**RE: Hearing Order No. R-13201-B
Extension of Injection Authority**

Well: Pathfinder AGI Well No. 1 (API 30-045-35172)

Location: Unit F, Sec 1, T29N, R15W, NMPM, San Juan County, New Mexico

Order Date: February 15, 2011

Last Month of Reported Injection on Form C-115: December 2019

Approved Injection Interval: Entrada Formation, 6,350 feet to 6,490 feet

Dear Ms. Plagens:

The Oil Conservation Division ("OCD") has received your November 17, 2020 request to extend the authority to inject into the referenced well ("Well") under the referenced Hearing Order ("Order").

When an operator fails to inject into a well for a continuous one (1) year period, OCD shall consider the well to be abandoned, and the authority to inject into the well is terminated automatically under 19.15.26.12(C)(1) NMAC. However, the OCD Director may, upon a request by the well operator and for good cause shown, grant an administrative extension prior to the end of the continuous one (1) year period or during the term of a previously granted extension under 19.15.26.12(C)(2) NMAC.

The OCD director finds that your request is timely and good cause exists to grant your request to extend the authority to inject into the Well. Accordingly, your authority to inject into the Well under the Order is extended until **January 1, 2022**. Failure to inject into the Well or to request an extension by the specified date will result in termination of the Order, and you must submit a new application for authority to inject into the Well.

The remaining terms and conditions in the Order continue in full force and effect, including the requirement to maintain the mechanical integrity of the Well, and the requirements for

temporary abandoned and inactive wells under 19.15.25 and 19.15.28 NMAC.

A handwritten signature in black ink, appearing to read 'AS', is written over a horizontal line.

ADRIENNE SANDOVAL
Director
