ConocoPhillips Company respectfully requests approval to shut in the subject well producing from Santa Fe Lease; located in Lea County, NM, at Sec 4, 18S, 35E. This request is prompted by matters beyond reasonable control of the lessee. The current worldwide supply/demand ratio and lack of storage capacity is compounded by the COVID-19 national emergency. Our expectation is that the lack of storage capacity and low commodity price will be temporary in nature. We are requesting the flexibility to maintain this well in shut-in status until it once again reaches economic viability. This lease and well are capable of producing oil as evidenced by recent production reports. We seek to perpetuate the lease due to the well's capability to produce and that this cessation of production is temporary.

Shut in to begin 6/1/2020. Production will resume when market conditions improve and storage constraints ease.
