RE: Murray Well No. 1
K-21-11N-33E
Quay County, New Mexico

Dear Mr. Henegar;

As per our telephone conversation regarding the state requirements on plugging the above referenced well, I have made a study of your data and plugging procedures from wells in the immediate vicinity. The minimum requirement for plugging this well are as follows:

25 sacks @ T. D. (1,000')
25 sacks "in and out" of surface csg. (150')
5 sacks @ surface with a 4" x 4" dry hole marker.

If you have any questions concerning this matter please contact me at this office.

Sincerely,

A handwritten signature in cursive script, reading "Roy E. Johnson".

ROY E. JOHNSON
SR. PETROLEUM GEOLOGIST
