Operating Expenses

Indirect * $\frac{\text{EMWU Inj. (BWIPM)}}{\text{Tot. Inj. (SU \& WU)}} + \text{Fac. Elec.} * \frac{\text{EMWU Inj.}}{\text{Tot. Inj.}}$
Costs

+ WSW Elec. * $\frac{\text{EMWU WS (BPM)}}{\text{Total WS (BPM)}}$
Costs

EMSU Expense Impact With EMWU Expansion

Average Monthly Expenses

EUNICE MONUMENT SOUTH UNIT
EXPENSE IMPACT
WITH INCLUSION OF EMWU EXPANSION

Area Injection / Water Supply Required

Typical Month -- Dec. 1991

<u>Area</u>	<u>Injection</u>	<u>Water Supply Req'd</u>
EMSU	85901 bwipd	68342 bwpd
EMWU	15000 bwipd	11000 bwpd

TOTAL EXPENSES (on EMSU)

With EMWU Expansion	<u>\$620668</u>	Difference of \$16175 (EMWU absorbs % of Fixed Costs)
Without Expansion	<u>\$604493</u>	

SHARED EXPENSES WITH EMWU EXPANSION (Total \$135134)

EMSU share	<u>\$115446</u>
EMWU share	<u>\$ 19688</u>

IMPACT ON EMSU EXPENSES

EMSU Expenses <u>with</u> EMWU Expansion	<u>\$600980</u>
EMSU Expenses <u>without</u> EMWU Expansion	<u>\$604493</u>
Net Savings	<u>\$ 3515/mo.</u>

EXAMPLE IMPACT TO WORKING INTEREST OWNER

PARTICIPATION = 10 %

Expenses with EMWU Expansion =	\$60098	Savings of
Expenses without EMWU Expansion =	\$60449	\$ 351 / mo.

Investment Adjustment Rebate = \$106079

NET EFFECT -- \$106079 Investment Rebate + avg. \$351/mo savings

PROPOSED
EUNICE MONUMENT SOUTH UNIT
EXPANSION
SUMMARY

- * Expand EMSU to include 3000 ac. tract to the north of the existing unit boundary.
- * Treat each area as separate tract.
- * EMSU Expansion purchase a 17.24% interest in existing Injection System for \$ 1060786.
- * Future common Capital Expenditures shared at 17.24% expansion area, 82.76% existing area prorata share.
- * Common Operating Expenses shared based on water injection and water supply take by area.
