Attention: Becca Gallegos - Ron Parham

Gentlemen:

Attached are copies of your recent applications for drilling permits (with notations thereon) together with other information sheets which you should find helpful. It is apparent, from your submittal that you either do not have a copy of the New Mexico Oil and Gas Regulations or you do not understand them. It is advisable for any operator to know what the law requires before proceeding, as potential problems can then be avoided.

Yours truly,

CARL ULVOG
District Supervisor

CU/og

10/19/81: Ms(?) Gallegos called; needed more help in filling out C-101 & C-102. Will resubmit. C.U. (want to start ± 11-1-81)

PROPOSED CASING AND CEMENT PROGRAM

SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	SACKS OF CEMENT	EST. TOP
10 3/4	8 5/8"	24# J-55	700'	300 sxs	surface
7 7/8	4 1/2"	14#	3700'	375 sxs	2800'

National Oil Company proposes to drill a 3700' Permian test where uphole potential may also exist in the San Andres Limestone. A fresh water mud system will be used. Standard annular and blind ram BOP's will be used. If the San Andres appears to be productive, a differential fill float collar will be run 50' below the base of the San Andres in the casing string.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: IF PROPOSAL IS TO DEEPEN OR PLUG BACK, GIVE DATA ON PRESENT PRODUCTIVE ZONE AND PROPOSED NEW PRODUCTIVE ZONE. GIVE BLOWOUT PREVENTER PROGRAM, IF ANY.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
